Are you aiming to ace the Cisco 300-415 exam on your first attempt? Look no further! Pass4Success provides updated Implementing Cisco SD-WAN Solutions (300-415) exam questions that will help you succeed. In today's competitive job market, obtaining the Cisco 300-415 Certification is essential for securing high-paying jobs and promotions. Don't waste your time and money studying outdated 300-415 practice test material. Prepare with actual 300-415 questions to save time and achieve success.

Cisco 300-415 Exam covers a range of topics related to SD-WAN solutions, including architecture, deployment, security, management, and troubleshooting. Candidates are required to have a strong understanding of routing and switching technologies, as well as experience in implementing WAN technologies such as MPLS, VPN, and DMVPN.

Cisco 300-415 certification exam is a highly respected certification in the networking industry. It is an essential certification for network engineers and architects who want to advance their career by gaining expertise in Cisco SD-WAN solutions. Implementing Cisco SD-WAN Solutions certification provides individuals with the skills and knowledge required to deploy and manage Cisco SD-WAN solutions in enterprise environments. Implementing Cisco SD-WAN Solutions certification is recognized worldwide, and it is a valuable addition to any individual's resume.

Certification 300-415 Book Torrent, 300-415 Reliable Test Blueprint

The passing rate of our 300-415 training quiz is high as 98% to 100% and the hit rate is also high. Our professional expert team seizes the focus of the exam and chooses the most important questions and answers which has simplified the important information and follow the latest trend to make the client learn easily and efficiently on our 300-415 Study Guide. You can also free download the demos of our 300-415 learning materials to have a check.

Cisco Implementing Cisco SD-WAN Solutions Sample Questions (Q191-Q196):

NEW QUESTION # 191

An engineer wants to change the configuration of the certificate authorization mode from manual to automated. Which GUI selection will accomplish this?

- A. Configuration > Certificates
- B. Tools > Operational Commands
- **C. Administration > Settings**
- D. Maintenance > Security

Answer: C

Explanation:

To change the configuration of the certificate authorization mode from manual to automated in Cisco SD-WAN, you would typically select:

Administration > Settings

The "Administration > Settings" section of the GUI typically includes options for configuring various settings, including certificate authorization modes.

NEW QUESTION # 192

Which device in the SD-WAN solution receives and categorizes event reports, and generates alarms?

- **A. vManage NMS**
- B. WAN Edge routers
- C. vSmart controllers
- D. vBond controllers

Answer: A

Explanation:

<https://www.cisco.com/c/en/us/td/docs/routers/sdwan/configuration/Monitor-And- Maintain/monitor-maintain-book/m-alarms-events-logs.html>

<https://www.cisco.com/c/dam/en/us/td/docs/routers/sdwan/configuration/vmanage/vmanage-how- tos-18-4-1.pdf>

NEW QUESTION # 193

Refer to the exhibit.

```
vEdge-Liouar#  
vEdge-Cloud#  
vEdge-Cloud# vshe11  
vEdge-Cloud:# $ cd /var/log/  
vEdge-Cloud:/var/log$  
vEdge-Cloud:/var/log$ ls -1  
total 28992  
-rw-r--r-- 1 root root 1441700 Nov 22 15:13 auth.log  
-rw-r--r-- 1 basic adm 0 Aug 7 15:29 cloud-init.log

vEdge-Cloud:/var/log$  
vEdge-Cloud:/var/log$
```

Refer to the exhibit. Which configuration stops Netconf CLI logging on WAN Edge devices during migration?

```

logs
  audit-disable
  netconf-disable

logs
  netconf-disable

logging
  disk netconf-disable

logging
  disk
  . audit-disable
  netconf-disable

```

- A. Option D
- B. Option A
- C. Option B
- D. Option C

Answer: C

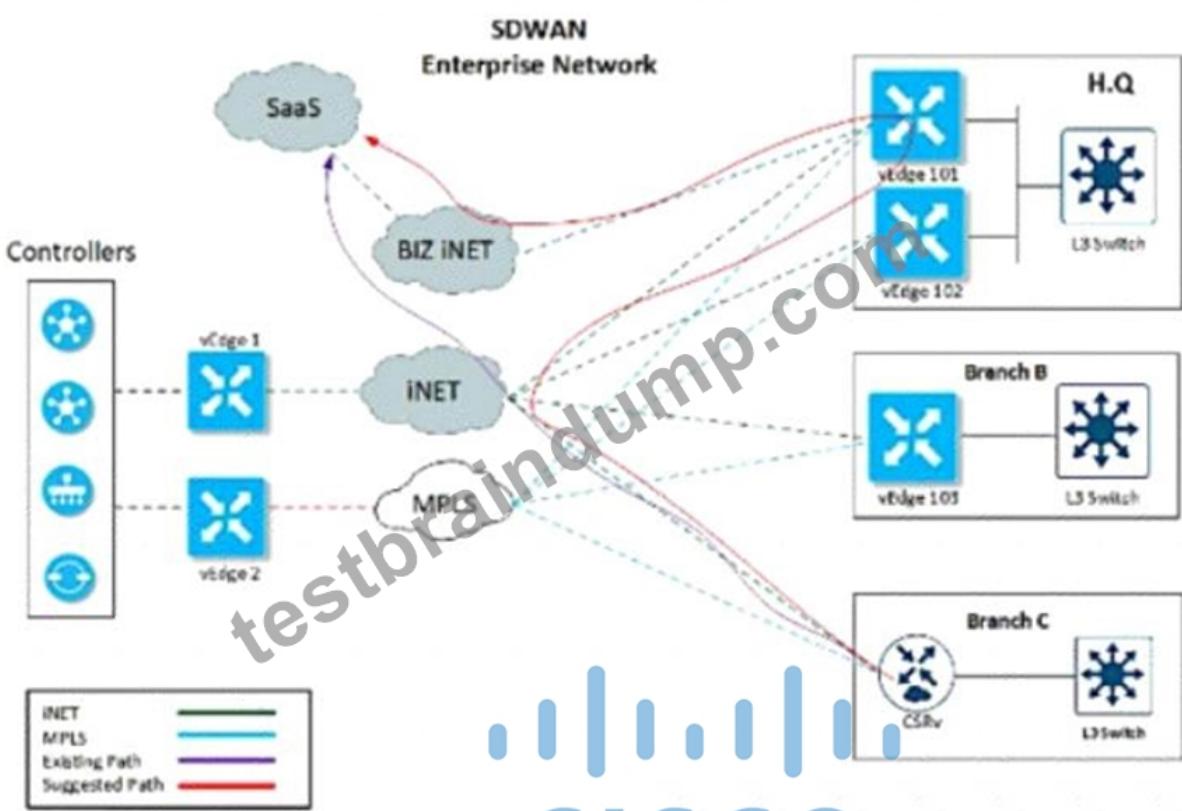

Explanation:

<https://www.cisco.com/c/en/us/td/docs/routers/sdwan/command/sdwan-cr-book/config-cmd.html#wp3867250313>

Syslog messages related to AAA authentication and Netconf CLI access and usage are placed in the auth.log and messages files. Each time Cisco vManage logs in to a Cisco vEdge device to retrieve statistics and status information and to push files to the router, the router generates AAA and Netconf log messages. So, over time, these messages can fill the log files. To prevent these messages from filling the log files, you can disable the logging of AAA and Netconf syslog messages:

```
Device(config)# system aaa logs
Viptela(config-logs)# audit-disable
Viptela(config-logs)# netconf-disable
```

NEW QUESTION # 194

Refer to the exhibit. An enterprise decides to use the Cisco SD-WAN Cloud onRamp for SaaS feature and utilize H.Q site Biz

iNET to reach SaaS Cloud for branch C. currently reaching SaaS Cloud directly.

Which role must be assigned to devices at both sites in vManage Cloud Express for this solution to work?

- A. H.Q to be added as Gateway and Branch as DIA.
- B. Branch to be added as DIA and H.Q as Client Site.
- C. Branch to be added as Client Sites and H.Q as DIA.
- D. H.Q to be added as Gateway and Branch as Client Site.

Answer: C

NEW QUESTION # 195

Which routing protocol is used to exchange control plane information between vSmart controllers and WAN Edge routers in the Cisco SD-WAN secure extensible network?

- A. BGP
- B. OSPF
- C. OMP
- D. BFD

Answer: C

NEW QUESTION # 196
