But the displays are totally different. And you can use them to study on different time and conditions. If you want to know them clearly, you can just free download the demos of the Platform-App-Builder Training Materials!

## Salesforce Certified Platform App Builder Sample Questions (Q99-Q104):

### NEW QUESTION # 99

Universal Containers has deployed custom tabs to Production via changes sets, without including the profile settings or permission sets.

What is the settings for the visibility of custom tabs?

- A. Custom tabs are hidden for all users.
- B. Custom tabs are NOT deployed.
- C. Custom tabs are default off for all users.
- D. Custom tabs are default on for all uses.

**Answer: C**

Explanation:

Explanation

The setting for the visibility of custom tabs is default off for all users when they are deployed via change sets without including the profile settings or permission sets. This means that the custom tabs are not visible in any apps or navigation menus for any users unless they are manually added by each user or by an administrator.

Option B, C, and D are not correct settings for the visibility of custom tabs.

### NEW QUESTION # 100

Cloud Kicks works on an annual subscription model. When a sale rep marks an opportunity as closed won, a new opportunity should automatically be created for the renewal. The contracts team works outside of salesforce but also needs to be notified about closed deals in order to initial the contract process with the customer.

Which automation solution would meet these requirements?

- A. Validation Rule
- B. Approval Process
- C. Record-triggered flow
- D. Outbound Message

**Answer: C**

Explanation:

A record-triggered flow can be used to automate actions when a record is created or updated. In this case, a record-triggered flow can be configured to create a new opportunity and send an email to the contracts team when an opportunity is marked as closed won.

### NEW QUESTION # 101

What are the limitations of Schema Builder when creating a custom object?

- A. "Save" should be clicked each time a new object, field, or relationship is created.
- B. Fields and relationships can be created, but they will be unable to add the fields to the page layout from the canvas.
- C. Custom fields can be added to any custom objects, excluding formula field types.
- D. Relationships can be made to any custom objects, but any relationships to standard objects should be built in Lightning Object Manager.

**Answer: B**

Explanation:

Schema Builder allows users to create custom objects, fields, and relationships using a drag-and-drop interface. However, one of the limitations of Schema Builder is that fields and relationships can be created, but they will be unable to add the fields to the page layout from the canvas. Users will need to go to the Lightning Object Manager or Setup to edit the page layout and add the fields.

### NEW QUESTION # 102

An app builder created multiple custom fields, page layouts, and reports in the sandbox and added them to a change set was deployed to production, the reports were NOT deployed.

What should the app builder do?

- A. Add the reports to an unmanaged package and install the unmanaged package into production.
- B. Move the reports to the Untried Public Reports folder and add them to a new change set.
- C. Move the reports from the Unfiled Public Reports folder and add them to a new change set
- D. Recreate the reports in production. Reports are not supported in change sets

**Answer: C**

Explanation:

Explanation

Moving the reports from the Unfiled Public Reports folder and adding them to a new change set is what the app builder should do to deploy the reports to production. According to the Salesforce documentation,

"Reports in the Unfiled Public Reports folder aren't available for deployment." Moving the reports to the Untried Public Reports

folder, recreating the reports in production, and adding the reports to an unmanaged package are not necessary or recommended actions.

### NEW QUESTION # 103

Cloud Kicks's management team frequently travels and wants to approve requests from their team on the go via Chatter. Where would an app builder enable this ability?

- A. Approval Process Settings
- **B. Chatter Settings**
- C. Object Settings
- D. Chatter Feed Tracking

**Answer: B**

Explanation:

Explanation

The app builder would enable this ability in Chatter Settings. Chatter Settings is a setup menu that allows an app builder to configure various aspects of Chatter functionality, such as feeds, groups, email notifications, and more. One of the options in Chatter Settings is Enable Approvals via Chatter, which allows users to approve or reject requests from their team via Chatter posts or comments. Option A, B, and D are not places where an app builder would enable this ability.

### NEW QUESTION # 104

.....
