

Ace the Cisco 300-425 Exam preparation material with Three Formats

P.S. Free & New 300-425 dumps are available on Google Drive shared by BraindumpsVCE: https://drive.google.com/open?id=1yfEWpsJEqrFGDRGdmA_5A_XtpHf793p

Which one is your favorite way to prepare for the exam, PDF, online questions or using simulation of exam software? Fortunately, the three methods will be included in our 300-425 exam software provided by BraindumpsVCE, so you can download the free demo of the three version. Choosing the right method to have your exam preparation is an important step to obtain 300-425 Exam Certification. Certainly, we ensure that each version of 300-425 exam materials will be helpful and comprehensive.

Cisco 300-425 certification exam tests the candidate's knowledge of wireless network design principles and best practices, as well as their ability to configure and troubleshoot wireless network infrastructure. 300-425 exam also covers topics such as network management, site surveys, and wireless network security. Candidates who Pass 300-425 Exam will have demonstrated their ability to design and deploy secure, scalable, and reliable wireless networks in large organizations.

300-425 Vce Files, 300-425 Braindump Pdf

BraindumpsVCE addresses this issue by offering real Cisco 300-425 Questions. BraindumpsVCE's team of professionals worked tirelessly to create the 300-425 questions, ensuring that applicants have access to the most recent and genuine 300-425 Exam

Questions. With BraindumpsVCE's help, you can pass the 300-425 exam on your first attempt or claim a refund according to certain terms and conditions.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q88-Q93):

NEW QUESTION # 88

An engineer has successfully configured high availability and SSO using two Cisco 5508 Wireless LAN Controllers. The engineer can access the Active Primary WLC, but the Secondary Standby WLC is not accessible. Which two methods allow access to the standby unit? (Choose two.)

- A. SSH to the redundancy management interface of the primary WLC
- **B. via the console connection**
- **C. SSH to the service port interface**
- D. SSH to the management interface of the primary WLC
- E. SSH to the virtual interface of the secondary WLC

Answer: B,C

Explanation:

In a high availability setup with Cisco 5508 Wireless LAN Controllers, the standby controller can be accessed via the console connection and the service port interface. The console provides direct access, while the service port interface allows for network-based access to the standby unit for management purposes.

Once SSO is enabled, the Standby WLC can be accessed via console connection or via SSH on the service port and on the redundant management interface.

NEW QUESTION # 89

A customer has determined that aesthetics is a primary concern for their upcoming guest deployment. Which design consideration can be leveraged to address this concern?

- A. Use AIR-AP-BRACKET-1 to allow for greater mounting locations
- **B. Deploy environmentally friendly cabling components to blend into the environment.**
- C. Paint the access point to cover the LED from being noticeable.
- D. Use enclosures to hide the wireless infrastructure in the surrounding environment.

Answer: B

Explanation:

- Use cables that are resistive to bend loss if excessive bending of cables cannot be prevented due to installation constraints.
- **Avoid mounting the cabling components in places that block accessibility to other equipment (such as a power strip or fans) in and out of the racks.**

NEW QUESTION # 90

A customer has multiple WLCs running in N+1 redundancy with APs load balanced between the WLCs. The customer performs AP failover testing between the WLCs and notices that some of the APs do not move back to their primary WLC after it recovers. What are two points that must be addressed in the design? (Choose two.) APs do not have their primary WLC information configured correctly.

- A. APs do not have their secondary WLC information configured correctly.
- **B. APs failover priorities are set to Low**
- C. DHCP Option 43 information is Incorrect
- **D. AP Fallback is not enabled on one of the WLCs.**

Answer: B,D

NEW QUESTION # 91

An engineer is conducting a Layer 2 site survey. Which type of client must the engineer match to the survey?

- A. phone client
- B. normal client
- C. worst client available
- D. best client available

Answer: C

Explanation:

When conducting a Layer 2 site survey, it is recommended to match the survey to the worst client available. This ensures that the wireless network is designed to provide adequate coverage and performance even for the clients with the poorest capabilities, thereby ensuring a consistent user experience for all devices.

<https://www.cisco.com/c/en/us/support/docs/wireless/5500-series-wireless-controllers/116057-site-survey-guide1>

NEW QUESTION # 92

A university wants to deploy a high density of APs in an area where a high number of users congregate. Which functionality allows the university to optimize the RF settings for APs that operate in different environments or coverage zones?

- A. AP groups
- B. RF profiles
- C. AP profiles
- D. RF groups

Answer: B

Explanation:

RF profiles let you define distinct RF parameter sets (power levels, channel-width, channel-selection policies, RRM settings, etc.) for different deployment environments, such as high-density zones versus general coverage areas, and then assign those profiles to the appropriate APs or AP groups.

NEW QUESTION # 93

.....

The authority of BraindumpsVCE in Cisco 300-425 exam questions rests on its being high-quality and prepared according to the latest pattern. BraindumpsVCE is proud to announce that our Cisco 300-425 Exam Dumps help the desiring candidates of Cisco 300-425 certification to climb the ladder of success by grabbing the Cisco Exam Questions.
