Latest UiPath-ABAv1 Exam Cost, Sure UiPath-ABAv1 Pass

Our windows software of the UiPath-ABAv1 study materials are designed to simulate the real test environment. If you want to experience the real test environment, you must install our UiPath-ABAv1 preparation questions on windows software. Also, it only support running on Java environment. If you do not install the system, the system of our UiPath-ABAv1 Exam Braindumps will

automatically download to ensure the normal operation.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q30-Q35):

NEW QUESTION # 30
Is it possible to use a third-party ML model with AI Center?

- A. Yes, by creating a custom package that uses the third-party model.
- B. Yes, but it cannot use a GPU in that case.
- C. Yes, but only if AI Center is deployed on-premise.
- D. No, you can only use the ML models available within AI Center.

Answer: A

Explanation:
UiPath AI Center provides flexibility for integrating third-party ML models into its framework. Here's how:
Third-Party Model Integration: Users can create a custom package for AI Center that incorporates a third-party model. This involves exporting the model in a compatible format (e.g., ONNX or TensorFlow SavedModel) and wrapping it into a package deployable in AI Center.
Scenarios for Usage: This is especially useful when businesses already have proprietary models developed externally or sourced from other vendors. These can be fine-tuned and deployed alongside UiPath's RPA workflows.
Infrastructure Consideration: While deploying on-premises provides better control over model usage and performance, AI Center supports GPU acceleration and third-party model integration across different deployment modes, ensuring scalability and processing efficiency.
This approach allows businesses to maintain the versatility of their ML pipelines and integrate advanced analytics with minimal disruption to their existing automation setup.

NEW QUESTION # 31
In UiPath Studio ReFramework, what can be the output from the Process Transaction state?

- A. Success, Waiting for input, Business Exception
- B. Success, Business Exception. System Exception
- C. Success, Fail. Paused
- D. Success, Error

Answer: B

Explanation:
In UiPath Studio's ReFramework, the outputs from the Process Transaction state can be Success, Business Exception, or System Exception. This classification helps in handling different outcomes of transaction processing effectively-Success for transactions completed without issues, Business Exception for errors related to the business logic, and System Exception for errors related to the system or application.
UiPath Documentation on ReFramework at https://docs.uipath.com/.

NEW QUESTION # 32
What are the environments that the UiPath Platform provides entitlements for deploying and licensing the product?

- A. Automation Suite. Orchestrator
- B. Automation Cloud, Automation Suite, Individual Products
- C. Document Understanding. Test Suite, Al Center
- D. Robots, Studio, Orchestrator

Answer: B

Explanation:
The UiPath Platform provides entitlements for deploying and licensing products in various environments, notably the Automation Cloud, Automation Suite, and individual products like Robots, Studio, and Orchestrator. The Automation Cloud offers cloud-based services while the Automation Suite enables deployment in hybrid or on-premises environments. Individual products focus on

specific components of the UiPath ecosystem that can be licensed separately.
UiPath documentation and learning materials from the UiPath Academy.

NEW QUESTION # 33
In the context of the Robotic Enterprise Framework, what do we call a transaction?

- A. An activity used in the Studio project to interact with a UI Element in the target application.
- B. The minimum (atomic) amount of data and the necessary steps required to process the data.
- C. A single step in the to-be business process that needs to be automated.
- D. A single workflow in the automation project.

Answer: B

Explanation:
Definition of a Transaction:
In the Robotic Enterprise Framework (REFramework), a transaction refers to the smallest unit of data or activity processed as part of a larger workflow.
Example: An invoice, a customer order, or a line item in a document.
Option Analysis:
Option A (Correct): A transaction is the atomic data unit (e.g., an invoice entry) along with the steps required to process it.
Option B: Refers to activities interacting with UI elements, which is not the definition of a transaction.
Option C: A single step in the process does not encapsulate the full transaction processing context.
Option D: A workflow can process multiple transactions, not just one.
Relevance in REFramework:
The REFramework uses queues in UiPath Orchestrator to manage and process transactions efficiently.

NEW QUESTION # 34
How can attended process execution be scheduled?

- A. Both from Assistant and Orchestrator
- B. Only from Orchestrator
- C. They cannot be scheduled but users can set reminders
- D. Only from Assistant

Answer: C

Explanation:
Attended process execution in UiPath cannot be scheduled in the same way as unattended processes.
However, users can set reminders using the UiPath Assistant. While the Assistant allows for reminders to be set, it does not schedule the process to run automatically. The user must manually start the process after being reminded. This is in contrast to unattended processes, which can be scheduled to run automatically at specified times through the Orchestrator12.
References: The explanation is based on the UiPath Community Forum discussions and the UiPath Documentation Portal's information on scheduling processes12.

NEW QUESTION # 35
.....

Holding a UiPath Certified Professional Automation Business Analyst Professional v1.0 UiPath-ABAv1 Certification in a certain field definitely shows that one have a good command of the UiPath-ABAv1 knowledge and professional skills in the related field. However, it is universally accepted that the majority of the candidates for the UiPath Certified Professional Automation Business Analyst Professional v1.0 exam are those who do not have enough spare time and are not able to study in the most efficient way.
