Workday Workday-Pro-HCM-Core Desktop Practice Exam Questions Software

We all have the right to pursue happiness. Also, we have the chance to generate a golden bowl for ourselves. Now, our Workday-Pro-HCM-Core practice materials can help you achieve your goals. As we all know, the pace of life is quickly in the modern society. So we must squeeze time to learn and become better. With the Workday-Pro-HCM-Core Certification, your life will be changed thoroughly for you may find better jobs and gain higher incomes to lead a better life style. And our Workday-Pro-HCM-Core exam questions will be your best assistant.

Workday Pro HCM Core Certification Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

When hiring a worker, you want the HR Partner to receive a task to review and update the company and cost center assigned to the new hire. What action do you add to the Hire business process to accomplish this?

- A. Edit Workday Account
- **B. Change Organization Assignments**
- C. Onboarding Setup
- D. Review Employee Hire

Answer: B

Explanation:

To ensure the HR Partner reviews and updates a new hire's Company and Cost Center, you add the Change Organization Assignments action step to the Hire business process.

This action allows the HR Partner (or assigned role) to validate and modify organizational assignments, such as Company, Cost Center, Region, or Location, before the Hire event is finalized. It is typically positioned after the Review Employee Hire step to confirm that all organization-level data aligns with the new worker's role and supervisory org defaults.

Option A (Review Employee Hire) is a completion-type review step and does not update organization data.

Option B (Onboarding Setup) prepares onboarding tasks, not organizational details.

Option C (Edit Workday Account) deals with account credentials and system access.

Thus, Change Organization Assignments is the correct step for updating or confirming company and cost center information during the hiring process.

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Adding and Configuring Organization Assignment Steps in Staffing BPs."

NEW QUESTION # 52

What statement describes business process notification functionality?

- A. You can only select one status as the notification trigger.
- **B. You can use text and fields in the body of the notification message.**
- C. You can create your own notification triggers.
- D. You can only send custom notifications to internal employees.

Answer: B

Explanation:

Workday's Business Process Notification functionality enables administrators to configure custom notifications that are automatically sent to users when specific BP events occur. The correct statement is that you can use text and fields in the body of the notification message (Option B).

Notification templates support the insertion of business process fields, allowing dynamic content such as worker names, event types, or effective dates to be automatically populated in the message. This helps personalize communications and provide clear, actionable context.

Option A is incorrect because notifications can be sent to both internal users and external participants (such as vendors or contingent workers) if appropriately configured.

Option C is incorrect - you can configure multiple status triggers (e.g., In Progress, Denied, Completed).

Option D is incorrect since notification triggers are predefined by Workday, and while you can configure their messages and recipients, you cannot create entirely new trigger types.

Therefore, the main strength of this feature lies in its customizable content, dynamic field integration, and multi-status trigger support.

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Business Process Notifications," and "Custom Message Configuration."

NEW QUESTION # 53

Your client wants to select a staffing model that will allow them to track the time to fill a position. What staffing model should they use?

- A. A hybrid staffing model
- B. Customer-defined staffing model
- C. Job Management
- **D. Position Management**

Answer: D

Explanation:

The correct answer is C - Position Management.

In Workday, Position Management is the staffing model used when an organization needs to track headcount, vacancies, and time-to-fill for each position individually. Each position represents a distinct job slot that must be filled by a worker, providing clear visibility into when a position is open, filled, or closed.

This model is ideal for organizations that require detailed tracking of resource allocation, workforce planning, and recruiting metrics such as "time to fill". Because each position must exist before a hire can occur, Workday automatically records the date the position is opened and the date it is filled, allowing accurate reporting on recruitment cycle times.

In contrast, Job Management groups workers under jobs rather than individual positions and does not provide vacancy-level tracking, making it unsuitable for time-to-fill analysis.

NEW QUESTION # 54

A customer creates a new supervisory organization to inherit attributes from an existing supervisory organization. Which attributes will be inherited from the superior organization to the subordinate organization? (Select three correct answers.)

- **A. Organization Assignments**
- **B. Staffing Model**
- C. Name
- D. Subtype
- **E. Visibility**

Answer: A,B,E

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organizations Configuration Guide 2023R2):

When creating a new supervisory organization, Workday allows the subordinate organization to inherit key structural and configuration attributes from its superior organization. These inherited elements include:

- * Visibility (A): Determines who can view the organization and its members, inherited to maintain consistent access control.
- * Organization Assignments (B): Such as company, cost center, region, and custom organizations, ensuring hierarchical alignment.
- * Staffing Model (D): The staffing model (Position Management or Job Management) is inherited to ensure consistency in hiring and staffing control.

Subtype (C) and Name (E) are not inherited; they must be defined at the time of creation. Subtype determines the organization's classification, while the name uniquely identifies it.

Reference (Paraphrased Source):

Workday Pro HCM Core - Organizations and Hierarchy Configuration Guide (2023R2), Section: "Creating Subordinate Supervisory Organizations."

"Subordinate supervisory organizations inherit configuration from their superior supervisory organization, including attributes such as the staffing model, organization assignments, and visibility settings. This ensures consistency and reduces administrative overhead."

- Workday Module 2 Binder, Supervisory Organizations Section

NEW QUESTION # 55

What must your client do before they can start hiring within a position management staffing model supervisory organization?

- A. Set hiring restrictions on the supervisory organization.
- **B. Have an open, approved position.**
- C. Use the Edit Staffing Model task to select the staffing model.
- D. Have at least one member hired into the supervisory organization.

Answer: B
