We also hired a dedicated staff to constantly update AZ-104 exam torrent. With AZ-104 exam guide, you do not need to spend money on buying any other materials. During your preparation, AZ-104 exam torrent will accompany you to the end.

Microsoft Azure Administrator Sample Questions (Q14-Q19):

NEW QUESTION # 14

You create an Azure Storage account named contosostorage.

You plan to create a file share named data.

Users need to map a drive to the data file share from home computers that run Windows 10.

Which port should be open between the home computers and the data file share?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:
Explanation

Ensure port 445 is open: The SMB protocol requires TCP port 445 to be open; connections will fail if port 445 is blocked.
References: <https://docs.microsoft.com/en-us/azure/storage/files/storage-how-to-use-files-windows>

NEW QUESTION # 15

You have an Azure subscription named Subscription1 that contains virtual network named VNet1. VNet1 is in a resource group named RG1. A user named User1 has the following roles for Subscription1:

- * Reader
- * Security Admin
- * Security Reader

You need to ensure that User1 can assign the Reader role for VNet1 to other users. What should you do?

- A. Remove User1 from the Security Reader and Reader roles for Subscription1. Assign User1 the Contributor role for Subscription1.
- **B. Assign User1 the Owner role for VNet1.**
- C. Remove User1 from the Security Reader and Reader roles for Subscription1.
- D. Remove User1 from the Security Reader role for Subscription1. Assign User1 the Contributor role for RG1.

Answer: B

NEW QUESTION # 16

You need to implement Role1.

Which command should you run before you create Role1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

NEW QUESTION # 17

You have an Azure Storage account named storage1 that uses Azure Blob storage and Azure File storage.

You need to use AzCopy to copy data to the blob storage and file storage in storage1.

Which authentication method should you use for each type of storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the AzCopy authentication selection interface. It has two main sections: 'Blob storage:' and 'File storage:'. Each section contains a dropdown menu with five options. The options are: 'Azure Active Directory (Azure AD) only', 'Shared access signatures (SAS) only', 'Access keys and shared access signatures (SAS) only', 'Azure Active Directory (Azure AD) and shared access signatures (SAS) only', and 'Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)'. The 'File storage:' section is partially obscured by the Microsoft logo watermark.

| Storage Type | Authentication Method |
|---------------|--|
| Blob storage: | Azure Active Directory (Azure AD) only |
| | Shared access signatures (SAS) only |
| | Access keys and shared access signatures (SAS) only |
| | Azure Active Directory (Azure AD) and shared access signatures (SAS) only |
| | Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS) |
| File storage: | Azure Active Directory (Azure AD) only |
| | Shared access signatures (SAS) only |
| | Access keys and shared access signatures (SAS) only |
| | Azure Active Directory (Azure AD) and shared access signatures (SAS) only |
| | Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS) |

Answer:

Explanation:

```

{
  "policyRule": {
    "if": {
      "allOf": {
        {
          "field": "type",
          "equals":
            [
              "Microsoft.Resources/deployments",
              "Microsoft.Resources/subscriptions",
              "Microsoft.Resources/subscriptions/resourceGroups"
            ]
        },
        {
          "not": {
            "field": "tags['organization']",
            "equals": "Contoso"
          }
        }
      ]
    },
    "then": {
      "effect": "Append",
      "details": [
        {
          "field": "tags['organization']",
          "value": "Contoso"
        }
      ]
    }
  }
}

```

Explanation

| | |
|---------------|---|
| Blob storage: | <div> <div></div> <div> Azure Active Directory (Azure AD) only Shared access signatures (SAS) only Access keys and shared access signatures (SAS) only Azure Active Directory (Azure AD) and shared access signatures (SAS) only Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS) </div> </div> |
| File storage: | <div> <div></div> <div> Azure Active Directory (Azure AD) only Shared access signatures (SAS) only Access keys and shared access signatures (SAS) only Azure Active Directory (Azure AD) and shared access signatures (SAS) only Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS) </div> </div> |

You can provide authorization credentials by using Azure Active Directory (AD), or by using a Shared Access Signature (SAS) token.

Box 1:

Both Azure Active Directory (AD) and Shared Access Signature (SAS) token are supported for Blob storage.

Box 2:

Only Shared Access Signature (SAS) token is supported for File storage.

NEW QUESTION # 18

Note This question is part of a series of questions that present the same scenario. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage a virtual network named VNet1 that is hosted in the West US Azure region.

VNet1 hosts two virtual machines named VM1 and VM2 that run Windows Server.

You need to inspect all the network traffic from VM1 to VM2 for a period of three hours.

Solution: From Performance Monitor, you create a Data Collector Set (DCS)

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Network performance monitor allows you to monitor connectivity and latencies across hybrid network architectures, Expressroute circuits, and service/application endpoints.

With an data collector set we can count specified network traffic, but we cannot inspect it.

For this we would need a network watcher Packet Capture.

NEW QUESTION # 19

.....

Desktop Microsoft Azure Administrator (AZ-104) practice test software is the first format available at Real4Prep. This format can be easily used on Windows PCs and laptops. The Microsoft Azure Administrator (AZ-104) practice exam software works without an internet connection, with the exception of license verification. One of the excellent features of this Microsoft Azure Administrator (AZ-104) desktop-based practice test software is that it includes multiple mock tests that have Microsoft AZ-104 practice questions identical to the actual exam, providing users with a chance to get Microsoft Azure Administrator (AZ-104) real exam experience before even attempting it.
