Real4dumps regularly updates its Salesforce Certified CRM Analytics and Einstein Discovery Consultant (Analytics-Con-201) questions PDF file to improve the questions and introduce changes when required.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q78-Q83):

NEW QUESTION # 78

A versioning feature allows CRM Analytics users to be added as Publishers and make changes separately while a 'Live' version is still being used by other users. Once the changes are complete, the user can then set their updated version as the Live version. Which CRM Analytics item is this leveraged for?

- A. App
- B. Dataset
- C. goats

Answer: A

Explanation:

In CRM Analytics, the versioning feature described is typically leveraged for Apps. This feature allows:

- * Parallel Development: Users can work on changes in a separate version without affecting the live version being accessed by others.
- * Controlled Publishing: Once changes are finalized, the user can then promote their version to be the new live version, ensuring seamless updates without disrupting ongoing usage.

* Collaborative Workflows: Facilitates teamwork by allowing multiple users to propose and test changes in a controlled environment before making those changes live.

This approach ensures that CRM Analytics apps remain dynamic and can evolve over time while maintaining stability and continuity for end-users.

NEW QUESTION # 79

A CRM Analytics consultant has enabled data sync manually in an org that uses dataflows/recipes. The client says that the dataflow/recipe fails each time it starts running.

What is causing the dataflow/recipe to fail?

- A. Dataflows/recipes with Augment nodes fail until sync has run for the first time.
- B. Dataflows/recipes with computeExpression nodes fail until sync has run for the first time.
- C. Dataflows/recipes with sfdcDigest nodes fail until sync has run for the first time.

Answer: C

NEW QUESTION # 80

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

What is causing the issue?

- A. The permission set for the users is missing the download data permission.
- B. The dashboard has been created for internal use and the users have a view only license.
- C. The users have access to the dashboard but not the dataset.

Answer: A

Explanation:

As in the previous question, the issue is related to permissions. Users can be granted access to dashboards and apps, but if their permission set does not explicitly allow the "Download Data" action, they will not be able to download the widget data. This is a common issue encountered when users have restricted permissions, especially in environments where security and data access are tightly controlled.

NEW QUESTION # 81

A model created with a GLM algorithm produced unsatisfactory results.

When re-running the model, which type of algorithm should the consultant use to improve the results?

- A. Support Vector Machines
- B. XGBoost
- C. K-Nearest Neighbors

Answer: B

NEW QUESTION # 82

CRM Analytics team is asked to build a Service Analytics dashboard for the service agents.

What are the main "Deep Design Thinking" principles the team should keep in mind during the discovery sessions?

- A. Clarity - Efficiency - Consistency
- B. Purpose - Structure - Surface
- C. Priority - Logic - Level of Granularity

Answer: B

NEW QUESTION # 83
