PL-600 Prüfungsvorbereitung - PL-600 Antworten

Wir ITZert sind die Website, die Kadidaten IT-zertifizierung Dumps und gut helfen können. Wir ITZert schreiben alle Microsoft PL-600 Prüfungsfragen bei der Verwendung der früheren Erlebnisse, deshalb haben wir die besten Microsoft PL-600 Dumps. Die Prüfungsunterlagen beinhalten alle möglichen Prüfungsfragen in der aktuellen Prüfung. Es kann Ihnen garantieren, einmal den Erfolg zu erreichen.

Microsoft Power Platform Solution Architect PL-600 Prüfungsfragen mit Lösungen (Q135-Q140):

135. Frage

You need to recommend a solution to collect the information required to meet reporting requirements.
What should you recommend?

- A. Business event
- B. Business process flow
- C. Business rule
- D. Business process modeler

Antwort: C

Begründung:

Business rule can create business recommendations based on business intelligence.

Scenario: Analytics and reporting

The solution must:

Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.

Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).

Provide a printed quality certificate to be included with each machine.

136. Frage

You need to investigate the canvas app functionality issues.

Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Errors function
- **B. Solution checker**
- C. Power Platform admin center
- **D. App checker**

Antwort: B,D

Begründung:

Scenario: The testing team reports that one of the canvas apps is not working as expected. An error message displays as specific pages load.

A: The App checker is now available to help provide a clear list of formula issues in your app, and to provide items to fix to make your app accessible. The App checker is an area that the PowerApps team will continue to invest in, and build on in order help to make debugging, performance and best practice decisions an easier and more guided experience.

C: With the solution checker feature, you can perform a rich static analysis check on your solutions against a set of best practice rules and quickly identify these problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.

137. Frage

You need to provide the IT specialists with design diagrams.

What should you provide?

- **A. Business process modeler (BPM)**
B AI Builder
- B. Entity relationship diagram (ERD)
- C. Dynamics 365 Product Visualize

Antwort: A

Begründung:

Explanation

Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system. Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC) Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview>

138. Frage

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the

images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Antwort:

Begründung:

Explanation

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution.

Power BI automatically refreshes the app's data displayed.

139. Frage

A company sells antique books. The company stores data about book locations in an existing system by using the following database fields: Room, Shelf.

The company must import the data from the existing system into a Power Platform solution. Existing data into must be modified to match the design of the new solution.

You need to recommend a solution to combine the room and shelf fields into a single column during the import process.

Which tool should you recommend?

- A. import from CSV
- B. Microsoft Excel Online
- C. Data Import Wizard
- D. Power Platform dataflows

Antwort: D

Begründung:

Dataverse includes a web application tool called Import Data Wizard. You use this tool to import data records from one or more comma-separated values (.csv), XML Spreadsheet 2003 (.xml), or text files.

Use transformation mapping to modify data before importing it. For example, split a full name that is contained in the source file into a first name and a last name to match the target columns for a table.

Note:

* To implement data import, you typically do the following:

* Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

* Create a data map or use an existing data map.

* Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

* Create a data map or use an existing data map.

* Associate an import file with a data map.

* Upload the content from a source file to the associated import file.

* Parse the import file.

* Transform the parsed data.

* Upload the transformed data into the target Dataverse server.
