- C. Stock in transportation units
- D. Stock on resources

Answer: A,D

Explanation:

Option C ("Reserved stock") is correct as it shows stock allocated for specific tasks or orders, viewable under nodes like "Stock and Bin" in transaction /SCWM/MON. Option D ("Stock on resources") is correct because it displays stock currently handled by resources (e.g., forklifts), also accessible in the monitor. Option A ("Stock in transit") is managed between warehouses and not typically detailed in the EWM monitor, while option B ("Stock in transportation units") relates to transportation management, not warehouse stock visibility.

Comprehensive and Detailed In-Depth Explanation:

In SAP EWM, resources (e.g., forklifts, workers) are assigned attributes for task execution. Option A ("Resource type") is correct as it defines the resource's capabilities (e.g., forklift), and option C ("Resource group") is correct because it groups resources for assignment rules, both configured in SPRO: SCM Extended Warehouse Management > Resource Management > Define Resource Type and Define Resource Group. Option B (bin access type) is bin-related, and option D (handling unit type) is HU-specific, neither directly assigned to resources.

#### NEW QUESTION # 43
