

CCFH-202b {Keyword1 }100%합격보장가능한덤프자료

질문 # 52

What is the purpose of an architecture overview model?

- A. To identify the required data sources.
- B. To determine the sequence of projects
- C. To identify the user groups and required authorizations
- D. To automatically generate the LSA++ architecture

정답

설명 :

An architecture overview model is a high-level diagram that shows the main components and data flows of a solution. It helps to identify the required data sources and how they are connected to the target system. An architecture overview model can also show the main business processes and scenarios that are supported by the solution. An architecture overview model is useful for scoping, planning, designing, and communicating a solution.

질문 # 53

CCFH-202b인기자격증 & CCFH-202b최신시험후기

PassTIP는CrowdStrike CCFH-202b시험을 패스할 수 있는 아주 좋은 사이트입니다. PassTIP은 아주 알맞게 최고의 CrowdStrike CCFH-202b시험문제와 답 내용을 만들어 냅니다. 덤프는 기존의 시험문제와 답과 시험문제분석 등입니다. PassTIP에서 제공하는CrowdStrike CCFH-202b시험자료의 문제와 답은 실제시험의 문제와 답과 아주 비슷합니다.

최신 CrowdStrike Falcon Certification Program CCFH-202b 무료샘플문제 (Q57-Q62):

질문 # 57

What do you click to jump to a Process Timeline from many pages in Falcon, such as a Hash Search?

- A. Process ID or Parent Process ID
- **B. Process Timeline Link**
- C. PID
- D. CID

정답: B

설명:

The Process Timeline Link is what you click to jump to a Process Timeline from many pages in Falcon, such as a Hash Search. The Process Timeline Link is an icon that looks like three horizontal bars with dots on them. It appears next to each process name or ID on various pages in Falcon, such as Hash Search results, Detection details, Event Search results, etc. Clicking on it will open a new tab with the Process Timeline for that process. The PID, the Process ID or Parent Process ID, and the CID are not what you click to jump to a Process Timeline.

질문 # 58

Which field should you reference in order to find the system time of a *FileWritten event?

- A. timestamp
- **B. ContextTimeStamp_decimal**
- C. FileTimeStamp_decimal
- D. ProcessStartTime_decimal

정답: B

설명:

ContextTimeStamp_decimal is the field that shows the system time of the event that triggered the sensor to send data to the cloud. In this case, it would be the time when the file was written. FileTimeStamp_decimal is the field that shows the last modified time of the file, which may not be the same as the time when the file was written. ProcessStartTime_decimal is the field that shows the start time of the process that performed the file write operation, which may not be the same as the time when the file was written. Timestamp is the field that shows the time when the sensor data was received by the cloud, which may not be the same as the time when the file was written.

질문 # 59

What Investigate tool would you use to allow an analyst to view all events for a specific host?

- A. Process Timeline
- **B. Host Search**

- C. Host Timeline
- D. Bulk Timeline

정답: C

설명:

The Host Timeline is the Investigate tool that you would use to allow an analyst to view all events for a specific host. The Host Timeline shows a graphical representation of all events that occurred on a host within a specified time range. It allows an analyst to zoom in and out, filter by event type or name, and drill down into event details. The Bulk Timeline, the Host Search, and the Process Timeline are not Investigate tools that you would use to view all events for a specific host.

질문 # 60

Which of the following is the proper method to quantify search results, enabling a hunter to quickly sort and identify outliers?

- A. Using the "| stats count by" command at the end of a search string in Event Search
- B. Using the "eval" command at the end of a search string in Event Search
- C. Using the "|stats count" command at the end of a search string in Event Search
- D. Exporting Event Search results to a spreadsheet and aggregating the results

정답: A

설명:

This is the proper method to quantify search results, enabling a hunter to quickly sort and identify outliers. The stats command is used to calculate summary statistics on the results of a search or subsearch, such as count, sum, average, etc. The count by option is used to count the number of events for each distinct value of a field or fields and display them in a table. This can help find rare or common values that could indicate anomalies or deviations from normal behavior.

질문 # 61

What information is shown in Host Search?

- A. Prevention Policies
- B. Quarantined Files
- C. Intel Reports
- D. Processes and Services

정답: D

설명:

Processes and Services is one of the information that is shown in Host Search. Host Search is an Investigate tool that allows you to view events by category, such as process executions, network connections, file writes, etc. Processes and Services is one of the categories that shows information such as process name, command line, parent process name, parent command line, etc. for each process execution event on a host. Quarantined Files, Prevention Policies, and Intel Reports are not shown in Host Search.
