

Maximize Your Success with PassLeader Customizable Cloud-Deployment-and-Operations WGU Cloud Deployment and Operations Practice Test

2026 Latest PassLeader Cloud-Deployment-and-Operations PDF Dumps and Cloud-Deployment-and-Operations Exam Engine Free Share: <https://drive.google.com/open?id=1rkUrgZ-QaX2b2xNuAWrkEHLr4B4QIVE>

We are a team of IT professionals that provide our customers with the up-to-date Cloud-Deployment-and-Operations study guide and the current certification exam information. Our exam collection contains the latest questions, accurate Cloud-Deployment-and-Operations Exam Answers and some detailed explanations. You will find everything you want to overcome the difficulties of Cloud-Deployment-and-Operations practice exam and questions. You will get high mark followed by our materials.

WGU Cloud-Deployment-and-Operations Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Cloud Security and Compliance: This section of the exam measures skills of Cloud Engineers and covers the use of AWS security tools to protect data and infrastructure. Candidates must demonstrate awareness of compliance needs and the ability to apply protective controls that align with industry and organizational standards.

Topic 2	<ul style="list-style-type: none"> • Ensuring Scalability, Elasticity, and Backup Readiness: This section of the exam measures skills of Cloud Operations Specialists and covers implementing AWS features that support scalability, elasticity, and backup readiness. It focuses on enabling cloud systems to handle fluctuating workloads while maintaining continuity and ensuring critical data remains recoverable.
Topic 3	<ul style="list-style-type: none"> • Configuring Cloud Network Connectivity: This section of the exam measures skills of Cloud Engineers and covers network connectivity within AWS environments, including setup, troubleshooting, and corrective actions. Candidates must show they can manage cloud networking in a way that ensures reliable communication between systems and services.
Topic 4	<ul style="list-style-type: none"> • Automating Cloud Provisioning and Maintenance: This section of the exam measures skills of Cloud Operations engineers and covers the ability to automate provisioning tasks and ongoing maintenance activities. It emphasizes using automation tools to streamline cloud resource creation and lifecycle management. Students must demonstrate they can apply automation to maintain efficient cloud operations.
Topic 5	<ul style="list-style-type: none"> • Monitoring, Logging, and Issue Remediation: This section of the exam measures skills of Cloud Engineers and covers responding to issues identified through AWS monitoring and logging tools. Candidates must show they can interpret system outputs, identify problems, and take corrective actions to maintain smooth cloud operations.
Topic 6	<ul style="list-style-type: none"> • Optimizing Cost and Performance Baselines: This section of the exam measures skills of Cloud Operations engineers and covers determining the best balance between cost and performance using AWS services. It involves selecting suitable configurations and resource types to maintain efficient operations while avoiding unnecessary spending.

Master The Cloud-Deployment-and-Operations Content for Cloud-Deployment-and-Operations exam success

Comfortable life will demoralize and paralyze you one day. So you must involve yourself in meaningful experience to motivate yourself. For example, our Cloud-Deployment-and-Operations study materials perhaps can become your new attempt. In fact, learning our Cloud-Deployment-and-Operations learning quiz is a good way to inspire your spirits. Not only that you can pass the exam and gain the according Cloud-Deployment-and-Operations certification but also you can learn a lot of knowledge and skills on the subject.

WGU Cloud Deployment and Operations Sample Questions (Q58-Q63):

NEW QUESTION # 58

(Which AWS solution can send email based on CloudWatch alarms?)

- A. Simple Queue Service (SQS)
- **B. Simple Notification Service (SNS)**
- C. Kinesis
- D. Amplify

Answer: B

Explanation:

Amazon CloudWatch alarms can trigger notifications when a metric breaches a defined threshold. The AWS solution designed to send emails based on these alarms is Amazon Simple Notification Service (SNS). SNS supports sending notifications via email, SMS, and other protocols when subscribed endpoints are triggered by CloudWatch alarms. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, Monitoring and Alarms) states that SNS is the primary service for delivering notifications from CloudWatch, allowing users to configure email subscriptions for alarm states. Other options like SQS, Amplify, and Kinesis are not designed for this purpose.

NEW QUESTION # 59

(Which two solutions should an administrator use to receive emails when a Lambda function returns an error?
Choose 2 answers.)

- A. Amazon Simple Queue Service
- B. AWS CloudTrail
- C. Amazon CloudWatch
- D. Amazon Simple Notification Service

Answer: C,D

Explanation:

To receive emails when a Lambda function returns an error, the administrator should use Amazon CloudWatch to monitor the function's logs and metrics (e.g., errors) and Amazon Simple Notification Service (SNS) to send email notifications based on CloudWatch alarms. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, CloudWatch and SNS) states, "CloudWatch can detect Lambda errors via logs and trigger an alarm, which integrates with SNS to send email notifications to subscribed endpoints, ensuring timely error alerts." SQS and CloudTrail are not designed for this notification workflow.

NEW QUESTION # 60

(Media files are stored in an S3 bucket in region A. Demand for the files from region B has increased. Region B is suffering from some latency issues due to geographical location. Which type of replication will reduce the latency in region B?)

- A. S3 Batch
- B. Same-Region
- C. Cross-Region
- D. S3 Versioning

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To reduce latency in region B due to increased demand for media files stored in region A, cross-region replication (CRR) should be used. CRR replicates objects to an S3 bucket in another region (e.g., region B), allowing users to access files from a closer location, thus minimizing latency. The WGU Cloud Deployment and Operations Study Guide (Section 2.2, S3 Replication) states, "Cross-Region Replication in S3 copies objects to a destination bucket in a different region, reducing latency by enabling access to data from the nearest region, such as region B in this case." S3 Batch, S3 Versioning, and Same-Region replication do not address cross-region latency.

NEW QUESTION # 61

(What should be used to monitor estimated AWS charges?)

- A. Cognito
- B. Forecast
- C. Pricing Calculator
- D. Billing alarm

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A Billing alarm in Amazon CloudWatch should be used to monitor estimated AWS charges by setting thresholds on cost metrics and triggering notifications when exceeded. This helps manage budgets effectively.

The WGU Cloud Deployment and Operations Study Guide (Section 7.4, Cost Monitoring) states, "Billing alarms in CloudWatch monitor estimated charges against a defined threshold, sending alerts via SNS to prevent cost overruns." Cognito handles user authentication, Pricing Calculator estimates costs pre-deployment, and Forecast predicts usage, none of which monitor real-time charges.

NEW QUESTION # 62

(Which two locations can Amazon Inspector publish its findings in when it has detected an anomaly? Choose 2 answers.)

- A. SQS
- B. CloudWatch
- C. SNS
- D. CloudTrail

Answer: B,C

Explanation:

Amazon Inspector can publish its findings when detecting anomalies to Amazon SNS for real-time notifications and to CloudWatch for metric and event logging, enabling monitoring and response. The WGU Cloud Deployment and Operations Study Guide (Section 6.2, Amazon Inspector) states, "Inspector findings are published to SNS for immediate alerts and to CloudWatch for detailed logging, allowing integration with other AWS services for anomaly response." CloudTrail logs API calls, and SQS is a messaging queue, neither of which are primary destinations for Inspector findings.

NEW QUESTION # 63

.....

Creativity is coming from the passion and love of knowledge. Every day there are many different new things turning up. So a wise and diligent person should absorb more knowledge when they are still young. At present, our Cloud-Deployment-and-Operations study prep has gained wide popularity among different age groups. Most of the real exam questions come from the adaption of our Cloud-Deployment-and-Operations test question. In fact, we get used to investigate the real test every year. The similarity between our study materials and official test is very amazing. In a word, your satisfaction and demands of the Cloud-Deployment-and-Operations Exam braindump is our long lasting pursuit. Hesitation will not generate good results. Action always speaks louder than words. Our Cloud-Deployment-and-Operations study prep will not disappoint you. So just click to pay for it.
