## New GH-900 Exam Vce, GH-900 Latest Questions

The passing rate of our GH-900 study materials is 99% and the hit rate is also high. Our study materials are selected strictly based on the real GH-900 exam. Our expert team guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more learning GH-900 resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

## Microsoft GitHub Foundations Sample Questions (Q71-Q76):

NEW QUESTION # 71

What features are offered by Copilot for Business that are not offered by Copilot for individuals?  
(Each answer presents a complete solution. Choose three.)

- A. VPN proxy support via self-signed certificates
- B. **Organization-wide policy management**
- C. Plugs directly into the editor
- D. Offers multi-line function suggestions
- E. **Blocks suggestions matching public code**
- F. **Support for organization or enterprise GitHub accounts**

**Answer: B,E,F**

Explanation:

GitHub Copilot for Business offers several features that are tailored to the needs of organizations, providing more control, security, and support compared to the individual version.

Organization-wide Policy Management:

Option B is correct because Copilot for Business allows organizations to manage policies across their entire user base, providing control over how Copilot is used within the organization.

Blocking Suggestions Matching Public Code:

Option C is correct because Copilot for Business includes enhanced security features, such as blocking code suggestions that match public code to prevent inadvertent use of unlicensed code.

Support for Organization or Enterprise GitHub Accounts:

Option E is correct because Copilot for Business supports integration with GitHub Enterprise accounts, offering additional administrative controls and integration capabilities.

Incorrect Options:

Option A (multi-line function suggestions) is a feature available in both individual and business versions, so it does not differentiate the business offering.

Option D (VPN proxy support via self-signed certificates) is not a primary differentiator of Copilot for Business.

Option F (plugs directly into the editor) is true for both individual and business versions, so it is not unique to Copilot for Business.

## NEW QUESTION # 72

Which of the following best describes GitHub Copilot?

- A. A Visual Studio Code extension for developing AI solutions
- B. An advanced search tool to intelligently reuse existing code in your projects
- C. An AI tool designed to replace software developers
- D. **An AI pair programmer that offers autocomplete-style suggestions**

**Answer: D**

Explanation:

GitHub Copilot is described as an AI pair programmer that offers autocomplete-style suggestions. It is a tool integrated into development environments like Visual Studio Code that helps developers by providing code suggestions as they type. Copilot can suggest entire lines or blocks of code based on the context of what you're writing, making it a valuable assistant in coding, but not a replacement for developers.

## NEW QUESTION # 73

Which of the following is the purpose of a GitHub repository?

- A. To provide a version control system designed for small projects, offering simple tools for organizing files on your laptop
- B. To provide a folder that stores project files, including documentation, on your local machine
- C. **To provide a collaborative space where developers can share and manage code files, track changes, and store revision history**
- D. To provide a cloud-based hosting service for project documentation, providing a secure and centralized location for file storage

**Answer: C**

#### Explanation:

A GitHub repository serves as a collaborative space where developers can share and manage code files, track changes, and store revision history. It is much more than just a folder or simple tool; it is a comprehensive version control system that allows teams to collaborate effectively on codebases. Repositories enable developers to work together, manage contributions, review code, and maintain a complete history of every change made to the project.

#### NEW QUESTION # 74

After 30 minutes of inactivity, a GitHub Codespace will:

- A. Be deleted
- B. Restart
- C. Time out
- D. Commit changes

#### Answer: C

#### Explanation:

After 30 minutes of inactivity, a GitHub Codespace will time out. This is designed to conserve resources when the Codespace is not being actively used. The session will be paused, and you'll need to reconnect to resume your work. However, the Codespace is not deleted, and any unsaved changes might not be lost but should be committed or saved to prevent data loss.

#### NEW QUESTION # 75

The difference between GitHub Desktop and [github.com](https://github.com) is that Desktop:

- A. Is only available on Windows operating systems.
- B. Is a self-hosted version of GitHub.
- C. Is a standalone software application.
- D. Enables integration with office suite applications.
- E. Offers a graphical user interface.

#### Answer: E

#### Explanation:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on [github.com](https://github.com).

#### Graphical User Interface:

Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

#### Incorrect Options:

Option A is partially correct in that GitHub Desktop is a standalone application, but the key difference is the GUI.

Option B is incorrect because GitHub Desktop does not specifically enable integration with office suite applications.

Option C is incorrect because GitHub Desktop is available on both Windows and macOS.

Option E is incorrect because GitHub Desktop is not a self-hosted version of GitHub; it is a client application for accessing GitHub repositories.
