NCA-6.5 New Exam Braindumps - Practice NCA-6.5 Exam Online

Are you still worried about not able to pass NCA-6.5 exam certification? Then you can ask Actual4Exams for help. It can bring you the master of the sophisticated techniques of IT industry and help you pass NCA-6.5 certification exam easily. With Actual4Exams's efforts for years, the passing rate of NCA-6.5 Certification Exam has reached as high as 100%. Choosing Actual4Exams is to choose the way to go to a beautiful future.

Nutanix NCA-6.5 (Nutanix Certified Associate (NCA) v6.5) Exam is a certification exam designed for IT professionals who want to validate their skills and knowledge in managing and deploying Nutanix solutions. Nutanix is a leading provider of hyper-converged infrastructure (HCI) solutions that simplify IT operations and enhance business agility. The NCA-6.5 Exam Tests the candidate's ability to install, configure, and manage Nutanix systems, as well as troubleshoot common issues.

Nutanix Certified Associate (NCA) v6.5 exam Sample Questions (Q27-Q32):

NEW QUESTION # 27
An administrator wants to view VMs with NGT Installed and Filter by their installed guest operating systems.
How can this task most quickly be accomplished within prism central?

- A. Create a custome Focus using the OS Column

- B. In the VM dashboard , filter by the nutanix Guest tools - OS field
- C. use the Prism central analysis Panel to create a pie chart by OSType
- D. Use a pre-defined Prism Central report

Answer: B

Explanation:
Explanation/Reference:
Please Re Check From your Side and let me know if the question correction is required

NEW QUESTION # 28
An administrator is unable to discover a Nutanix-hosted iSCSI block device allocated to a bare-metal host.
What is causing this issue?

- A. External host IP address is not in the Filesystem Whitelist
- B. External client access has not been enabled for the host
- C. Jumbo frames has not been configured on the switch
- D. Network segmentation has not been enabled

Answer: A

Explanation:
Nutanix Volumes uses a Filesystem Whitelist to control which external hosts can access the iSCSI block devices allocated to them.
If the external host IP address is not in the Filesystem Whitelist, it will not be able to discover or connect to the Nutanix-hosted iSCSI block device. Jumbo frames, external client access, and network segmentation are not required for Nutanix Volumes to work.

NEW QUESTION # 29
An administrator is upgrading a current three-node Nutanix cluster with new HCI nodes. Currently, the environment is based on a Single two-unit chassis hosted in one cabinet.
By simply changing the system form factor, what new level of resiliency may this customer achieve?

- A. Better replication factor
- B. Rack awareness
- C. Block awareness
- D. Metro Availability

Answer: C

NEW QUESTION # 30
User are complaining that web application hosted on a Nutanix cluster are running slow. After reviewing the performance metric, it is determined that the CPU Ready time is high in the cluster.
What entity is impacted by CPU ready time?

- A. NIC
- B. vDisk
- C. Oplog
- D. VM

Answer: C

Explanation:
The oplog is a critical component of the Nutanix distributed storage fabric and can be impacted by high CPU Ready time. When the CPU Ready time is high, there can be delays in writing data to the oplog, resulting in slower overall cluster performance.
Additionally, high CPU Ready time can also lead to increased write amplification, further reducing I/O performance.

NEW QUESTION # 31
An administrator needs to send weekly performance reviews to several line of business managers about VMs they are managing. Which tool should the administrator use to satisfy this task?

- A. Prism Central Projects with data export
- B. Prism Central Reports with a schedule
- C. Prism Elements Links to Chart analysis
- D. Prism Elements New Alert policy

Answer: B

Explanation:
To send weekly performance reviews to several line of business managers about VMs they are managing, the administrator should use Prism Central Reports with a schedule. Prism Central Reports is a tool that allows the administrator to create custom reports, which can include information such as CPU usage, memory usage, and disk I/O for specific VMs. The administrator can schedule the reports to be generated and sent out on a regular basis, such as weekly. This will allow the line of business managers to review the performance of the VMs they are responsible for on a regular basis, and take appropriate actions if necessary.
