

2026 SPLK-2002 Actual Questions - Splunk Splunk Enterprise Certified Architect - The Best Answers SPLK-2002 Real Questions

BTW, DOWNLOAD part of PassTorrent SPLK-2002 dumps from Cloud Storage: https://drive.google.com/open?id=1BI1TE3kGIV0ti2Hk7_uHNGh6rjgWrec

With the high employment pressure, more and more people want to ease the employment tension and get a better job. The best way for them to solve the problem is to get the SPLK-2002 certification. Because the certification is the main symbol of their working ability, if they can own the SPLK-2002 certification, they will gain a competitive advantage when they are looking for a job. An increasing number of people have become aware of that it is very important for us to gain the SPLK-2002 Exam Questions in a short time. Because all of them have realized that it is indispensable to our daily life and work.

Because our Splunk SPLK-2002 practice test is a web-based mock test, there is no need for software installation as it works with all of the popular web browsers, including Internet Explorer, MS Edge, Firefox, Chrome, Opera, and Safari. Your preparation for the SPLK-2002 Certification Exam will go more smoothly because our Splunk SPLK-2002 online practice exam precisely replicates the environment of the actual exam.

>> SPLK-2002 Actual Questions <<

Realistic SPLK-2002 Actual Questions, Answers SPLK-2002 Real Questions

The desktop Splunk SPLK-2002 exam simulation software works only on Windows, but the web-based Splunk SPLK-2002 practice exam is compatible with all operating systems. You can take the online Splunk SPLK-2002 Mock Test without software installation via Chrome, Opera, Firefox, or another popular browser.

Splunk Enterprise Certified Architect Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which component in the splunkd.log will log information related to bad event breaking?

- A. EventBreaking
- B. Audittrail
- C. AggregatorMiningProcessor
- D. IndexingPipeline

Answer: C

Explanation:

Explanation/Reference: <https://answers.splunk.com/answers/141721/error-in-splunkd-log-breaking-event-because-limit-of-256-has-been-exceeded.html>

NEW QUESTION # 17

Which of the following tasks should the architect perform when building a deployment plan? (Select all that apply.)

- A. Install Splunk apps.
- B. Use case checklist.
- C. Inventory data sources.
- D. Review network topology.

Answer: D

Explanation:

Explanation/Reference:

NEW QUESTION # 18

(What are the possible values for the mode attribute in server.conf for a Splunk server in the [clustering] stanza?)

- A. [clustering] mode = manager
- B. [clustering] mode = searchhead
- C. [clustering] mode = deployer
- D. [clustering] mode = peer

Answer: A,B,D

Explanation:

Within the [clustering] stanza of the server.conf file, the mode attribute defines the functional role of a Splunk instance within an indexer cluster. Splunk documentation identifies three valid modes:

* mode = manager

* Defines the node as the Cluster Manager (formerly called the Master Node).

* Responsible for coordinating peer replication, managing configurations, and ensuring data integrity across indexers.

* mode = peer

* Defines the node as an Indexer (Peer Node) within the cluster.

* Handles data ingestion, replication, and search operations under the control of the manager node.

* mode = searchhead

* Defines a Search Head that connects to the cluster for distributed searching and data retrieval.

The value "deployer" (Option C) is not valid within the [clustering] stanza; it applies to Search Head Clustering (SHC) configurations, where it is defined separately in server.conf under [shclustering].

Each mode must be accompanied by other critical attributes such as manager_uri, replication_port, and pass4SymmKey to enable proper communication and security between cluster members.

References (Splunk Enterprise Documentation):

* Indexer Clustering: Configure Manager, Peer, and Search Head Modes

* server.conf Reference - [clustering] Stanza Attributes

* Distributed Search and Cluster Node Role Configuration

* Splunk Enterprise Admin Manual - Cluster Deployment Architecture

NEW QUESTION # 19

Which of the following configuration attributes must be set in server.conf on the cluster manager in a single-site indexer cluster?

- A. master_uri
- B. replication_factor
- C. site_replication_factor
- D. site

Answer: A

Explanation:

The correct configuration attribute to set in server.conf on the cluster manager in a single-site indexer cluster is master_uri. This attribute specifies the URI of the cluster manager, which is required for the peer nodes and search heads to communicate with it. The other attributes are not required for a single-site indexer cluster, but they are used for a multisite indexer cluster. The site attribute defines the site name for each node in a multisite indexer cluster. The replication_factor attribute defines the number of

copies of each bucket to maintain across the entire multisite indexer cluster³. The `site_replication_factor` attribute defines the number of copies of each bucket to maintain across each site in a multisite indexer cluster⁴. Therefore, option A is the correct answer, and options B, C, and D are incorrect.

1: Configure the cluster manager 2: Configure the site attribute 3: Configure the replication factor 4: Configure the site replication factor

NEW QUESTION # 20

In an existing Splunk environment, the new index buckets that are created each day are about half the size of the incoming data. Within each bucket, about 30% of the space is used for rawdata and about 70% for index files.

What additional information is needed to calculate the daily disk consumption, per indexer, if indexer clustering is implemented?

- A. Replication factor, search factor, number of accelerated searches, and total disk size across cluster.
- **B. Total daily indexing volume, number of peer nodes, replication factor, and search factor.**
- C. Total daily indexing volume, replication factor, search factor, and number of search heads.
- D. Total daily indexing volume, number of peer nodes, and number of accelerated searches.

Answer: B

Explanation:

Explanation

The additional information that is needed to calculate the daily disk consumption, per indexer, if indexer clustering is implemented, is the total daily indexing volume, the number of peer nodes, the replication factor, and the search factor. These information are required to estimate how much data is ingested, how many copies of raw data and searchable data are maintained, and how many indexers are involved in the cluster. The number of accelerated searches, the number of search heads, and the total disk size across the cluster are not relevant for calculating the daily disk consumption, per indexer. For more information, see [Estimate your storage requirements] in the Splunk documentation.

NEW QUESTION # 21

.....

Our company abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest SPLK-2002 exam torrent we are dependable just like our SPLK-2002 test prep. They can satisfy your knowledge-thirsty minds. And our SPLK-2002 Quiz torrent is quality guaranteed. By devoting ourselves to providing high-quality practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember.

Answers SPLK-2002 Real Questions: <https://www.passtorrent.com/SPLK-2002-latest-torrent.html>

With our heartfelt wishes for you to successfully pass the Splunk Enterprise Certified Architect test engine, we recommend the professional SPLK-2002 actual exam for you, Splunk SPLK-2002 Actual Questions Customer first is our principle, PC test engine of SPLK-2002: Splunk Enterprise Certified Architect Preparation Materials is software, Splunk SPLK-2002 Actual Questions By developing and nurturing superior customers value, our company has been getting and growing more and more customers, We are also providing top-notch technical assistance to improve your experience with our SPLK-2002 training material.

Defining Actions for Alarms, JavaScript Beyond the Browser, With our heartfelt wishes for you to successfully pass the Splunk Enterprise Certified Architect test engine, we recommend the professional SPLK-2002 Actual Exam for you.

Pass Guaranteed Quiz Splunk - Reliable SPLK-2002 Actual Questions
