It will bring a lot of benefits for you beyond your imagination if you buy our C-SIGDA-2403 Study Materials.

## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample

## Questions (Q28-Q33):

### NEW QUESTION # 28

What is the first step in starting an analysis in SAP Signavio Process Intelligence?

- A. Create a new process
- B. Create a new investigation
- C. Analyze Process Discovery Widget
- D. Upload the event log

Answer: B

### NEW QUESTION # 29

How does a good software solution support process management? Note: There are 3 correct answers to this question.

- A. With a central object repository
- B. With a seamless printing feature
- C. By exporting and importing
- D. With version control
- E. By collaboration/commenting features

Answer: A,D,E

Explanation:

A robust software solution like SAP Signavio supports Business Process Management by providing tools to manage, collaborate, and maintain process assets. The SAP Signavio Process Transformation Suite Documentation outlines:

- \* Exact Extract: "Effective process management software supports:
- \* Version Control: To track changes and maintain process model history.
- \* Collaboration/Commenting Features: To enable stakeholder feedback and teamwork on process models.
- \* Central Object Repository: To store and reuse process elements, ensuring consistency across models." (SAP Signavio Process Transformation Suite Overview, section on "Process Management Software Features").
- \* Explanation:
  - \* Option A (With version control): Version control tracks changes to process models, allowing users to revert to previous versions or review modification history, critical for maintaining accuracy in SAP Signavio Process Manager.
  - \* Option D (By collaboration/commenting features): Collaboration features, such as commenting in the SAP Signavio Process Collaboration Hub, enable stakeholders to provide feedback, discuss improvements, and align on process designs.
  - \* Option E (With a central object repository): A central repository (e.g., the Dictionary in SAP Signavio) stores reusable process elements like tasks or roles, ensuring consistency and reducing redundancy across models.
  - \* Option B (With a seamless printing feature) is incorrect as printing, while useful, is not a core process management function compared to version control or collaboration.
  - \* Option C (By exporting and importing) is incorrect because exporting/importing is a secondary feature for data transfer, not a primary process management support mechanism.

Reference: SAP Signavio Process Transformation Suite Overview, section on "Process Management Software Features"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: Process Management Tools.

### NEW QUESTION # 30

What are some goals of Process Implementation? Note: There are 2 correct answers to this question.

- A. To conduct process interviews to figure out relevant tasks
- B. To include the process into the company structure and architecture
- C. To evaluate process KPI's
- D. To publish the process internally

Answer: B,D

### NEW QUESTION # 31

What are some aggregation functions in SiGNAL? Note: There are 3 correct answers to this question.

- A. GROUP BY
- B. BOOL\_OR
- C. FIRST()
- D. AVG()
- E. INNER JOIN

**Answer: B,C,D**
