Because we are in the same boat in the market, our benefit is linked together.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q39-Q44):

NEW QUESTION # 39

Before batch calculation or validation rules can be evaluated in a utility network, which two steps must be completed?

- A. Enable topology and assign containment rules
- **B. Add error datasets to the map and publish/overwrite the utility network service with Validation enabled**
- C. Create asset packages and update tiers

Answer: B

Explanation:

Validation requires error datasets to be added and the utility network service to be published with Validation capability enabled.

NEW QUESTION # 40

During data migration into a utility network, which process is used to associate related source features with target utility network features?

- A. Data mapping workbooks
- B. Validation rules
- C. Connectivity rules

Answer: A

Explanation:

Data mapping workbooks map relationships between source and target features to ensure proper associations.

NEW QUESTION # 41

A user encounters error code 25: "Stacked point features." What does this mean, and how can it be fixed?

- A. Duplicate coincident points; fix by deleting duplicates or adjusting coordinates
- B. Invalid terminal configuration; fix by resetting paths
- C. Missing junction rule; fix by adding valid rule

Answer: A

Explanation:

Error 25 indicates stacked/duplicate coincident points. Fix by deleting duplicates or modifying XY/Z values.

NEW QUESTION # 42

In an enterprise deployment of ArcGIS Utility Network, which architecture is required to allow multiple users to interact with the network through services?

- A. Mesh-based Architecture
- B. Service-Oriented Architecture (SOA)
- C. Client-Server Architecture

Answer: B

Explanation:

Enterprise deployments require SOA, enabling services and branch versioning for multi-user workflows.

NEW QUESTION # 43

After a pipe burst occurs, which trace type should be run in ArcGIS Utility Network to find the valves that must be closed to isolate the damaged area?

- A. Isolation trace
- B. Subnetwork trace
- C. Upstream trace

Answer: A

Explanation:

An isolation trace identifies which valves must be closed to isolate an area for repairs.

NEW QUESTION # 44

.....

As you all know that practicing with the wrong preparation material will waste your valuable money and many precious study hours. So you need to choose the most proper and verified preparation material with caution. Preparation material for the EUNA_2024 exam questions from ExamcollectionPass helps to break down the most difficult concepts into easy-to-understand examples. Also,
