If you're looking to advance your career, passing the EXIN CDCP Certification Exam is crucial. As with any certification exam, success requires time and effort. While there are many online study materials available, not all of them are accurate or reliable. Many professionals struggle with managing their time and studying effectively, making it difficult to pass the Certified Data Centre Professional (CDCP) (CDCP) Exam.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q67-Q72):

NEW QUESTION # 67
Which one of the following is a core objective of a Business Value in an organization?

- A. None of the above
- B. Reducing the Deficit
- C. Reducing Costs
- D. Increasing Sales

Answer: A

Explanation:
According to the EPI Data Centre Professional (CDCP®) Reference Materials, a core objective of a Business Value in an organization is to create value for customers and stakeholders1. This means delivering products or services that meet or exceed customer expectations, while also generating profits or benefits for the organization and its shareholders. Reducing costs, reducing the deficit, and increasing sales are possible ways to achieve this objective, but they are not the core objective itself.

NEW QUESTION # 68
Does unplanned downtime of a data centre have an impact on the business results?

- A. Yes, but data centre downtime only impacts the airline industry.
- B. Yes, data centre downtime can result in business downtime.
- C. No, unplanned data centre downtime is already financially planned for in the yearly budget planning process.
- D. No, because data centres operate independently from the business.

Answer: B

Explanation:
Data centres are essential for supporting the IT operations and applications of various businesses across different industries. Data centre downtime can have a negative impact on the business results, such as loss of revenue, customer satisfaction, productivity, reputation, and competitive advantage. According to a web search, the average cost of data centre downtime in 2020 was $8,851 per minute, and the average duration of a data centre outage was 95 minutes1. This means that a typical data centre outage could cost a business over
$840,000 in direct and indirect losses1. Therefore, data centre downtime can have a significant impact on the business results, regardless of the industry or sector.

NEW QUESTION # 69

How many monitoring points should be used in Temperature Measurement?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:
According to the EPI Data Centre Professional (CDCP) Reference Materials, the recommended number of monitoring points for temperature measurement in a data centre is 3 per rack: one at the top, one at the middle, and one at the bottom1. This is to ensure that the temperature distribution within the rack is uniform and within the acceptable range for the equipment. The temperature sensors should be placed at the front of the rack, where the air enters the equipment, and not at the back, where the hot air exits1.

NEW QUESTION # 70

Which Class of Fires involves cooking appliances?

- A. Class B
- B. Class A
- C. Class C
- D. Class K

Answer: D

Explanation:
According to the EPI Data Centre Professional (CDCP) Preparation Guide, Class K fires involve cooking appliances that use combustible cooking media such as vegetable or animal oils and fats (page 28). Class K fires require special extinguishing agents that can suppress the high-temperature flames and prevent re- ignition. Class K fires are different from Class B fires, which involve flammable liquids such as gasoline, oil, or paint.

NEW QUESTION # 71

Escape route signage should be placed where?

- A. Only at the main entrance of the data centre building
- B. At every door providing a pathway
- C. Only at emergency escape doors
- D. At every door including riser doors, doors of storage closets etc.

Answer: B

Explanation:
Escape route signage should be placed at every door providing a pathway to the exit or the assembly area, according to the CDCP Preparation Guide1 and the EU Safety/Health Signs Directive2. Escape route signage is used to guide the occupants of the data centre from wherever they are in the building, via a place of relative safety (the escape route), to the place of ultimate safety (the assembly area). Escape route signage should not be limited to only emergency escape doors or the main entrance of the data centre building, as these may not be accessible or visible from all locations. Escape route signage should also not include doors that do not lead to the exit or the assembly area, such as riser doors, doors of storage closets, or doors of other rooms, as these may confuse or mislead the occupants. Escape route signage should be placed at every door that provides a pathway to the exit or the assembly area, and should indicate the direction and distance of the escape route using pictograms, arrows, and words. Escape route signage

should also be designed and installed in accordance with the relevant standards and codes, such as BS 5499 and ISO 7010.
