We strongly recommend that you should prepare your Plat-Con-201 Exam PDF with our test engine before taking real exam.

Salesforce Certified Omnistudio Consultant Sample Questions (Q16-Q21):

NEW QUESTION # 16

A Salesforce Omnistudio Consultant is tasked with integrating Salesforce Knowledge into an Omniscrypt to allow users to search

and view Salesforce Knowledge Articles.

What must be enabled in the organization for the consultant to activate Knowledge in an Omniscript?

- **A. Salesforce Knowledge**
- B. Salesforce Classic
- C. Omniscript Designer
- D. Salesforce Lightning

Answer: A

Explanation:

* Salesforce Knowledge (A) must be enabled in the org to allow OmniScripts to retrieve and display Knowledge Articles.

* Once Salesforce Knowledge is activated, OmniScripts can fetch Knowledge Articles using DataRaptors or Integration Procedures and display search results dynamically based on user inputs.

* B. OmniScript Designer - This is a tool for building OmniScripts but does not enable Knowledge functionality.

* C. Salesforce Classic - OmniScripts are designed for Salesforce Lightning, and enabling Classic is not required.

* D. Salesforce Lightning - While OmniStudio works in Lightning, enabling Salesforce Lightning is not what activates Knowledge in OmniScripts.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* Enabling Salesforce Knowledge

* Using Salesforce Knowledge in OmniScripts

NEW QUESTION # 17

which two of the following use cases are best solved using Calculation Procedures & Matrices?

Choose 2 answers

- A. To determine the list of products to display to a customer
- B. To retrieve text data and convert it to an integer
- **C. To apply the correct factor when determining a cost**
- **D. To return output that is calculated differently based on the date**

Answer: C,D

Explanation:

The two use cases that are best solved using Calculation Procedures & Matrices are: To apply the correct factor when determining a cost and To return output that is calculated differently based on the date. A Calculation Procedure is a tool that can perform complex calculations based on multiple input and output variables. A Calculation Matrix is a tool that can perform complex calculations based on multiple input variables and output values within groups. The consultant can use Calculation Procedures & Matrices to solve these use cases, because they involve applying rules and formulas to different data values and scenarios

NEW QUESTION # 18

A consultant wants to proceed with a FlexCard canvas design that will display data from a legacy billing system. The legacy billing system is being extended to add a SOAP endpoint that will allow for the data to be retrieved in XML format. However, the endpoint is not ready yet.

Which data source should the team use to make progress on the design?

- **A. Integration Procedures**
- B. Apex REST
- C. DataRaptor
- D. Apex Remote

Answer: A

NEW QUESTION # 19

which Action element redirects the user outside an LWC OmniScript?

- A. Post to Object
- B. Response

- C. Navigate
- D. Done

Answer: C

Explanation:

The Action element that redirects the user outside an LWC OmniScript is Navigate. Navigate allows the user to navigate to a URL or a Salesforce record or page. Response, Done, and Post to Object are not Action elements, but End elements that terminate an OmniScript.

NEW QUESTION # 20

A consultant is working with a client who wants to display specific account information on a Flexcard.

The client wants to include account status, priority level, creation date, and company logo. They also want to include actions such as closing a case, opening a new case, or creating a task.

What is the best approach for the consultant to meet the client's requirements?

- A. Use the Flexcard Designer to create a Flexcard, adding the necessary fields and actions.
- B. Use Omniscripts to ,, script that display .. required information
- C. Use Integration Procedures to integrate the necessary data
- D. Use Data Mappers to transfer and transform the necessary data.

Answer: A

Explanation:

* FlexCards (B) - FlexCards are the best choice because they are designed to display account-related information such as status, priority level, creation date, and company logo while also allowing the inclusion of actions (e.g., closing a case, opening a new case, creating a task).

* FlexCards provide a user-friendly UI with clickable actions that can trigger OmniScripts or Integration Procedures to process user interactions.

* A. Use OmniScripts - OmniScripts are for step-by-step guided interactions but are not primarily used for displaying static account information.

* C. Use Integration Procedures - Integration Procedures fetch and transform data but do not provide a user interface. They can be used within FlexCards but are not the solution on their own.

* D. Use Data Mappers - Salesforce does not have a native "Data Mappers" tool; data transformation is handled by DataRaptors or Integration Procedures.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* FlexCards Overview

* Configuring Actions in FlexCards

NEW QUESTION # 21

.....

Each candidate will enjoy one-year free update after purchased our Plat-Con-201 dumps collection. We will send you the latest Plat-Con-201 dumps pdf to your email immediately once we have any updating about the certification exam. And there are free demo of Plat-Con-201 Exam Questions in our website for your reference. Our Salesforce exam torrent is the best partner for your exam preparation.
