## Microsoft Power Platform Functional Consultant Sample Questions (Q100-Q105):

**NEW QUESTION # 100**
You have a business process flow (BPF) that interacts with the Account entity.
You configure a new version for the BPF and add a new stage at the beginning.
You need to identify the impact of the new version on the existing account records.
What is the outcome in each scenario? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

## NEW QUESTION # 101

A company is implementing Microsoft Power Platform solutions.

The company requests information on the features that are supported by Power Fx.

You need to identify the features of Power Fx.

What should you identify?

- A. It is available for purchase through a Microsoft reseller.
- B. It uses synchronous data operations.
- C. It uses formulas that are similar to Microsoft Excel formulas.
- D. It uses an undefined value for uninitialized variables.

**Answer: C**

## NEW QUESTION # 102

A company is creating a business process flow in Power Automate to analyze the probability that a customer will buy a specific product.

The company uses ratings from zero to one hundred. The company assigns likelihoods based on the following table:

You need to define the business process steps. All logic must be included in a single evaluation statement.

Which step should you use? To answer, drag the appropriate steps to the correct ratings. Each step may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

## NEW QUESTION # 103

You plan to create a dataflow to import data into Microsoft Dataverse by using Power Query. The dataflow has the following requirements:

* A table of aggregated data must be created in dataflow storage.

* A unique identifier must be created for the table.

You need to configure the dataflow.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection Is worth one point.

**Answer:**

Explanation:

## NEW QUESTION # 104

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name:

Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: From Dynamics 365 Settings, select Email Configuration. In the active mailbox for the user, update the name.

Does the solution meet the goal?

- A. No

- B. Yes

**Answer: A**

Explanation:
Change the user name, not the email configuration.
Change a user's email address
You must be a global admin to complete these steps.
* In the admin center, go to the Users > Active users page.
* Select the user's name, and then on the Account tab select Manage username.
* In the first box, type the first part of the new email address. If you added your own domain to Microsoft
365, choose the domain for the new email alias by using the drop-down list. Learn how to add a domain.
* Select Save changes.
