Newest Splunk Brain Dump SPLK-3002 Free - SPLK-3002 Free Download

Comparing to other training institution, our valid SPLK-3002 vce dumps are affordable, latest and cost-effective, which can overcome the difficulty of valid SPLK-3002 Actual Test and ensure you pass the exam. It can not only save your time and money, but also help you clear Splunk practice exam with high rate.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which capabilities are enabled through "teams"?

- A. Teams allow restrictions to service content in UI views.
- B. Teams restrict searches against the itsi_notable_audit index.
- C. Teams restrict notable event alert actions.
- D. Teams allow searches against the itsi_summary index.

Answer: A

Explanation:

D is the correct answer because teams allow you to restrict access to service content in UI views such as service analyzers, glass tables, deep dives, and episode review. Teams also control access to services and KPIs for editing and viewing purposes. Teams do not affect the ability to search against the itsi_summary index, restrict notable event alert actions, or restrict searches against the itsi_notable_audit index.

References: Overview of teams in ITSI

NEW QUESTION # 17

Which index contains ITSI Episodes?

- A. itsi_notable_archive
- B. itsi_summary
- C. itsi_tracked_alerts
- D. **itsi_grouped_alerts**

Answer: D

Explanation:

Reference:

B is the correct answer because ITSI episodes are stored in the itsi_grouped_alerts index. This index contains notable events that have been grouped together based on predefined aggregation policies. Episodes help you reduce alert noise and focus on resolving incidents faster. Reference: [Overview of episodes in ITSI]

NEW QUESTION # 18

When must a service define entity rules?

- A. If some or all of the KPIs in the service will be split by entity.
- B. If the intention is for the KPIs in the service to have different aggregate vs. entity KPI values.
- C. **If the intention is for the KPIs in the service to filter to only entities assigned to the service.**
- D. To enable entity cohesion anomaly detection.

Answer: C

Explanation:

Provide a value to filter the service to a specific set of entities. These entity rule values are meant to be custom for each service. Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/EntityRules> A is the correct answer because a service must define entity rules if the intention is for the KPIs in the service to filter to only entities assigned to the service. Entity rules are filters that match entities to services based on entity aliases or entity metadata. If you enable the Filter to Entities in Service option for a KPI, you need to define entity rules for the service to ensure that the KPI search results only include the relevant entities for the service. Otherwise, the KPI search results might include entities that are not part of the service or exclude entities that are part of the service. References: [Define entities for a service in ITSI], [Configure KPI settings in ITSI]

NEW QUESTION # 19

Which capabilities are enabled through "teams"?

- **A. Teams allow restrictions to service content in UI views.**
- B. Teams restrict searches against the itsi_notable_audit index.
- C. Teams restrict notable event alert actions.
- D. Teams allow searches against the itsi_summary index.

Answer: A

Explanation:

D is the correct answer because teams allow you to restrict access to service content in UI views such as service analyzers, glass tables, deep dives, and episode review. Teams also control access to services and KPIs for editing and viewing purposes. Teams do not affect the ability to search against the itsi_summary index, restrict notable event alert actions, or restrict searches against the itsi_notable_audit index. Reference: Overview of teams in ITSI

NEW QUESTION # 20

Which of the following is an advantage of an adaptive time threshold?

- A. Automatically alerting when KPI value patterns change over time.
- B. Automatically predicting future degradation of KPI values over time.
- **C. Automatically adjusting thresholds as normal KPI values change over time.**
- D. Automatically adjusting to holiday schedules.

Answer: C

Explanation:

An adaptive time threshold in the context of Splunk IT Service Intelligence (ITSI) refers to the capability of dynamically adjusting threshold values for Key Performance Indicators (KPIs) based on historical data trends and patterns. This feature allows thresholds to evolve as the 'normal' behavior of KPIs changes over time, ensuring that alerts remain relevant and reduce the likelihood of false positives or negatives. The advantage of this approach is that it accommodates for natural fluctuations in KPI values that may occur due to changes in business operations, seasonality, or other factors, without requiring manual threshold adjustments. This makes the monitoring system more resilient and responsive to actual conditions, improving the overall effectiveness of IT operations management.

NEW QUESTION # 21

.....

We strongly advise you to buy our online engine and windows software of the SPLK-3002 study materials, which can simulate the real test environment. There is no doubt that you will never feel bored on learning our SPLK-3002 practice materials because of the smooth operation. You will find that learning is becoming interesting and easy. And you will be more confident to pass the exam since that you have experience the Real SPLK-3002 Exam.
