## Reliable Exam CLT Pass4sure Aids You to Evacuate All Your Uncertainties before Purchase

Our CLT study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the CLT Study Materials and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment.

## MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Hazardous material must be shipped in \_\_\_\_ containers with proper labeling.

- A. FMCSA-approved
- **B. USDOT-approved**
- C. HAZCOM-approved
- D. PHMSA-approved

**Answer: B**

Explanation:

CLT teaches that hazmat packaging/containers must comply with U.S. DOT hazardous materials regulations (administered by

PHMSA). In practice, training materials commonly reference "USDOT-approved" packaging that meets performance standards (e.g., UN specification packaging), correct closure instructions, and required markings/labels. FMCSA governs motor carrier operations, HAZCOM is a communication standard, and PHMSA is the DOT agency-but the compliance umbrella is USDOT hazmat rules.

#### NEW QUESTION # 42

During the receiving process, after the materials are staged, all of the following are completed by the material handler EXCEPT

- A. perform housekeeping in the staging area
- B. check the materials against the order and Bill of Lading
- C. inspect material for damage
- D. check quantities

**Answer: A**

Explanation:

The CLT "Product Receiving" activities outline that after materials are staged, handlers verify shipment accuracy, quantity, and condition against the purchase order and Bill of Lading. Inspection ensures quality control and discrepancy identification. While housekeeping is important for safety, it is not a functional step in the receiving verification process. The purpose of staging is to separate materials by order or destination, allowing organized inspection and documentation. CLT emphasizes accuracy and documentation at this stage, as errors during receiving propagate through the inventory system. Housekeeping tasks occur after receiving completion to maintain workplace order but are not part of the inspection checklist.

#### NEW QUESTION # 43

What is used for automatic item identification?

- A. RFID
- B. shape recognition
- C. label guns
- D. conveyor

**Answer: A**

Explanation:

Radio Frequency Identification (RFID) is the technology used for automatic item identification. The CLT "Inventory Control and Tracking Systems" module defines RFID as an advanced data capture method using radio signals to read embedded microchips (tags) without direct line-of-sight. RFID enables real-time tracking of inventory movement through gates, conveyors, or storage zones. Compared to barcodes, RFID can scan multiple items simultaneously and store more data per tag. This improves accuracy, reduces manual scanning, and supports automation within Warehouse Management Systems (WMS). CLT emphasizes that RFID enhances visibility, reduces shrinkage, and speeds up cycle counts. Proper use requires integration with database systems and adherence to data security protocols.

#### NEW QUESTION # 44

One of the functions during the receiving process is to

- A. determine the inbound shipping carrier
- B. determine the amount of material to be purchased
- C. match the packing list quantity to the purchase order
- D. match the packing list to the invoice

**Answer: C**

Explanation:

The CLT "Receive products" activities require verifying shipments against ordering documents. The packing list (or ASN detail) is checked against the purchase order to confirm that the items, quantities, and units of measure received match what was ordered and authorized. This verification step underpins inventory and financial accuracy and precedes acceptance, staging, and putaway. Matching a packing list to an invoice is an accounting three-way match task, not a receiving floor responsibility. Selecting carriers or determining how much to purchase are procurement/transport decisions made before arrival. By aligning received quantities with the

PO, the warehouse ensures correct receipts, initiates discrepancy handling for shortages/overages, and updates inventory records accordingly.

#### NEW QUESTION # 45

Which inventory control method has caused the definition of material handling to evolve away from "moving material" to providing all the "rights"?

- A. LIFO inventory control
- **B. Just-In-Time inventory control**
- C. ABC inventory control
- D. FIFO inventory control

**Answer: B**

Explanation:

JIT emphasizes delivering the right material, in the right quantity, to the right place, at the right time, with the right quality-minimizing waste and inventory. CLT notes how JIT shifts material handling from simple movement to synchronized flow and point-of-use delivery, often using kanban signals and small, frequent replenishments to support lean operations.
