These days the Actual4dump is providing you online Appian ACD101 exam questions to crack the Appian ACD101 certification exam which means you don't need to be physically present anywhere except the chair at your home. You need a laptop and an active internet connection to access the Actual4dump Appian ACD101 Exam Questions and practice exam.

Appian Associate Developer Sample Questions (Q77-Q82):

NEW QUESTION # 77

How do you refer to metadata of a process model object within process model expressions? For example: the creator, name, or description.

- A. Process Properties, referred to in process model expressions using the pp! domain.
- **B. Process Model Properties, referred to in process model expressions using the pm! domain.**
- C. Process Variables, referred to in process model expressions using the pv! domain.

Answer: B

Explanation:

Process Model Properties within Appian are referred to using the pm! domain prefix in process model expressions. This includes metadata such as the creator, name, or description of the process model.

NEW QUESTION # 78

You are constructing an interface that is used as the form of a User Input Task in a process model.

The data entered on the form must be available in the process after the form is submitted.

Which domain prefix should be used for variables in the interface?

- A. ri!
- **B. pv!**
- C. local!

Answer: B

NEW QUESTION # 79

You are creating a large, complex interface

Which statement describes a best practice for strategizing code organization?

- A. Create only one interface object per developer assigned to the feature. This balances the performance cost of calling additional interface objects with the need to prevent developers from overwriting each other.
- B. Since the components are related, all code should be centralized in a single interface object. This minimizes the performance cost incurred by Appian calling multiple interface objects.
- **C. Create individual interface objects for each chunk of code that is logically grouped, especially for those that may be reused in other areas of the application.**

Answer: C

NEW QUESTION # 80

You have a record type ABC_Author, backed by a database table. You created a process that allows the user to modify an existing author.

When configuring the Write Records smart service, what should you consider regarding the record ID?

- A. The Write Records smart service will always update an existing record item.
- B. You have to call the a!getExistingRecordId() function to get the value for the primary key field.
- **C. The primary key field must hold the ID of the existing author record item.**

Answer: C

NEW QUESTION # 81

What is an Appian best practice for calling interface rules on your interface?

- A. Call the interface rule on a rule input.
- **B. Always use consistent ordering of rule parameters.**
- C. Use keyword syntax.

Answer: B

Explanation:

An Appian best practice for calling interface rules within your interfaces is to always use a consistent ordering of rule parameters. This practice enhances the readability and maintainability of your interfaces, ensuring that other developers can understand and modify the interface more easily.
