

NS0-901 Official Cert Guide, Reliable NS0-901 Test Question

Mock tests are outstandingly worked for you to make heads or tails of your goofs while giving NS0-901 Exam. Network Appliance NS0-901 gives practice material that is as per the legitimate Network Appliance NS0-901 exam. A free demo is other than open to test the parts prior to buying the entire thing for the NS0-901 Exam. You can pass Network Appliance NS0-901 certification on the off chance that you use Network Appliance NS0-901 Dumps material.

Our NS0-901 learning quiz can be downloaded for free trial before purchase, which allows you to understand our sample questions and software usage. It will also enable you to make a decision based on your own needs. And we have organized a group of professionals to revise our NS0-901 Preparation materials, according to the examination status and trend changes. The simple and easy-to-understand language of NS0-901 exam questions frees any learner from studying difficulties.

Reliable NS0-901 Test Question - NS0-901 Reliable Study Questions

Our NS0-901 actual exam can also broaden your horizon; activate your potential to deal with difficulties. You will not only get desirable goal with our NS0-901 exam practice but with superior outcomes that others who dare not imagine. The scarcity of efficient resource impaired many customers' chance of winning. So choosing materials blindly is dangerous to your exam and you

must choose reliable and qualities like our NS0-901 simulating questions.

Network Appliance NetApp Certified AI Expert Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

An architect is designing a cost-optimized storage solution for a large AI environment that has two distinct data temperature profiles:

1. Hot Data (200 TB): Actively used training sets and models requiring all-flash performance.
2. Cold Data (2 PB): Inactive, archived datasets and old model versions that must remain online but are infrequently accessed.

The solution must automatically manage data placement based on activity, without requiring manual intervention or changes to file paths. The environment consists of an on-premises data center and a public cloud account.

Which combination of NetApp technologies provides the most complete and cost-effective solution? (Select all that apply.)

- A. Deploy a NetApp AFF A-Series system on-premises to serve as the high-performance tier for the hot data.
- B. Use NetApp FabricPool to automatically and transparently tier cold data blocks from the AFF A- Series to the StorageGRID system.
- C. Use NetApp SnapMirror to create a full copy of the 2 PB of cold data on the AFF A-Series for faster access if needed.
- D. Deploy a single, large Cloud Volumes ONTAP instance to hold both the hot and cold data tiers.
- E. Deploy NetApp StorageGRID on-premises to serve as a cost-effective capacity tier for the cold data.
- F. Use NetApp XCP to manually script the daily movement of cold files from the AFF system to StorageGRID.

Answer: A,B,E

NEW QUESTION # 76

The architect needs to design an efficient data flow to move curated training sets from the central StorageGRID data lake to the high-performance NetApp ASA system used by the AI cluster. The process must be manageable from a single interface and should be automatable. Which two NetApp technologies should be used to implement this data pipeline stage? (Choose 2.)

- A. A manual copy process using an S3 client on a bastion host.
- B. NetApp SnapMirror to replicate data from the StorageGRID object store to the ASA's file system.
- C. NetApp BlueXP copy and sync service to create and manage the data synchronization relationship between the S3 source and the NFS/CIFS destination.
- D. NetApp FabricPool to automatically tier the data from StorageGRID to the ASA.
- E. A custom Python script using the NetApp DataOps Toolkit to trigger the data movement.

Answer: C,E

NEW QUESTION # 77

A data science team reports that their Jupyter notebook pod, which was previously working, is now failing to start. The pod's status is 'CrashLoopBackOff'. An MLOps engineer investigates and finds that the pod's PersistentVolumeClaim (PVC) is bound, but the pod logs show a "Permission denied" error when trying to write to its '/data' mount point.

The engineer checks the Trident backend configuration associated with the pod's StorageClass:

```
apiVersion: trident.netapp.io/v1
```

```
kind: TridentBackendConfig
```

```
metadata:
```

```
name: ontap-nas-eco
```

```
spec:
```

```
version: 1
```

```
storageDriverName: ontap-nas
```

```
managementLIF: 10.10.20.5
```

```
dataLIF: 10.10.20.10
```

```
svm: svm-prod-ds
```

```
exportPolicy: read-only-policy
```

What is the most likely cause of the "Permission denied" error?

- A. The Trident backend is configured to use an export policy ('read-only-policy') that does not grant write permissions to the Kubernetes nodes.
- B. The 'storageDriverName' should be 'ontap-san' for all AI workloads.

- C. The 'dataLIF' is configured incorrectly and is unreachable from the Kubernetes nodes.
- D. The Kubernetes pod has an invalid 'securityContext' that prevents it from writing to any volume.

Answer: A

NEW QUESTION # 78

An AI team is embarking on a project to train a new, large-scale computer vision model from scratch. The lead architect emphasizes that the success of the project depends on four fundamental inputs that must be available and managed throughout the training process. Which of the following are the four essential requirements for model generation?

- A. A pre-trained model, a validation set, an inference engine, and a cloud provider.
- B. A data lake, a data warehouse, a data pipeline, and a data mart.
- C. A project manager, a data scientist, a software engineer, and a budget.
- **D. Data, code, compute, and time.**

Answer: D

NEW QUESTION # 79

A pharmaceutical company is creating a "digital twin" of its manufacturing process. This involves running complex simulations (an HPC workload) that generate massive datasets.

The company wants to use this data immediately for two other purposes:

1. Analytics: Business analysts need to run complex queries on the simulation output using tools like Spark.
2. AI Training: Data scientists need to use the same output as a training set for a predictive maintenance model.

The company wants to avoid creating separate data silos for each workload.

Which two NetApp technologies are best suited for building a unified data lake that can efficiently serve all three workloads (HPC, Analytics, AI)? (Choose 2.)

- A. NetApp Autonomous Ransomware Protection to secure the data from modification.
- B. NetApp SnapCenter to create application-consistent backups of the data.
- **C. NetApp StorageGRID to provide a scalable, S3-native object store that integrates directly with modern analytics platforms like Spark.**
- D. NetApp Keystone to provide a flexible, pay-as-you-go consumption model for the infrastructure.
- **E. NetApp ONTAP with FlexGroup volumes to provide high-throughput, parallel NFS access for the HPC and AI training workloads.**

Answer: C,E

NEW QUESTION # 80

.....

One advantage is that if you use our NS0-901 practice questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the NS0-901 real exam anytime and anywhere. It means that it can support offline practicing. And our NS0-901 learning braindumps are easy to understand for the questions and answers are carefully compiled by the professionals.

Reliable NS0-901 Test Question: https://www.bootcamppdf.com/NS0-901_exam-dumps.html

Network Appliance NS0-901 Official Cert Guide You will receive a registration code and download instructions via email, We've helped countless examinees pass NS0-901 exam, so we hope you can realize the benefits of our software that bring to you, Thousands of aspirants have passed their Network Appliance NS0-901 exam, and they all got help from our NS0-901 NetApp Certified AI Expert Exam updated exam dumps, Network Appliance NS0-901 Official Cert Guide First of all, our system is very advanced and will not let your information leak out.

If a flight gets canceled, this app helps you quickly find an alternative NS0-901 flight online, With these conditions, you will be able to stand out from the interview and get the job you've been waiting for.
