Microsoft Azure Security Technologies Sample Questions (Q47-Q52):

NEW QUESTION # 47

You have the Azure Information Protection conditions shown in the following table.

You need to identify how Azure Information Protection will label files.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Label 2 only

How multiple conditions are evaluated when they apply to more than one label

* The labels are ordered for evaluation, according to their position that you specify in the policy: The label positioned first has the lowest position (least sensitive) and the label positioned last has the highest position (most sensitive).

* The most sensitive label is applied.

* The last sublabel is applied.

Box 2: No Label

Automatic classification applies to Word, Excel, and PowerPoint when documents are saved, and apply to Outlook when emails are sent. Automatic classification does not apply to Microsoft Notepad.

NEW QUESTION # 51

You are configuring network connectivity for two Azure virtual networks named VNET1 and VNET2.

You need to implement VPN gateways for the virtual networks to meet the following requirements:

* VNET1 must have six site-to-site connections that use BGP.

* VNET2 must have 12 site-to-site connections that use BGP.

* Costs must be minimized.

Which VPN gateway SKUs should you use for each virtual network? To answer, drag the appropriate SKUs to the correct networks. Each SKU may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
