NEW QUESTION # 37
Which of the following can you include in a storage type search sequence for stock removal? Note: There are 2 correct answers to this question.

- A. A list of storage bin types
- B. A list of storage types
- C. A list of storage sections
- D. A list of storage type groups

Answer: B,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The storage type search sequence in SAP EWM defines the order for stock removal (e.g., picking). Option C ("A list of storage sections") is correct as sections within a storage type can be prioritized, and option D ("A list of storage types") is correct because multiple storage types (e.g., high rack, picking area) are sequenced, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Strategies > Define Storage Type Search Sequence. Option A (storage type groups) is used for putaway, not removal, and option B (bin types) is too granular for this sequence.
