## C\_WME\_2506 Learning Materials & C\_WME\_2506 Test Assessment

To provide ease and accessibility, Actual4Exams offers SAP C\_WME\_2506 exam questions in PDF format. This format is easy to understand, and you can download the C\_WME\_2506 exam questions pdf file on all smart devices. You can prepare for the SAP Certified Associate - WalkMe Digital Adoption Consultant (C\_WME\_2506) exam anytime, anywhere using Actual4Exams C\_WME\_2506 exam dumps.

### SAP C\_WME\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Getting Started with Building WalkMe Solutions:</b> This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Advancing your Skills in Building WalkMe Solutions:</b> This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.</li> </ul>

## SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q15-Q20):

### NEW QUESTION # 15

A brokerage firm is interested in implementing WalkMe to address an issue their customers face when transferring money from their online accounts to their banks.

They have heard that users do not know where to go on the platform to complete this, but once they reach the appropriate page, they know how to fill out the forms correctly without errors.

Of the listed WalkMe apps, which would best address the issue?

- A. Resource to explain how to complete all parts of the process
- **B. Shuttle to bring the user to the page**
- C. ShoutOut to announce that this must be completed
- D. SmartTips on the fields of the page

**Answer: B**

### NEW QUESTION # 16

What is the function of WalkMe Discovery's License Optimization feature?

- A. To increase the number of applications used in an organization
- **B. To identify potential wasted spend on app licenses**
- C. To automatically renew software licenses without user intervention
- D. To disable unused applications permanently

**Answer: B**

Explanation:

WalkMe Discovery's License Optimization feature analyzes application usage data to identify potential wasted spend on app licenses. By tracking which licenses are underutilized or unused, it helps organizations optimize software investments, reducing costs without disrupting operations.

The other options are incorrect:

- \* Automatically renewing licenses(A) is not a WalkMe function.
- \* Disabling unused applications permanently(C) is too extreme; Discovery provides insights, not actions.
- \* Increasing applications(D) contradicts the goal of optimization.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.6: WalkMe Discovery):

"The License Optimization feature in WalkMe Discovery identifies underused or unused software licenses, highlighting opportunities to reduce wasted spend." The course WalkMe Fundamentals explains:

"WalkMe Discovery's License Optimization helps organizations save costs by pinpointing licenses that are not fully utilized, enabling informed decisions." Option B correctly describes the function of License Optimization.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.6: WalkMe Discovery.

### NEW QUESTION # 17

You have created a Smart Walk-Thru to guide users creating a new department on a site. Depending on which option users select from a dropdown at one step in the process, they may need to complete a few additional items before moving forward. Which WalkMe feature could help address this alternate path in a Smart Walk- Thru?

- A. Wait For Condition
- B. Popup Step
- C. Start Point
- **D. Split**

**Answer: D**

Explanation:

The Split feature in a Smart Walk-Thru allows Builders to create alternate paths based on user actions or conditions, such as selecting a specific dropdown option. In this case, if users choose a dropdown option that requires additional steps, the Split feature can branch the Smart Walk-Thru to guide them through those steps before rejoining the main flow. This ensures the Smart Walk-Thru adapts dynamically to user choices, providing tailored guidance.

The other options are incorrect:

- \* Start Point(A) defines where a Smart Walk-Thru begins, not alternate paths.
- \* Wait For Condition(B) pauses the flow until a condition is met, not for branching.
- \* Popup Step(D) displays a message or input field, not for managing alternate paths.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"The Split feature enables branching in Smart Walk-Thrus based on user actions, such as dropdown selections, allowing customized guidance for different paths." The course Getting Started with Building WalkMe Solution explains:

"Use Split steps to handle alternate paths in a Smart Walk-Thru, like additional steps for specific dropdown choices, ensuring flexible and accurate guidance." Option C, Split, is the correct feature for this scenario.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus.

WalkMe Editor User Guide, "Split Steps" Section.

Course:Getting Started with Building WalkMe Solutions, Module 6: Advanced Smart Walk-Thru Features.

### NEW QUESTION # 18

Your company just provided you with the new company logo that they want you to use in all of your WalkMe deployables. Where is the best place to store the logo?

- A. Local Settings
- **B. The Asset Library**
- C. Engaged Elements
- D. WalkMe Admin Center

**Answer: B**

### NEW QUESTION # 19

You're analyzing data in Insights, specifically the 'What Users Are Searching For' section. You see that users are not finding any helpful content for the search term 'profile' because 85% of the searches for that term are resulting in no action. However, you know that you have content published specific for help with 'profile.' What should you do?

- A. Adjust the jQuery for a step in the process.
- B. Remove any content related to 'profile.'
- **C. Add Keywords to the content.**
- D. Give it more time. Users will eventually find the help.

**Answer: C**

Explanation:

The 'What Users Are Searching For' section in WalkMe Insights reveals search terms entered by users in the WalkMe Menu and the percentage of searches that result in no action, indicating content gaps or discoverability issues. If 85% of searches for 'profile' result in no action, despite existing content, the issue is likely that the content is not properly indexed or tagged for search. Adding relevant keywords (e.g., 'profile', 'account settings,' 'user profile') to the content's metadata in the WalkMe Editor improves its discoverability, ensuring it appears in search results when users enter related terms.

The other options are less effective:

- \* Giving it more time(A) does not address the discoverability issue, as users are already failing to find the content.
- \* Removing profile content(B) would worsen the problem by eliminating the existing help.
- \* Adjusting jQuery for a step(D) is irrelevant, as jQuery selectors affect element targeting, not search functionality.

Extract from Official WalkMe Documentation:

According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.2: Analytics and Reporting):

"High 'no action' rates in the 'What Users Are Searching For' report suggest that content is not being found.

To resolve this, add relevant keywords to the content's settings in the WalkMe Editor to improve search indexing and visibility." The course Advancing Your Skills in Building WalkMe Solutions states:

"If Insights shows users searching for terms like 'profile' but taking no action, enhance content discoverability by adding targeted keywords in the Editor, ensuring the WalkMe Menu returns relevant results." Option C, adding keywords, directly addresses the issue of users not finding the 'profile' content.
