

Valid VMware 2V0-16.25 Test Preparation | 2V0-16.25 Reliable Test Preparation

P.S. Free & New 2V0-16.25 dumps are available on Google Drive shared by Exam4Free: <https://drive.google.com/open?id=18WSafatYOza0DL5-sAWPREEaTxYXtdLy>

There are three formats of Exam4Free practice material. Anyone can try a free demo to assess the quality of our VMware product before buying. The VMware vSphere Foundation 9.0 Administrator (2V0-16.25) PDF file of actual questions, web-based VMware vSphere Foundation 9.0 Administrator practice exam, and desktop practice test are three formats of Exam4Free. The 2V0-16.25 PDF Questions are printable which means you can do off-screen study.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 2	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 3	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 4	<ul style="list-style-type: none"> • VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

Topic 5	<ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

2V0-16.25 Reliable Test Preparation, 2V0-16.25 Test Collection Pdf

Don't you want to make a splendid achievement in your career? Certainly hope so. Then it is necessary to constantly improve yourself. Working in the VMware industry, what should you do to improve yourself? In fact, it is a good method to improve yourself by taking VMware certification exams and getting VMware certificate. VMware certificate is very important certificate, so more and more people choose to attend 2V0-16.25 Certification Exam.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

An administrator has successfully deployed the VMware Cloud Foundation (VCF) Installer appliance to begin a new VMware vSphere Foundation (VVF) deployment. The VMware ESX hosts are powered on and meet all hardware and connectivity prerequisites.

What is the next step to begin deploying vSphere Foundation?

- A. Manually deploy the vCenter Server Appliance.
- **B. Launch the VCF Installer deployment wizard.**
- C. Enable SSH on all ESX hosts.
- D. Install SDDC Manager using the VCF Installer.

Answer: B

Explanation:

After successfully deploying the VCF Installer appliance, and ensuring ESXi hosts are powered on and meet prerequisites, the next steps to:

* Launch the VCF Installer deployment wizard, which guides administrators through host onboarding, vCenter deployment, and cluster setup for vSphere Foundation.

Other options:

* A. Enable SSH on all ESX hosts# Not required unless troubleshooting.

* C. Install SDDC Manager using VCF Installer# Only applies to full Cloud Foundation, not vSphere Foundation deployment.

* D. Manually deploy vCenter Server Appliance# The Installer wizard automates this.

NEW QUESTION # 46

An administrator is tasked with creating dashboards to track system performance metrics for both the IT department and executive leadership. The requirements for this task are:

* The IT team needs detailed, technical metrics across all of the infrastructure components in the environment.

* The executives need high-level summaries that highlight Key Performance Indicators (KPIs) across the environment in a single dashboard.

* The executives need to access the dashboard via a shared URL.
* The dashboards must be capable of being shared, and always display the latest data collected when the link is used.
What two steps should the administrator perform to meet these requirements? (Choose two.)

- **A. Create a Custom dashboard in VCF Operations to highlight Key Performance Indicators.**
- B. Create a Custom dashboard in VCF Operations for Logs to display the Key Performance Indicators.
- **C. Use Out-of-the-Box dashboards in VCF Operations to display detailed technical metrics.**
- D. Use Out-of-the-Box dashboards in VCF Automation to highlight Key Performance Indicators.

Answer: A,C

Explanation:

To satisfy both IT and executive requirements:

- * IT team# Needs detailed technical metrics, which are available through Out-of-the-Box dashboards in VCF Operations. (A)
- * Executives# Need a custom KPI-focused dashboard, with summaries and high-level visibility. This can be shared via a URL link that always shows the latest data. (B) Why others are incorrect:
- * C. Custom dashboard in VCF Operations for Logs# Logs are not KPI-focused performance metrics.
- * D. Out-of-the-Box dashboards in VCF Automation# VCF Automation is not designed for KPI reporting.

NEW QUESTION # 47

Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- **A. VCF Operations for Logs**
- B. Fleet Manager
- C. VCF Operations
- D. VCF Operations for Networks

Answer: A

Explanation:

After deploying vSphere Foundation, to centralize log collection and analysis, you must add:

- * VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.

Other options:

- * B. VCF Operations# Focuses on performance/capacity, not log collection.
- * C. VCF Operations for Networks# Focuses on networking insights.
- * D. Fleet Manager# Used for multi-instance management, not logging.

NEW QUESTION # 48

Which scenario demonstrates the benefit of server consolidation using VMware server virtualization?

- A. Automating the deployment of application clusters.
- B. Providing protection against ransomware attacks.
- C. Performing load balancing between web servers.
- **D. Running multiple independent machines on a single physical host.**

Answer: D

Explanation:

The core benefit of server consolidation using VMware server virtualization is the ability to run multiple independent virtual machines (VMs) on a single physical host.

- * This increases hardware utilization, reduces physical server sprawl, and cuts operational costs.
- * A. Load balancing# Achieved through features like DRS, not basic server consolidation.

- * C. Ransomware protection# Achieved through security features and backups, not consolidation.
- * D. Automating application clusters# A benefit of orchestration tools, not consolidation.

NEW QUESTION # 49

An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location. The following is available at the remote location:

- * Two ESX servers.
- * Two 1GbE network cards per ESX.
- * One sixteen port 1GbE Switch.
- * One NVMe per ESX for the Operating System.
- * One storage system supporting network and fiber channel capabilities.

What storage protocol must the administrator use at the remote location?

- A. Fiber Channel
- **B. NFS**
- C. Local Storage
- D. vSAN

Answer: B

Explanation:

The scenario:

- * Remote site with 2 ESXi servers, 1GbE networking only.
- * Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.
- * Fiber Channel is not feasible (no FC switches/HBAs).
- * vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.

The most suitable solution:

- * Use NFS storage over 1GbE. (D)
- * Provides shared storage accessible to both ESXi hosts.

Other options:

- * A. vSAN# Needs 3+ nodes or a witness, not supported in this config.
- * B. Local storage# Not shared, fails HA/DRS requirements.
- * C. Fiber Channel# Requires HBAs and FC switch, not available.

NEW QUESTION # 50

.....

The 2V0-16.25 desktop practice test is accessible after software installation on Windows computers. However, you can take the web-based 2V0-16.25 practice test without prior software installation. All operating systems such as Mac, iOS, Windows, Linux, and Android support the web-based VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Practice Exam. Since it is an online VMware vSphere Foundation 9.0 Administrator 2V0-16.25 practice exam, therefore, you can take it via Chrome, Opera, Internet Explorer, Microsoft Edge, and Firefox. You can try free demos of 2V0-16.25 practice test and VMware vSphere Foundation 9.0 Administrator 2V0-16.25 PDF before buying to test their authenticity.
