PL-600 Reliable Exam Book - Test PL-600 Practice

ActualCollection Microsoft Power Platform Solution Architect Certification Exam come in three different formats so that the users can choose their desired design and prepare Microsoft Power Platform Solution Architect (PL-600) exam according to their needs. The first we will discuss here is the PDF file of real Microsoft Power Platform Solution Architect (PL-600) exam questions. It can be taken to any place via laptops, tablets, and smartphones. In addition, you can print these Microsoft Power Platform Solution Architect (PL-600) PDF questions for paper study in this format of ActualCollection product frees you from restrictions of time and place as you can study PL-600 exam questions from your comfort zone in your spare time.

Microsoft Power Platform Solution Architect Sample Questions (Q140-Q145):

NEW QUESTION # 140

You need to recommend the appropriate components to meet the inspection requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

- * You must prevent users from changing inspection order data once an inspection is marked as final.
- * Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

NEW QUESTION # 141

You need to provide the IT specialists with design diagrams.
What should you provide?

- A. Entity relationship diagram (ERD)
- B. Dynamics 365 Product Visualize
- C. Business process modeler (BPM)
B AI Builder

Answer: C

Explanation:

Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system. Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC) Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview>

NEW QUESTION # 142

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements

- * Retail employees must use the application on a company-provided tablet device.
- * The app must store data offline
- * Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
- * Apps are shared with security group teams for users to access.

You need to identify the project's functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

Explanation

NEW QUESTION # 143

You are designing a Microsoft Power Platform solution for a customer.

The customer is developing an application that needs to use an existing Microsoft SharePoint list. The application must be able to:

* allow view access for external customers.

* use out-of-the-box processes for access for employees.

You need to recommend components for the application.

Which two components should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Model-driven app
- B. Canvas app
- C. Power Pages
- D. Custom pages

Answer: A,D

NEW QUESTION # 144

You are designing a model-driven app that allows a company to manage sales opportunities. The company has a complex security model that includes the following requirements:

- The vice president of sales must be able to see opportunities for sales managers and sales representatives.

- Sales managers must be able to see opportunities for all sales representatives.

- Sales representatives must only see opportunities that they own.

You need to recommend security tools for controlling user access.

Which two tools should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Position hierarchy
- B. Field security profile
- C. Account hierarchy
- D. Security roles

Answer: A,D

Explanation:

With the position hierarchy security, a user at a higher position has access to the records owned by a lower position user or by the team that a user is a member of, and to the records that are directly shared to the user or the team that a user is a member of. The hierarchy security model is an extension to the earlier security models that use business units, security roles, sharing, and teams. It can be used in conjunction with all other existing security models.
