Pass4sure Plat-Arch-202 Pass Guide | New Plat-Arch-202 Test Online

Never have we made our customers disappointed about our Plat-Arch-202 study guide. So we have enjoyed good reputation in the market for about ten years. In the future, we will stay integrity and research more useful Plat-Arch-202 learning materials for our customers. Please continue supporting our Plat-Arch-202 Exam Questions and we will make a better job with your warm encourages and suggestions. So if you have any opinions about our Plat-Arch-202 learning quiz, just leave them for us.

Salesforce Certified Platform Development Lifecycle and Deployment

Architect Sample Questions (Q120-Q125):

NEW QUESTION # 120

The team at Universal Containers is building an application on Java that will interact with its Salesforce application. They want to use SOQL queries to retrieve and make changes to smaller pieces of Salesforce metadata through this application. Which API should the team leverage?

- A. User Interface API
- B. Metadata API
- C. Any Salesforce API
- D. Tooling API

Answer: D

NEW QUESTION # 121

Universal Containers requires its developers to develop and test code in one sandbox per developer before deploying to a common sandbox for code review. Which deployment strategy should be used in this environment?

- A. Refresh the developer's sandbox, develop changes, test changes, refresh the developer's sandbox, deploy to the common sandbox
- B. Refresh the developer's sandbox, develop changes, refresh the common sandbox, deploy to the common sandbox, test changes
- C. Refresh the common sandbox, develop changes, refresh the developer sandbox, deploy to the common sandbox, test changes
- D. Refresh the developer's sandbox, develop changes, refresh the developer's sandbox, deploy to the common sandbox, test changes

Answer: B

NEW QUESTION # 122

What are the three considerations that the architect should recommend for Change Set deployment?
Choose 3 answers

- A. Change Sets cannot be rolled back.
- B. Change Sets cannot be validated before deployment
- C. Change Sets cannot be automated..
- D. Change Sets cannot be reused between Production Salesforce orgs.
- E. Change Sets cannot be used for orgs affiliated with same production org.

Answer: A,C,D

NEW QUESTION # 123

UC's scale of Salesforce deployment has increased over time, leading to complexities. UC is finding too many bugs in the deployed code, which has become a challenge to the delivery team. The team wants to reduce the amount of bugs by ensuring all the developed code is reviewed, tested, and validated in the upstream deployment process. Which three development practices will be best suited to address UC's concerns? Choose 3

- A. Incorporate test-driven deployment into the project structure.
- B. Enable a short and timely feedback loop with customers
- C. Encourage the development team to be self-organizing.
- D. Enable developer teams to do peer code review.
- E. Use continuous integration with automation testing.

Answer: A,D,E

NEW QUESTION # 124

Universal Containers (UC) wants to shorten their deployment time to production by controlling which tests to run in production. UC's Architect has suggested that they run only subsets of tests. Which two statements are true regarding running specific tests during deployments? Choose 2 answers

- A. To run a subset of tests, set the Run Specified Tests test level on the DeployOptions objects and pass it as an argument to deploy() call.
- B. Specifying the test method is supported in DeployOptions, therefore specify only the test classes that are required to be executed.
- C. Specify both test classes and individual test methods that are required to be executed as both are supported in DeployOptions.
- D. run a subset of tests ,set the RunLocalTests test level on the DeployOptions object and pass it as an argument to deploy() call.

Answer: A,B

NEW QUESTION # 125

.....
