

Exam Oracle 1Z0-1072-25 Price | New 1Z0-1072-25 Exam Cram

The Pass4guide offers three formats for applicants to practice and prepare for the 1Z0-1072-25 exam as per their needs. The pdf format of Pass4guide is portable and can be used on laptops, tablets, and smartphones. Print real Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam questions in our PDF file. The pdf is user-friendly and accessible on any smart device, allowing applicants to study from anywhere at any time.

For candidates who are going to buying the 1Z0-1072-25 exam dumps online, you may concern more about the personal information. If you choose us, your personal information will be protected well. Once you buy 1Z0-1072-25 exam materials of us, we will send the downloading link to you automatically, and you can start your training immediately. Once the order finish, your personal information such as your name and your email address will be concealed. In addition, 1Z0-1072-25 Exam Dumps provide you with free update for 365 days, namely you can get the latest information about the exam.

>> Exam Oracle 1Z0-1072-25 Price <<

Free PDF Quiz Valid Oracle - 1Z0-1072-25 - Exam Oracle Cloud Infrastructure 2025 Architect Associate Price

For candidates who are looking for the 1Z0-1072-25 training materials, we will be your best choose due to the following reason. 1Z0-1072-25 training materials are high-quality and high accuracy, since we are strict with the quality and the answers. We ensure you that 1Z0-1072-25 Exam Dumps are available, and the effectiveness can be also guarantees. We are pass guarantee and money back guarantee if you fail to pass the exam after buying 1Z0-1072-25 trainin materials from us. Free update for one year is available to you.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which TWO statements are true about performing a multipart upload using the Multipart Upload API?

- A. You do not have to commit the upload after uploading all parts.
- **B. Each part can be as large as 50 GiB.**
- **C. You can keep adding parts as long as the total number is less than 10,000.**
- D. You do not need to split the object into parts.

Answer: B,C

Explanation:

When performing a multipart upload using the Multipart Upload API in Oracle Cloud Infrastructure (OCI) Object Storage, the following points are true:

C . Each part can be as large as 50 GiB: OCI allows each part of a multipart upload to be up to 50 GiB in size. This enables the efficient uploading of large objects in smaller, manageable parts.

D . You can keep adding parts as long as the total number is less than 10,000: The Multipart Upload API supports up to 10,000 parts for a single object. This allows the upload of very large objects by dividing them into multiple parts.

Incorrect Statements:

A . After uploading all parts, you must commit the upload to finalize the multipart upload and combine all parts into a single object.

B . The object must be split into parts before uploading when using the Multipart Upload API.

NEW QUESTION # 41

A financial firm is designing an application architecture for its online trading platform that should have high availability and fault tolerance. What should the architect do to avoid any costly service disruptions and ensure data durability?

- A. Create a lifecycle policy to regularly send data from the Standard to Archive storage.
- B. Copy the Object Storage bucket to a block volume.
- C. Create a new Object Storage bucket in another region and configure recycle policy to move data every 5 days.
- **D. Create a replication policy to send data to a different bucket in another OCI region.**

Answer: D

Explanation:

For an online trading platform requiring high availability and fault tolerance, it's critical to ensure data durability and avoid any costly service disruptions. In Oracle Cloud Infrastructure (OCI), Object Storage is often used to store critical data, such as transaction logs or user data, due to its scalability, durability, and reliability.

Option B is the most suitable approach for ensuring data durability and availability across regions. Here's why:

Cross-Region Replication (CRR): OCI offers a feature called Cross-Region Replication for Object Storage. This feature allows you to automatically and asynchronously replicate objects in a bucket from one OCI region to another. This setup ensures that even if one region experiences a failure, the data is still available in another region, thereby meeting the requirements for high availability and fault tolerance.

Data Durability: By replicating data to another region, you protect against regional outages. OCI guarantees 99.995% availability for replicated data, which is critical for a financial firm's trading platform where data consistency and durability are paramount.

Disaster Recovery: With data replicated in another region, the trading platform can quickly switch to using the data in the secondary region in case of a disaster in the primary region. This setup significantly reduces recovery time objectives (RTO) and ensures business continuity.

Reference:

Oracle Cloud Infrastructure Documentation: Cross-Region Replication for Object Storage Oracle Whitepaper: High Availability and Disaster Recovery in Oracle Cloud Infrastructure Explanation of Incorrect Options:

Option A: Creating a new Object Storage bucket in another region and configuring a recycle policy to move data every 5 days does not provide real-time data availability or the fault tolerance required for a financial application. Recycle policies are intended for managing the lifecycle of data, not for high availability or disaster recovery.

Option C: While lifecycle policies are useful for moving less frequently accessed data to a more cost-effective storage tier (e.g., from Standard to Archive), they do not address cross-region redundancy or real-time availability, which are critical for this use case.

Option D: Copying an Object Storage bucket to a block volume is not a recommended practice for ensuring data durability and fault tolerance. Block volumes are used for persistent storage attached to compute instances, and copying object storage data to block volumes does not achieve the same level of redundancy and cross-region availability as replication policies.

Thus, Option B is the correct and most efficient method for ensuring high availability and fault tolerance in this scenario.

NEW QUESTION # 42

Which Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) policy is invalid?

- A. Allow any-user to inspect users in tenancy
- B. Allow group 'Default/'A-Admins' to manage all-resources in compartment Project-A
- C. Allow dynamic-group 'Default/'FrontEnd' to manage instance-family in compartment Project-A
- D. Allow group 'Default/'A-Developers' to create volumes in compartment Project-A

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), Identity and Access Management (IAM) policies are used to control access to resources. The policy in option C is invalid because "any-user" is not a valid principal in OCI IAM policies. OCI policies can only grant permissions to groups or dynamic groups, but not to arbitrary users.

Here's an explanation for each option:

A . Allow dynamic-group 'Default/'FrontEnd' to manage instance-family in compartment Project-A: This is valid. It grants the dynamic group 'FrontEnd' the ability to manage instances within the Project-A compartment.

B . Allow group 'Default/'A-Admins' to manage all-resources in compartment Project-A: This is valid. It provides full administrative access to all resources in the Project-A compartment for the 'A-Admins' group.

C . Allow any-user to inspect users in tenancy: This is invalid because OCI does not allow the use of "any-user" in policies. You must specify a valid group or dynamic group to define permissions.

D . Allow group 'Default/'A-Developers' to create volumes in compartment Project-A: This is valid. It permits the 'A-Developers' group to create volumes in the Project-A compartment.

NEW QUESTION # 43

How would you allow access to FSS for a DB System with read-only permissions?

- A. Modify the security list to allow stateless ingress rules.
- B. Create an NFS export option that allows READ_ONLY access.
- C. Create an instance principal for the DB System.
- D. Modify the security list to allow stateful ingress rules.

Answer: B

Explanation:

To allow access to Oracle Cloud Infrastructure (OCI) File Storage Service (FSS) for a Database (DB) System with read-only permissions, you should create an NFS export option that specifies READ_ONLY access.

NFS Export Options: These options define the access permissions (read/write or read-only) for clients connecting to the file system. By setting the export option to READ_ONLY, you ensure that the DB System can only read from the FSS and cannot modify or delete files.

NEW QUESTION # 44

You can attach resources to a Dynamic Routing Gateway (DRG). Select THREE of these resources.

- A. Virtual Circuits
- B. Local Peering Connection
- C. IPSec Tunnel
- D. Remote Peering Connections
- E. VNIC
- F. Subnet

Answer: A,C,D

Explanation:

A Dynamic Routing Gateway (DRG) in Oracle Cloud Infrastructure (OCI) is a virtual router that provides a path for private traffic between your on-premises network and your VCN, or between your VCN and other VCNs. The resources that can be attached to a DRG include:

A . Virtual Circuits: Used to establish a private connection between your on-premises data center and your VCN via Oracle's FastConnect service.

D . Remote Peering Connections: Enables peering between VCNs located in different regions (Remote VCN Peering).

E . IPSec Tunnel: Facilitates secure VPN connections between your on-premises network and your OCI VCN.

NEW QUESTION # 45

.....

The price for 1Z0-1072-25 study materials is quite reasonable, no matter you are a student at school or an employee in the company, you can afford it. Just think that you just need to spend some money, you can get the certificate. What's more, 1Z0-1072-25 exam materials are compiled by skilled professionals, and they cover the most knowledge points and will help you pass the exam successfully. We have online and offline chat service stuff, they have the professional knowledge about 1Z0-1072-25 Exam Dumps, and you can have a chat with them if you have any questions.

New 1Z0-1072-25 Exam Cram <https://www.pass4guide.com/1Z0-1072-25-exam-guide-torrent.html>

Our 1Z0-1072-25 pdf vce will try our best to help our candidates no matter you are a new or old customer, Oracle Exam 1Z0-1072-25 Price It is hard to find such high pass rate in the market, What's more, the update checking about 1Z0-1072-25 test dumps is the day work of our experts, Then you are lucky enough because of our Oracle 1Z0-1072-25 training torrent, The Oracle 1Z0-1072-25 PDF is also regularly reviewed by our experts so that you never miss important changes from Oracle 1Z0-1072-25.

New Geography covers a lot of trends and issues of importance to small business, 1Z0-1072-25 but does so from an urban planning geography perspective, The main strategy for doing this is to make the relevant code atomic with respect to relevant data.

Pass Guaranteed 2026 1Z0-1072-25: The Best Exam Oracle Cloud Infrastructure 2025 Architect Associate Price

Our 1Z0-1072-25 PDF VCE will try our best to help our candidates no matter you are a new or old customer, It is hard to find such high pass rate in the market, What's more, the update checking about 1Z0-1072-25 test dumps is the day work of our experts.

Then you are lucky enough because of our Oracle 1Z0-1072-25 training torrent, The Oracle 1Z0-1072-25 PDF is also regularly reviewed by our experts so that you never miss important changes from Oracle 1Z0-1072-25.
