Exam独学書籍

献身と熱意を持ってAssociate-Cloud-Engineerガイド資料を段階的に学習する場合、Google必死に試験に合格することを保証します。学習資料の権威あるプロバイダーとして、潜在顧客からより多くの注目を集めるために、常に同等のテストと比較してAssociate-Cloud-Engineer模擬テストの高い合格率を追求しています。それ以外の場合、残念ながら、Associate-Cloud-Engineer学習教材で試験に合格しなかった場合、製品費用はすぐに全額返金されます。Associate-Cloud-Engineer研究トレントは、高い合格率でより魅力的で素晴らしいものになります。

Google Associate-Cloud-Engineer認定は、クラウドコンピューティング分野でキャリアを進めたい個人にとって貴重な資格です。この認定は、個人がGoogle Cloud Platformで作業するために必要なスキルと知識を雇用主に証明するものです。また、混雑した求人市場で個人を差別化するための素晴らしい方法でもあります。

Google Associate Cloud Engineer Exam 認定 Associate-Cloud-Engineer 試験問題 (Q79-Q84):

質問 # 79

Your company has a Google Cloud Platform project that uses BigQuery for data warehousing. Your data science team changes frequently and has few members. You need to allow members of this team to perform queries. You want to follow Google-recommended practices. What should you do?

- A. 1. Create a dedicated Google group in Cloud Identity.
2. Add each data scientist's user account to the group.
3. Assign the BigQuery jobUser role to the group.
- B. 1. Create an IAM entry for each data scientist's user account.
2. Assign the BigQuery dataViewer user role to the group.
- C. 1. Create a dedicated Google group in Cloud Identity.
2. Add each data scientist's user account to the group.
3. Assign the BigQuery dataViewer user role to the group.
- D. 1. Create an IAM entry for each data scientist's user account.
2. Assign the BigQuery jobUser role to the group.

正解: A

解説:

Provides permissions to run jobs, including queries, within the project. This role can check the existence of all jobs, enumerate their own jobs, and cancel their own jobs.

質問 # 80

The sales team has a project named Sales Data Digest that has the ID acme-data-digest. You need to set up similar Google Cloud resources for the marketing team but their resources must be organized independently of the sales team. What should you do?

- A. Create a new project named Meeting Data Digest and use the ID acme-data-digest. Grant the Project Editor role to the Marketing team.
- B. Grant the Project Editor role to the Marketing team for acme data digest.
- C. Create a Project Lien on acme-data-digest and then grant the Project Editor role to the Marketing team.
- D. Create another project with the ID acme-marketing-data-digest for the Marketing team and deploy the resources there.

正解: D

質問 # 81

You are hosting an application from Compute Engine virtual machines (VMs) in us-central1-a. You want to adjust your design to support the failure of a single Compute Engine zone, eliminate downtime, and minimize cost. What should you do?

- A. - Create a Managed Instance Group and specify us-central1-a as the zone.
-Configure the Health Check with a short Health Interval.
- B. - Create an HTTP(S) Load Balancer.
-Create one or more global forwarding rules to direct traffic to your VMs.

- C. - Perform regular backups of your application.
-Create a Cloud Monitoring Alert and be notified if your application becomes unavailable.
-Restore from backups when notified.
- D. - Create Compute Engine resources in us-central1-b.
-Balance the load across both us-central1-a and us-central1-b.

正解: D

解説:

Choosing a region and zone You choose which region or zone hosts your resources, which controls where your data is stored and used. Choosing a region and zone is important for several reasons:

Handling failures

Distribute your resources across multiple zones and regions to tolerate outages. Google designs zones to be independent from each other: a zone usually has power, cooling, networking, and control planes that are isolated from other zones, and most single failure events will affect only a single zone. Thus, if a zone becomes unavailable, you can transfer traffic to another zone in the same region to keep your services running.

Similarly, if a region experiences any disturbances, you should have backup services running in a different region. For more information about distributing your resources and designing a robust system, see Designing Robust Systems. Decreased network latency To decrease network latency, you might want to choose a region or zone that is close to your point of service.https://cloud.google.com/compute/docs/regions-zones#choosing_a_region_and_zone

質問 # 82

You need to update a deployment in Deployment Manager without any resource downtime in the deployment. Which command should you use?

- A. `gcloud deployment-manager deployments update --config <deployment-config-path>`
- B. `gcloud deployment-manager resources create --config <deployment-config-path>`
- C. `gcloud deployment-manager deployments create --config <deployment-config-path>`
- D. `gcloud deployment-manager resources update --config <deployment-config-path>`

正解: A

解説:

質問 # 83

The DevOps group in your organization needs full control of Compute Engine resources in your development project. However, they should not have permission to create or update any other resources in the project. You want to follow Google's recommendations for setting permissions for the DevOps group. What should you do?

- A. Grant the basic role `roles/editor` to the DevOps group.
- B. Create an IAM policy and grant all `compute.instanceAdmin` permissions to the policy. Attach the policy to the DevOps group.
- C. Grant the basic role `roles/viewer` and the predefined role `roles/compute.admin` to the DevOps group.
- D. Create a custom role at the folder level and grant all `compute.instanceAdmin` permissions to the role. Grant the custom role to the DevOps group.

正解: C
