最新的 SAP Certified Associate C_SAC_2501 免費考試真題 (Q19-Q24):

問題 #19

In a data model, what can you use to further describe a dimension?

- A. Measure
- **B. Property**
- C. Data action
- D. Variable

答案：B

解題說明：

In a data model within SAP Analytics Cloud, Properties are used to further describe dimensions. Properties provide additional context or metadata for dimension members, such as descriptions, classifications, or other attributes that help to better understand and analyze the data within the dimension. This makes properties essential for detailed data analysis and reporting.

問題 #20

You have a story in My Files. You want your colleague to review and comment on the story. What must you do?

- A. Include the story in a Discussion
- **B. Share with View access**
- C. Add a Comment widget to the story
- D. Create a Review task for the story

答案：B

問題 #21

What can you do with a multi action? Note: There are 2 correct answers to this question.

- **A. Import transaction data**
- B. Run allocation processes
- C. Approve data
- **D. Run allocation data actions**

答案：A,D

問題 #22

You have a live data model with two dimensions: Firstname and Lastname. Users want a single dimension in the data model that displays the dimensions as Lastname, Firstname. What must you do?

- A. Create a calculated dimension in the story.
- B. Create the combined data in the source system.
- C. Group the Firstname and Lastname in the data model.
- **D. Create a calculated dimension in the data model.**

答案： D

解題說明：

To combine two dimensions, Firstname and Lastname, into a single dimension displaying as Lastname, Firstname in a live data model, you should create a calculated dimension in the data model. This calculated dimension will concatenate the two fields into one, according to the specified format. This approach allows for the creation of a new dimension that can be used across various reports and analyses within the model, maintaining the integrity of the original dimensions.

問題 #23

How can you limit the refresh time of a story?

- **A. Collapse the hierarchy**
- B. Create calculated measures
- C. Implement a value driver tree
- D. Use canvas pages

答案： A

解題說明：

Collapsing the hierarchy in a story can help limit the refresh time, as it reduces the amount of data that needs to be processed and displayed at any given time. By presenting data at a higher aggregation level initially, you can improve performance and allow users to expand specific sections of the hierarchy as needed for more detailed analysis.
