## **SC-401 Reliable Exam Materials - SC-401 Reliable Braindumps Sheet**

Our evaluation system for SC-401 test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our SC-401 test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the SC-401 Exam Torrent. You only need to spend 20 to 30 hours on practicing and consolidating of our SC-401 learning material, you will have a good result. After years of development practice, our SC-401 test torrent is absolutely the best. You will embrace a better future if you choose our SC-401 exam materials.

### **Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q211-Q216):**

#### **NEW QUESTION # 211**

##### **HOTSPOT**

You plan to create a custom sensitive information type that will use Exact Data Match (EDM).

You need to identify what to upload to Microsoft 365, and which tool to use for the upload.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

##### **Answer:**

Explanation:

Explanation:

EDM does not store raw data; instead, it requires hashed versions of sensitive data for privacy and security.

To upload the hashed data, Microsoft provides the EDM upload agent. This ensures that the data is securely processed and recognized by the EDM service in Microsoft 365.

#### **NEW QUESTION # 212**

You have a Microsoft 365 E5 subscription that contains two Microsoft 365 groups named Group1 and Group2. Both groups use the following resources:

\*A group mailbox

\*Microsoft Teams channel messages

\*A Microsoft SharePoint Online teams site

You create the objects shown in the following table.

To which resources will AutoApply1 and Retention1 be applied? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

##### **Answer:**

Explanation:

#### **NEW QUESTION # 213**

##### **HOTSPOT**

You plan to create a custom sensitive information type that will use Exact Data Match (EDM).

You need to identify what to upload to Microsoft 365, and which tool to use for the upload.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

EDM does not store raw data; instead, it requires hashed versions of sensitive data for privacy and security.

To upload the hashed data, Microsoft provides the EDM upload agent. This ensures that the data is securely processed and recognized by the EDM service in Microsoft 365.

**NEW QUESTION # 214**

You have a Microsoft 365 subscription. Auditing is enabled.

A user named User1 is a member of a dynamic security group named Group1.

You discover that User1 is no longer a member of Group1.

You need to search the audit log to identify why User1 was removed from Group1.

Which two activities should you use in the search? To answer, select the appropriate activities in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

**Step 1 - Scenario**

A user named User1 was a member of a dynamic security group (Group1).

User1 is no longer a member of that group.

You need to determine why User1 was removed by searching the audit log.

**Step 2 - How group membership changes are logged in Microsoft 365 audit logs** Microsoft 365 audit logs record group membership activities in Azure AD. The most relevant activities for a user disappearing from a group are:

Removed member from group - Directly indicates that a user was removed from a group.

Updated group - Logged when group properties or membership rules (for dynamic groups) are modified. If Group1 is a dynamic group, changes to membership rules could have caused User1 to no longer qualify, and this would appear as an Updated group event.

**Step 3 - Why not other options**

Deleted user / Deleted group: Would mean the entire user or group object was deleted, not just removal.

Changed user password, Reset user password, Set license properties, Changed user license: These are account- related, not group membership-related.

Added member to group: The opposite action.

**Step 4 - Microsoft Reference**

From Microsoft documentation:

Audit logs include events such as when a member is added or removed from a group, and when group properties or membership rules are updated.

Reference: Search the audit log in the Microsoft Purview compliance portal

**NEW QUESTION # 215**

You have a Microsoft 365 E5 subscription that contains a data loss prevention (DLP) policy named DLP1. DLP1 contains the DLP rules shown in the table.

You need to ensure that when a document matches all the rules, users will see Tip 2.

What should you change?

- A. the priority setting of Rule2 to 2
- B. the priority setting of Rule2 to 0
- C. the if there's a match for this rule, stop processing additional DLP policies and rules setting for Rule3 to Enabled
- D. the priority setting of Rule3 and Rule4 to 0

**Answer: B**

Explanation:

Make Rule2 have the highest priority, lowest value of 0, to ensure it will be processed.

Note: The Priority parameter specifies a priority value for the policy that determines the order of policy processing. A lower integer value indicates a higher priority, the value 0 is the highest priority.
