Avail Latest HPE7-A03 Latest Exam Preparation to Pass HPE7-A03 on the First Attempt

The marketplace is competitive, especially for securing a well-paid job. Moving your career one step ahead with HPE7-A03 certification will be a necessary and important thing. How to get the HPE7-A03 exam dumps with 100% pass is also important.

HPE7-A03 training topics will ensure you pass at first time. The experts who involved in the edition of HPE7-A03 questions & answers all have rich hands-on experience, which guarantee you the high quality and high pass rate.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

Map the stakeholders to their roles.

Answer:

Explanation:

NEW QUESTION # 53

Manufacturing A.B.C. is an international, mid-sized company specializing in producing industrial equipment. They have been in the market for over two decades and have established themselves as a reputable player in their industry. However, due to rapid technological advancements, their current network infrastructure is outdated and struggling to keep up with the demands of modern manufacturing processes.

Manufacturing A.B.C.'s network is a mix of multi-vendor legacy wired and wireless components, causing frequent downtime and hampering their production efficiency. The aging equipment leads to slow data transfer rates, unreliable connectivity, and increased vulnerability to cyber threats.

Fiber Cabling should be also upgraded as mostly OM2 is being used.

Compounding the network issues, the recent departure of the CTO has left the company without a clear direction for the network refresh project. There is a lack of consensus among the management team regarding the scope, budget, and timeline for the upgrade. The primary objectives of the manufacturing customer are as follows:

- Improve network performance and reliability to enhance production processes and minimize downtime
- Enhance network security to protect sensitive data and intellectual property

- Streamline communication and collaboration among different departments within the organization
 - Ensure scalability to accommodate future growth and technology advancements
- Manufacturing A.B.C. seeks a comprehensive network refresh that includes the following components:
- Upgrading the wired infrastructure to high-speed Ethernet switches to support increased data transfer rates and reduce latency
 - Implementing a robust wireless solution with enterprise-grade access points to provide seamless connectivity across the manufacturing facility
 - Centralized network management tools to simplify administration and monitoring of the network
- Expectations:
- The customer expects the network refresh project to be handled efficiently, with minimal disruption to their ongoing operations. They are looking for a reliable and experienced network solutions provider who can understand their unique manufacturing requirements and deliver a customized solution that aligns with their budget constraints. The manufacturing customer is keen on receiving clear project proposals and support in decision-making, given the recent change of the CTO.
- Your role as a network solutions provider is to address their concerns, offer expert guidance, and present a well-defined plan to meet their objectives effectively.
- You assume that the current network infrastructure does not have any wireless shadow IT equipment operated on the various floors/production sites, but you want to verify this. How could you find out if wireless shadow IT equipment is currently operational?

- A. Use a wireless sniffer like Wireshark to scan the environment and look for anomalies.
- B. Ask employees if they use 3rd party equipment to create isolated Hotspots.
- **C. Do a passive site survey, analyze the outcome together with the customer, and decommission this equipment wherever possible.**
- D. Do a ping sweep and document the hostnames/responses. Find out the connected switch port and walk to this location.

Answer: C

Explanation:

A passive wireless site survey detects all RF devices transmitting in the environment, including unauthorized APs or hotspots. Reviewing the survey results with the customer allows identification and removal of any wireless shadow IT equipment.

NEW QUESTION # 54

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C

Branch clinics are located at different locations across the United States

Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless I ANs. and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time Insight.
- Seamless integration across wired, wireless. WAN. SD-Branch. IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical learners, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital

The customer states that the hospital has approximately 35,000 devices connected to its network.

Unfortunately, they do not have a tool to accurately determine the device count.

Select the best option to obtain an accurate device count

- A. NetEdit
- B. HPE Aruba Networking Central
- C. Airwave
- D. HPE Aruba Networking ClearPass Profiler

Answer: D

NEW QUESTION # 55

The customer recently found out that Aruba OS-CX switches are capable of Application Recognition. What requirements should be fulfilled in order to do this? (Select two.)

- A. 8360 with CX Advanced License
- B. 6400 with CX Advanced License
- C. 6200F/M with CX Advanced License
- D. 6300F/M with CX Advanced License

Answer: B,D

NEW QUESTION # 56

Identify the stakeholders when gathering information for the network design and new IDF/MDF design. (Select two.)

- A. Chief Financial Officer
- B. Help desk manager
- C. Facility manager
- D. Network Operations manager

Answer: C,D

NEW QUESTION # 57
