

Dumps Salesforce Plat-Admn-202 Discount - Customizable Plat-Admn-202 Exam Mode

P.S. Free & New Plat-Admn-202 dumps are available on Google Drive shared by ITPassLeader: https://drive.google.com/open?id=1GukxepZ1wt-35xJPnj1V1eauodCMb_Xy

You do not need to enroll yourself in expensive Plat-Admn-202 exam training classes. With the Salesforce Plat-Admn-202 valid dumps, you can easily prepare well for the actual Plat-Admn-202 exam at home. Do you feel Plat-Admn-202 Exam Preparation is tough? ITPassLeader desktop and web-based online Salesforce Plat-Admn-202 practice test software will give you a clear idea about the final Plat-Admn-202 test pattern.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 2	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Topic 3	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 4	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 5	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Customizable Plat-Admn-202 Exam Mode - Plat-Admn-202 Valid Dumps Sheet

All these Plat-Admn-202 exam questions formats contain the real Salesforce Certified Platform App Builder (Plat-Admn-202) exam practice test questions that assist you in preparation and you will feel confident to pass the final Salesforce Plat-Admn-202 exam easily. The Salesforce Plat-Admn-202 desktop practice test software and web-based practice test software, both are the mock Salesforce Certified Platform App Builder (Plat-Admn-202) exam that provides you real-time Plat-Admn-202 exam environment for quick and complete preparation.

Salesforce Certified Platform App Builder Sample Questions (Q249-Q254):

NEW QUESTION # 249

Cloud Kicks (CK) is finding sales reps are inconsistent in data entry when deals are won. CK requires that custom shoes are shipped within two weeks after the close date. A custom field called Scheduled Ship Date on the opportunity records the ship date. How should the app builder ensure this field is properly filled out before setting the opportunity to closed won?

- A. `ISPICKVAL( StageName , "Closed Won" ) && ( Scheduled _Ship _Date _c - CloseDate ) > 14`
- **B. `OR(ISPICKVAL( StageName , "Closed Won" ) && ( Scheduled _Ship _Date _c - CloseDate ) > 14, ISBLANK( Scheduled _Ship _Date _c )`**
- C. `OR(ISPICKVAL( StageName = "Closed Won" ) && ( Scheduled _Ship _Date _c - CloseDate ) > 14, ISBLANK( Scheduled _Ship _Date _c )`
- D. `ISPICKVAL( StageName = CloseDate ) > 14, Closed Won" ) && ( CloseDate - Scheduled _Ship _Date _c ) > 14`

Answer: B

Explanation:

The correct validation rule formula to ensure that the Scheduled Ship Date field is properly filled out before setting the Opportunity to Closed Won is:

`OR(ISPICKVAL( StageName , "Closed Won" ) && ( Scheduled _Ship _Date _c - CloseDate ) > 14, ISBLANK( Scheduled _Ship _Date _c )` This formula checks two conditions: if the StageName is Closed Won and the Scheduled Ship Date is more than 14 days after the Close Date, or if the Scheduled Ship Date is blank. If either condition is true, the validation rule will fire and prevent saving the record. The other formulas are incorrect because they either use incorrect syntax (such as "=" instead of "&&") or incorrect logic (such as checking if the

Scheduled Ship Date is less than 14 days after the Close Date)

NEW QUESTION # 250

Universal Containers wants to embed a chart of all related Opportunities, By stage, on the Account detail page. Which type of report should an app builder create to add to the Account page layout?

- A. A tabular report on the Account object
- **B. A summary report on the Opportunity object**
- C. A summary report on the Account object
- D. A tabular report on the Opportunity object

Answer: B

Explanation:

To embed a chart on the Account detail page showing related Opportunities by Stage, the report must summarize Opportunities, not just list them. Salesforce documentation specifies that summary reports allow grouping by fields (e.g., Stage) and can be used in Report Chart components. (Salesforce Help) Tabular reports cannot be grouped and therefore cannot provide the aggregated chart needed.

The report must be built on the Opportunity object because the records being summarized are Opportunities, not Accounts.

NEW QUESTION # 251

Cloud Kicks wants to display 10 key fields at once in a separate section at the top of opportunity records on the desktop. Which component should an app builder add to the record page to enable this functionality?

- A. Path
- B. Accordion
- **C. Highlights Panel**
- D. Custom Lightning Web Component

Answer: C

Explanation:

Highlights Panel. This is correct because the highlights panel component displays key fields from a record at the top of the page, and it can be configured to show up to 10 fields.

NEW QUESTION # 252

Properly installing managed packages helps prevent conflicts with customizations made by customers and partners. What functionality should be used to set up packages?

- A. Help setting
- B. Description
- **C. Namespace**
- D. Allow sharing

Answer: C

Explanation:

The functionality that should be used to set up packages is namespace. A namespace is a unique identifier that distinguishes one package from another and prevents naming conflicts with other packages or customizations. A namespace also allows developers to expose their code or components for use by other developers through APIs or web services. A description is not a functionality that should be used to set up packages, but a text field that provides information about the package contents or purpose. A description does not prevent conflicts with other packages or customizations. Allow sharing is not a functionality that should be used to set up packages, but a setting that controls whether users can share records owned by other users within their role hierarchy. Allow sharing does not prevent conflicts with other packages or customizations. Help setting is not a functionality that should be used to set up packages, but a setting that determines whether users can access help documentation for standard Salesforce features or custom features within a package. Help setting does not prevent conflicts with other packages or customizations.

NEW QUESTION # 253

The app builder needs to change the data types of new custom fields. The app builder is not able to delete and recreate any of the fields, nor modify any apex code. Which data type change will require the app builder to perform the additional steps in order to retain existing functionalities?

- A. Changing the data type of a field used in lead conversion from number to text
- **B. Changing the data type of a field used in an apex class from number to text.**
- C. Changing the data type of a field used as an external id from number to text.
- D. Changing the data type of a field used in a report from a text to an encrypted field

Answer: B

Explanation:

Changing the data type of a field used in an apex class from number to text will require the app builder to perform additional steps in order to retain existing functionalities. This is because changing the data type of a field may affect the apex code that references or manipulates the field value, and may cause compilation errors or unexpected results. The app builder will need to update the apex code to handle the new data type and ensure that the logic and calculations are still correct. Option B is incorrect because changing the data type of a field used in a report from a text to an encrypted field will not require additional steps, as encrypted fields can still be used in reports with some limitations. Option C is incorrect because changing the data type of a field used as an external id from number to text will not require additional steps, as external id fields can be either number or text. Option D is incorrect because changing the data type of a field used in lead conversion from number to text will not require additional steps, as lead conversion fields can be mapped regardless of their data types.

NEW QUESTION # 254

.....

The pass rate for Plat-Admn-202 learning materials is 98.35%, and pass guarantee and money back guarantee if you fail to pass the exam. Plat-Admn-202 exam dumps are verified by experienced specialists, therefore, we can guarantee the correctness of the answers. Plat-Admn-202 Learning Materials of us will give you free update for 365 days after purchasing, and the latest version will send to your email box automatically. If you have any other questions about the Plat-Admn-202 exam dumps, just contact us.
