Salesforce Manufacturing Cloud Accredited Professional Exam Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which two key performance indicators can be calculated on the Forecast Analysis dashboard in Tableau CRM for Manufacturing?

- A. Days Remaining
- B. Actual vs Forecasted Revenue
- C. Average Price
- D. Actual vs Planned Revenue
- E. Mean absolute percentage error in the forecast

Answer: A,B

NEW QUESTION # 117

Universal Containers (UC) has been in the manufacturing industry for many years. The industry has become much more volatile over the years. UC is looking to implement Manufacturing Cloud to manage this volatility.

Which specific business challenge does the implementation of Manufacturing Cloud tackle?

- A. Connecting stakeholders and assets for real-time collaboration in the field
- B. Gaining visibility in businesses to improve forecast accuracy and collaborate with stakeholders
- C. Connecting to potential buyers and predicting the likelihood of a sale

Answer: B

Explanation:

Manufacturing Cloud is a solution that enables manufacturers to align their sales and operations teams, improve account-based forecasting, and drive business outcomes. One of the main challenges that Manufacturing Cloud addresses is the volatility of the manufacturing industry, which makes it difficult to plan and execute production and distribution efficiently. By gaining visibility into the entire value chain, manufacturers can improve their forecast accuracy, collaborate with their stakeholders, and respond to changing customer needs and market conditions. NEW QUESTION # 118

What out-of-the-box Manufacturing Cloud function can be used to notify users if automated processes fail?

- A. Automated Processes Status report
- B. Email Notifications
- C. Manufacturing Cloud Home Page Notifications related
- D. Automated Processes Notifications

Answer: B

NEW QUESTION # 119

The warranty claim adjudicators on Universal Containers' global warranty team need visibility to all the claim-related data on a single page. This includes information on whether the asset is covered under warranty and a detailed breakup in terms of replaced parts and labor costs.

Which of the following permission set licenses do the claims adjudicators need for this?

- A. Industry Service Excellence and Warranty Lifecycle Management Psl
- B. Warranty Lifecycle Management Psl and Claims Management Foundation

- C. Service Console for Manufacturing and Warranty Lifecycle Management Psl

Answer: A

Explanation:

Industry Service Excellence and Warranty Lifecycle Management Psl are the permission set licenses that the claims adjudicators need for this requirement. Industry Service Excellence gives users access to the Service Console app, which provides a unified view of all the claim-related data on a single page. Warranty Lifecycle Management Psl gives users access to the Warranty Lifecycle Management features, which enable users to manage warranty contracts, claims, and entitlements. The other options are not sufficient for this requirement.

Service Console for Manufacturing does not include the Warranty Lifecycle Management features. Warranty Lifecycle Management Psl and Claims Management Foundation do not include the Service Console app. References: Permission Set Licenses, Set Up Users and Permissions for Manufacturing Cloud, Assign the Manufacturing Permission Sets to Users, Assign Users Permission Sets for Service Lifecycle Features in Manufacturing Cloud

NEW QUESTION # 120

A salesforce Manufacturing cloud admin wants to change the forecast frequency from quarterly to monthly in the account settings. Which two things do they need to be aware of?

- A. The administrator grants them to right make changes to the forecast settings in the adjustments.
- B. The length of the time that has elapsed since the last change to the forecast setting.
- **C. A full regeneration of all the eligible account forecasts will be carried out.**
- D. A recalculation of the forecast for the accounts added since the least update will be carried out
- **E. All the previously active account forecasts will expire**

Answer: C,E

Explanation:

Explanation

Changing the forecast frequency from quarterly to monthly in the account settings will affect the existing account forecasts in two ways:

* A full regeneration of all the eligible account forecasts will be carried out. This means that the existing account forecasts will be deleted and new ones will be created based on the new frequency. The regeneration process may take some time depending on the number of accounts and products involved1.

* All the previously active account forecasts will expire. This means that the account managers will not be

* able to view or edit the old account forecasts that were based on the quarterly frequency. They will only see the new account forecasts that are based on the monthly frequency2.
