Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q59-Q64):

NEW QUESTION # 59
An Administrator sets up a new store and imports the product catalog. While verifying the store display, the Administrator notices a "Products" category that the Store Manager asked to not display.
How can the Administrator fix this?

- A. Enable the Hide in Menu attribute.
- B. Disable the Show in Menu attribute.
- C. Enable the Do Not Display in Menu attribute.
- D. Disable the Display in Menu attribute.

Answer: D

Explanation:
To prevent a "Products" category from being displayed as requested by the Store Manager, the Administrator should Disable the Display in Menu attribute (A). This action will remove the category from the storefront navigation menu, ensuring it does not appear to store visitors. This approach allows for flexibility in managing how products and categories are presented on the storefront, aligning with business requirements and preferences. The other options, such as Enable the Do Not Display in Menu attribute (B), Disable the Show in Menu attribute (C), and Enable the Hide in Menu attribute (D), are not standard attributes in Salesforce B2B Commerce for controlling menu display.

NEW QUESTION # 60
An Administrator needs to set up a variation product for the first time in a new org and prepare the search index. 26m 164 Before creating the product, in which two places does the Administrator need to go to establish a variation attribute structure?

- A. Object Manager
- B. Commerce Setup
- C. Product Workspace
- D. Catalogs

Answer: A,B

Explanation:
Before creating a variation product and preparing the search index, the Administrator needs to establish a variation attribute structure in A. Commerce Setup to configure the overall commerce settings, including attributes, and in D. Object Manager to customize the Product object and its fields, including setting up specific attributes for variations.

NEW QUESTION # 61
An Administrator has completed setting up CMS workspace with images for one of their B2B Commerce sites. However, when trying to add an image to the Product record, the Administrator noticed there are no images available to select.
What could be causing this to happen?

- A. The Content admin permission set was not assigned to the Administrator in Setup.
- B. CMS channel was never configured to connect the CMS workspace to the store.
- C. The CMS workspace is still in draft status.
- D. The Administrator was not added as a contributor in the Store Administration page.

Answer: B

Explanation:
If an Administrator is unable to select images for a Product record despite having set up a CMS workspace, it could be because D. CMS channel was never configured to connect the CMS workspace to the store. Without this connection, content from the CMS workspace, including images, is not available for use within the store.

NEW QUESTION # 62

What happens if a language is deleted from Experience Builder?

- A. The content is deleted
- B. The content is no longer visible but is not deleted
- C. The content moves to the recycle bin
- D. The content is no longer visible and it is deleted

Answer: B

Explanation:

If a language is deleted from Experience Builder, C. The content is no longer visible but is not deleted. This means that while the content associated with that language will not be displayed in the Experience Builder or the storefront, it remains in the system. This allows for the possibility of re-adding the language at a later time and restoring the visibility of the content without having to recreate it.

NEW QUESTION # 63

What are two advantages of having Commerce and CRM data together?

- A. Reduced number of integrations with other systems
- B. Duplication of account information
- C. Personalized experience based on a history of interactions
- D. Multiple logins to interact with each system

Answer: A,C

Explanation:

The advantages of having Commerce and CRM data together include A. Personalized experience based on a history of interactions, which allows for tailored shopping experiences based on the customer's previous engagements, and C. Reduced number of integrations with other systems, simplifying the architecture and reducing the potential points of failure or data inconsistencies.

NEW QUESTION # 64

......
