# 2026 COH-285 Latest Exam Review | Newest 100% Free COH-285 Latest Exam Preparation

By gathering, analyzing, filing essential contents into our COH-285 training quiz, they have helped more than 98 percent of exam candidates pass the COH-285 exam effortlessly and efficiently. You can find all messages you want to learn related with the exam in our COH-285 Practice Engine. Any changes taking place in the environment and forecasting in the next COH-285 exam will be compiled earlier by them. About necessary or difficult questions, they left relevant information for you.

Cohesity COH-285 Exam Syllabus Topics:

Topic	Details
Topic 1	• Monitor and Maintain NetBackup: This section of the exam measures skills of operations personnel and focuses on the monitoring and maintenance tasks necessary to keep a NetBackup environment healthy. The topics include the core concepts of image management and the use of the NetBackup Administration Console to verify images, expire them, import backup data, and perform manual duplication. The section explains how to manage both disk and cloud storage within NetBackup and highlights the use of reports for verification and monitoring. It also covers administrative controls for running, cancelling, suspending, resuming, and prioritizing backup or duplication jobs. Candidates learn how to initiate and monitor restore operations and understand the security management features such as role based access control and host ID certificates.
Topic 2	• Tune NetBackup: This section of the exam measures skills of system engineers and focuses on analyzing performance related factors in a NetBackup environment. It introduces performance assessment and optimization practices to help candidates identify bottlenecks and improve overall efficiency. Tuning NetBackup includes making adjustments that lead to more stable and faster backup and recovery operations.
Topic 3	• Troubleshoot NetBackup: This section of the exam measures skills of NetBackup administrators and focuses on resolving issues that occur during backup and recovery operations. It covers the interpretation of status codes and job details to diagnose failed jobs. The section also explains how to troubleshoot devices and media and how to validate connectivity between primary servers, media servers, and client systems. Candidates learn to address common problems in disaster recovery situations, including tasks related to recovering the NetBackup catalog.
Topic 4	• Configure NetBackup: This section of the exam measures the skills of system administrators and focuses on the configuration tasks required to set up and manage a NetBackup environment. It covers the setup of primary, media, and client settings along with essential host properties, including the use of security certificates. The section explains how to configure disk storage, cloud storage, and storage unit groups to support stable backup operations. It also includes the configuration of standard and advanced backup policies and protection plans. Candidates are expected to understand specialized backup solutions such as synthetic backups, True Image Restore, multiple data streams, checkpoint restart, and different duplication methods that involve storage lifecycle policies, disk staging, and replication features.

Achieve Success in COH-285 Exam with Cohesity's Exam Questions and Pass on Your First Try

As you can see from the demos that on our website that our COH-285 practice engine have been carefully written, each topic is the essence of the content. Only should you spend about 20 - 30 hours to study COH-285 preparation materials carefully can you take the exam. The rest of time you can go to solve all kinds of things in life, ensuring that you don't delay both study and work. Our COH-285 Exam Braindumps will save your time, money and efforts to success.

Cohesity Certified Protection Professional – NetBackup Appliances Sample Questions (Q75-Q80):

NEW QUESTION # 75
Which supported step should an administrator perform to ensure all operating system logs are sent from an appliance to a central logging server running Linux?

- A. configure syslog forwarding in the appliance CLISH
- B. configure access to the appliance logs with the share open command
- C. configure syslog forwarding in OpsCenter
- D. configure a cron job on the appliance to copy the logs

Answer: B

NEW QUESTION # 76
What is the name of the feature that allows NetBackup to protect workloads in the cloud and on-premises with a single solution?

- A. CloudCatalyst
- B. CloudMobility
- C. CloudSnap
- D. CloudPoint

Answer: B

NEW QUESTION # 77
A NetBackup master server has commenced writing four long-running duplication jobs to an AdvancedDisk disk pool. The value of "Maximum concurrent jobs" for the storage unit and "Limit I/O streams" for the disk pool are both set to 4.
There are 35 jobs queued on the master server that require this disk pool:
5 replication jobs with priority 9999
10 backup jobs with priority 999
20 duplication jobs with priority 99
Two restore jobs that require this disk pool are then submitted with default priority.
Which job type goes active next?

- A. Duplication
- B. Backup
- C. Replication
- D. Restore

Answer: D

NEW QUESTION # 78
What is the maximum number of storage shelves that can be attached to a NetBackup 5340 appliance?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 79
