Oracle Global Human Resources Cloud 2025 Implementation Professional Sample Questions (Q20-Q25):

NEW QUESTION # 20

Contextual Journeys are displayed:

- A. When initiating a Quick Action
- B. Only on Thursdays
- C. Via the employees' "Journeys" tile
- **D. In page or section headers**

Answer: D

Explanation:

Contextual Journeys in Oracle Global Human Resources Cloud provide relevant guidance or tasks based on the user's current context within the application. Per the "Using Journeys" guide, these journeys are displayed in page or section headers, appearing dynamically when a user is on a relevant page (e.g., during a promotion process, a Contextual Journey might appear in the transaction header). This distinguishes them from Guided Journeys, which are accessed via the Journeys tile. Option A (only on Thursdays) is nonsensical and incorrect.

Option B (Quick Action) relates to transaction initiation, not Contextual Journeys. Option D (Journeys tile) applies to Guided Journeys, not Contextual ones. Thus, Option C is correct.

NEW QUESTION # 21

Geography framework in HCM Cloud is used for the following purpose:

- A. To determine the address fields that display on a page when entering an address
- **B. To display the geographies of a given country accessible through a lookup value versus entering each geography in a free form field**
- C. To define all work locations for your organization

Answer: B

Explanation:

Full Detailed in Depth Explanation:

The Geography framework in Oracle HCM Cloud is designed to standardize and streamline the management of geographical data. Its primary purpose is to provide a structured, validated list of geographies (e.g., countries, states, cities) accessible via lookup values, rather than allowing free-form text entry, which reduces errors and ensures consistency. Option B (determining address fields) relates to address styles, not the geography framework itself. Option C (defining work locations) is a downstream use of geographies but not the framework's primary purpose. According to the Oracle HCM Cloud "Geographies Setup" documentation, the framework's key role is to enable lookup-based geography selection, making A the correct answer.

- D. The tool creates a structure of divisions, legal entities, business units, and departments
