DSCI Certified Privacy Lead Assessor DCPLA certification Sample

Questions (Q93-Q98):

NEW QUESTION # 93

Categorize the following statements as: Visibility/ Capability /Enforcement /Demonstration Problems
"The network is unable to restrict unwanted external connections carrying sensitive information."

- A. Enforcement
- B. Visibility
- C. Demonstration
- D. Capability

Answer: D

NEW QUESTION # 94

The assessor organization can issue the DSCI certification to the assessee organization if it is satisfied with the assessment outcome.

- A. False
- B. True

Answer: A

Explanation:
The DAF#P explicitly states that only DSCI has the authority to issue privacy certification. The assessor organization conducts the assessment and submits the findings and recommendation, but the final certification decision rests solely with DSCI based on its review process.

NEW QUESTION # 95

A newly appointed Data Protection Officer is reviewing the organization's existing privacy policy. Which of the following would be the most critical factor for the review process?

- A. Awareness of the business units about the privacy policy
- B. Privacy policies of industry peers
- C. Foreseeable challenges in the effective implementation of the policy
- D. Changes in the legal/regulatory regime

Answer: D

Explanation:
While several factors can influence the review of a privacy policy, changes in the legal or regulatory environment are the most critical. The DSCI Privacy Framework underscores that privacy policies must be aligned with applicable laws and standards.
A change in the legal/regulatory regime may necessitate revisions to ensure ongoing compliance and avoid legal risks. Internal awareness and peer practices are secondary considerations in comparison.

NEW QUESTION # 96

Classify the following scenario as major or minor non-conformity.
"The organization has a very mature information security policy. Lately, the organization has realized the need to focus on protection of PI. A formal PI identification exercise was done for this purpose and a mapping of PI and security controls was done. The organization has also put in place data masking technology in certain functions where the SPI was accessed by employees of a third party. However, the organization is yet to include PI specifically in its risk assessment exercise, incident management, testing, data classification and security architecture programs."

- A. Both MajorandMinor
- B. Minor
- C. Major
- D. None of the above

Answer: C

Explanation:
According to DAF#P, major non-conformities represent significant deviations that impact the effectiveness of the privacy program.
In this case:
* The absence of PI considerations in core governance areas such as risk assessment, security architecture, incident response, and classification constitutes a critical oversight.
* Despite some efforts (data masking and identification), the lack of integration into foundational programs denotes a systemic issue.
Hence, this constitutes a major non-conformity under the DSCI certification framework.

NEW QUESTION # 97
Which of the following factors is least likely to be considered while implementing or augmenting data security solution for privacy protection?

- A. Training and awareness program for third party organizations
- B. Information security infrastructure up-gradation in the organization
- C. Classification of data type and its usage by various functions in the organization
- D. Security controls deployment at the database level

Answer: A
