

CIPP-E New Braindumps Pdf - Certification CIPP-E Cost

2026 Latest Free4Dump CIPP-E PDF Dumps and CIPP-E Exam Engine Free Share: <https://drive.google.com/open?id=1R5Yzd9MRvg74wOze-TEUgj3-MeQZulx4>

There is no denying that no exam is easy because it means a lot of consumption of time and effort. Especially for the upcoming CIPP-E exam, although a large number of people to take the exam every year, only a part of them can pass. If you are also worried about the exam at this moment, please take a look at our CIPP-E Study Materials which have become the leader in this career on the market. And if you have a try on our CIPP-E preparation quiz, you will be satisfied.

Exam Details

The exam for the CIPP/E certification is made up of 90 questions, 75 of which are scored. There are two types of questions that appear in this test: answer options as well as cases. The examinees are given 150 minutes of allocated time to complete all these questions.

All the IAPP certification exams are computer-based and are delivered at the authorized testing centers worldwide. It is impossible to sit for the CIPP/E exam online. The IAPP tests are administered through the Pearson VUE centers. The exam can be also taken via OnVUE, the Pearson VUE's remote online proctoring platform. To register for the test, you need to log into the official website, purchase your exam and schedule it at the most convenient testing center. You can schedule your exam up to 90 days in advance.

Just like all the IAPP exams, the CIPP/E certification test is delivered in the English language. In addition, the applicants can take it in French and German. As for the price, you will be required to pay the registration fee of \$550 for your first attempt. If you fail to pass your exam on your first try, you will have to wait for at least 30 days to have a subsequent attempt. The students who retake their test are allowed to try again at a reduced fee of \$375.

To pass the exam and get certified, you need to achieve the passing score of 300 marks on a scale of 100-500. The candidates who successfully complete their CIPP/E test will be awarded the relevant digital certificate that will be emailed to them within three weeks after passing the exam. The CIPP/E certification is only valid for 2 years. After the expiration of this period, you will have to undergo the recertification process. This includes paying the maintenance fee of \$250 and submitting at least 20 hours of Continuing Privacy Education (CPE). The CPE units can be earned by attending various educational events, programs, publishing written materials, making presentations and instruction courses, or by performing any other activity related to privacy & security.

100% Pass Latest IAPP - CIPP-E - Certified Information Privacy Professional/Europe (CIPP/E) New Braindumps Pdf

The CIPP-E certification is ideal for individuals who work with personal data in the EU, including privacy professionals, data protection officers, lawyers, consultants, and IT professionals. Certified Information Privacy Professional/Europe (CIPP/E) certification signifies that an individual is capable of providing advice and guidance on data protection compliance to organizations operating within the EU. Additionally, the CIPP-E Certification is a valuable asset for individuals who are looking to advance their career in the field of data protection and privacy. It is a testament to an individual's commitment to privacy and demonstrates their expertise and competence in the field.

IAPP Certified Information Privacy Professional/Europe (CIPP/E) Sample Questions (Q276-Q281):

NEW QUESTION # 276

Which of the following is NOT an explicit right granted to data subjects under the GDPR?

- A. The right to request the deletion of data a controller holds about them
- B. The right to request restriction of processing of personal data, under certain scenarios.
- C. The right to opt-out of the sale of their personal data to third parties.
- **D. The right to request access to the personal data a controller holds about them.**

Answer: D

NEW QUESTION # 277

What is the consequence if a processor makes an independent decision regarding the purposes and means of processing it carries out on behalf of a controller?

- A. The processor will be liable to pay compensation to affected data subjects
- B. The controller will be liable to pay an administrative fine
- **C. The processor will be considered to be a controller in respect of the processing concerned**
- D. The controller will be required to demonstrate that the unauthorized processing negatively affected one or more of the parties involved

Answer: C

Explanation:

According to the UK GDPR, a processor is a natural or legal person, public authority, agency or other body which processes personal data on behalf of the controller¹. A processor must act only on the documented instructions of the controller and must not process the data for its own purposes or in a way that is incompatible with the controller's purposes¹. If a processor makes an independent decision regarding the purposes and means of processing it carries out on behalf of a controller, it will be considered to be a controller in respect of that processing and will be subject to the same obligations and liabilities as a controller under the UK GDPR¹. This means that the processor will have to comply with the data protection principles, ensure the rights of data subjects, implement appropriate technical and organisational measures, report data breaches, conduct data protection impact assessments, appoint a data protection officer if required, and cooperate with the supervisory authority¹. The processor will also be exposed to the risk of administrative fines, compensation claims, and reputational damage¹. References: ¹

NEW QUESTION # 278

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

Which of the following BEST describes the relationship between Liem, EcoMick and JaphSoft?

- A. JaphSoft is the sole processor because it processes personal data on behalf of its clients.
- **B. Liem and EcoMick are joint controllers because they carry out joint marketing activities.**
- C. Liem is a controller and EcoMick is a processor because Liem provides specific instructions regarding how the marketing campaigns should be rolled out.
- D. EcoMick and JaphSoft are a controller and Liem is a processor because EcoMick is sharing its marketing data with Liem for contacts in Europe.

Answer: B

Explanation:

According to the UK GDPR, consent means "any freely given, specific, informed and unambiguous indication of the data subject's wishes by which he or she, by a statement or by a clear affirmative action, signifies agreement to the processing of personal data relating to him or her" 1. One of the requirements for consent to be informed is that the data subject should be aware of the identity of the controller who is processing the personal data 2. In this scenario, Ms. Iman only gave consent to Liem to process her personal data for marketing purposes, but she was not informed that JaphSoft, a third-party controller, would also access and process her personal data. Therefore, her consent was not valid in regard to JaphSoft, as she did not know who was processing her personal data and for what purposes. Reference:

NEW QUESTION # 279

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's questions on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and

speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a question, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's question. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this. In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

To ensure GDPR compliance, what should be the company's position on the issue of consent?

- A. Written authorization attesting to the responsible use of children's data would need to be obtained from the supervisory authority.
- B. Consent for data collection is implied through the parent's purchase of the action figure for the child.
- C. The child, as the user of the action figure, can provide consent himself, as long as no information is shared for marketing purposes.
- **D. Parental consent for a child's use of the action figures would have to be obtained before any data could be collected.**

Answer: D

NEW QUESTION # 280

Which of the following would require designating a data protection officer?

- A. The core activities of the controller or processor consist of processing operations of financial information or information relating to children.
- B. Processing is carried out for the purpose of providing for-profit goods or services to individuals in the EU.
- **C. The core activities of the controller or processor consist of processing operations that require systematic monitoring of data subjects on a large scale.**
- D. Processing is carried out by an organization employing 250 persons or more.

Answer: C
