## **C\_S4CPB\_2508 Official Study Guide & C\_S4CPB\_2508 Latest Exam Pdf**

Our C\_S4CPB\_2508 guide torrent is compiled by experts and approved by the experienced professionals. The language is easy to be understood to make any learners have no learning obstacles and our C\_S4CPB\_2508 study questions are suitable for any learners. The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our C\_S4CPB\_2508 Exam Torrent boosts timing function and the function to stimulate the exam. It is very easy to pass the C\_S4CPB\_2508 exam with our C\_S4CPB\_2508 learning guide.

### **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q20-Q25):**

#### **NEW QUESTION # 20**

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign PFCG profiles to a business role
- B. Maintain technical catalogs
- **C. Maintain restrictions**
- **D. Assign business catalogs to a business role**

**Answer: C,D**

#### **NEW QUESTION # 21**

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Extensibility using the Legacy System Migration Workbench
- **B. Guidance and simulation of the migration process**
- **C. Mapping source values to SAP S/4HANA target values**
- D. Combining the local and remote schema approaches into one migration project

**Answer: B,C**

Explanation:

The SAP S/4HANA Migration Cockpit is a tool that facilitates the transfer of business data from a source system to SAP S/4HANA. It uses migration objects to identify and transfer the relevant data for a specific business object. The SAP S/4HANA Migration Cockpit has the following characteristics1:

\* It allows mapping source values to SAP S/4HANA target values, as well as converting values that are migrated from source fields to target fields. This ensures data consistency and quality in the target system

\* It provides guidance and simulation of the migration process, as well as error handling and monitoring.

This helps to reduce the complexity and risk of data migration, and to ensure a smooth and successful data transfer.

\* It does not support extensibility using the Legacy System Migration Workbench (LSMW), which is a tool for data migration from legacy systems to SAP systems. The SAP S/4HANA Migration Cockpit has its own extensibility framework, the SAP S/4HANA Migration Object Modeler, which allows creating and enhancing migration objects2.

\* It does not combine the local and remote schema approaches into one migration project. The SAP S/4HANA Migration Cockpit offers three options for transferring data to SAP S/4HANA: using files, using staging tables, or using direct transfer from an SAP system1. Each option requires a separate migration project and has its own advantages and limitations3.

References = 1: SAP S/4HANA Migration Cockpit | SAP Help Portal 2: [SAP S/4HANA Migration Object Modeler | SAP Help Portal] 3: [Options for Transferring Data | SAP Help Portal]

### NEW QUESTION # 22

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Key user extensibility
- B. Classic extensibility
- C. Side-by-side extensibility
- D. Developer extensibility

**Answer: C**

### NEW QUESTION # 23

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create standard procedures from SAP Signavio Process Navigator
- B. To create cross-product workflow procedures
- C. To create business processes with a high number of people involved in a pre-defined sequence
- D. To create very simple release or approval procedures
- E. To create complex, repeated work processes with iterative cycles

**Answer: B,C,E**

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

\* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.

\* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.

\* To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

### NEW QUESTION # 24

In which application can you see the available business context capacity remaining for extension items?

- A. Custom Reusable Elements app
- B. Extensibility Inventory app
- C. Extensibility Cockpit app
- D. Extensibility Explorer app

**Answer: C**

Explanation:

The Extensibility Cockpit app within SAP S/4HANA Cloud Public Edition is a central tool for managing and monitoring the extensibility aspects of the system. It provides an overview of the extension items created, including custom fields, custom business objects, and other extension elements. Importantly, it also shows the available business context capacity remaining for these extension items, which is crucial for ensuring that the system's extensibility is managed within the provided limits. This helps in planning and managing customizations effectively, ensuring that the system remains scalable and performant.
