

# Latest JN0-224 Test Question - JN0-224 Official Practice Test

JN0-224 Exam Details	
Vendor	Juniper
Exam Code	JN0-224
Full Exam Name	Automation and DevOps Associate
Number of Questions	65
Sample Questions	<a href="#">Juniper JN0-224 Sample Questions</a>
Practice Exams	<a href="#">Juniper Networks Certified Associate Automation and DevOps Practice Test</a>
Passing Score	Pass / Fail (60-70% Approx.)
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with NWExam.com

P.S. Free 2026 Juniper JN0-224 dumps are available on Google Drive shared by ExamBoosts: <https://drive.google.com/open?id=1cSA5NtsuVs5n6eB1Jul5PVMhl61rFjk>

With the pass rate of more than 98%, our JN0-224 training materials have gained popularity in the market. We also pass guarantee and money back guarantee for you fail to pass the exam by using the JN0-224 exam dumps, or you can replace other 2 valid exam dumps, at the same time, you can also get the free update for JN0-224 Training Materials. In addition, we use the international recognition third party for payment, therefore your money safety is guaranteed. We support online payment with credit card.

## Juniper JN0-224 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Python</li><li>• PyEZ: This domain examines Python programming with PyEZ library for Junos automation, including JSNAPy, Jinja2 templates, RPC calls, exception handling, and device configuration management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Data Serialization: This domain addresses YAML and JSON formats used for structured data representation and exchange in network automation workflows.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• NETCONF</li><li>• XML API: This domain focuses on XML syntax, XPath expressions, NETCONF protocol, and XML API functionality for programmatic device configuration and communication.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Junos Automation Stack and DevOps Concepts: This domain covers fundamental automation tools, frameworks, APIs, and DevOps culture applicable to Junos platform operations and network management.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Rest API: This domain covers Junos REST API implementation, REST API Explorer tool, and cURL usage for HTTP-based device management and configuration.</li></ul>

## JN0-224 Official Practice Test & New JN0-224 Exam Question

If someone who can pass the exam, they can earn a high salary in a short time. If you decide to beat the exam, you must try our JN0-224 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our Automation and DevOps, Associate (JNCIA-DevOps) prep torrent as the studying materials. So it is worthy for them to buy our product. We provide the introduction of the features and advantages of our JN0-224 Test Prep

as follow so as to let you have a good understanding of our product before your purchase.

## Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q64-Q69):

### NEW QUESTION # 64

You want to use a Python package or module.

In this scenario, which statement would accomplish this task?

- A. input
- **B. Import**
- C. reap
- D. dir

**Answer: B**

Explanation:

In Python, to use a package or module, you use the import statement. This statement allows you to load a module into your script so that you can use its functions, classes, and variables. For example, if you wanted to use the math module, you would write import math. This makes all the functions and constants in the math module available for use in your program.

Option A (reap), B (dir), and C (input) do not serve the purpose of importing modules. dir is used to list the attributes of an object, input is used to get user input, and reap is not a valid Python command related to importing modules.

Supporting Reference:

Python Documentation on Imports: The Python documentation provides clear guidelines on how to use the import statement to include modules in your Python scripts.

### NEW QUESTION # 65

Which feature is used in XML to ensure that all attributes and elements have unique names?

- **A. XPath**
- B. predicate
- C. namespace
- D. selectors

**Answer: A**

### NEW QUESTION # 66

Which two statements about XML schema definition (XSD) files are correct? (Choose two.)

- **A. XSD files ensure that everyone working with the XML document uses a common set of tags.**
- B. Every XML document must have an XSD file defined for it.
- **C. XSD files define all the elements in an XML document and the document XML hierarchy.**
- D. An XSD file is not an XML document.

**Answer: A,C**

Explanation:

XML Schema Definition (XSD) files are used to define the structure and data types of an XML document. They ensure that the XML document adheres to a specific structure by defining the allowed elements, attributes, and their data types, thereby enforcing a consistent format.

Option A is correct because XSD files define the elements, attributes, and structure (hierarchy) of an XML document.

Option D is correct because XSD files provide a standardized format, ensuring that all parties working with the XML document use the same set of tags and structure.

Option B (Every XML document must have an XSD file defined for it) is incorrect; not every XML document requires an XSD file, although it's beneficial for validation.

Option C (An XSD file is not an XML document) is incorrect because XSD files themselves are written in XML.

Supporting Reference:

W3C XML Schema Definition (XSD) Documentation: Explains the purpose and structure of XSD files, including their role in defining XML document schemas.

### NEW QUESTION # 67

You must use Junos PyEZ to configure unique IP addresses on individual machines. Which two features will permit this requirement? (Choose). Ian SCP module

- A. a YAML data file
- B. a Jinja2 template
- C. an SCP module
- D. a BSON data file

**Answer: A,B**

Explanation:

To configure unique IP addresses on individual machines using Junos PyEZ, you can use the following features:

YAML Data File (C): YAML files are used to store configuration data in a human-readable format. They are often used in combination with Jinja2 templates to provide the data necessary for template rendering.

Jinja2 Template (D): Jinja2 is a templating engine for Python that allows you to create dynamic templates. When used with Junos PyEZ, a Jinja2 template can be filled with data (such as IP addresses from a YAML file) to generate configuration snippets that are applied to different devices.

Options A (SCP module) and B (BSON data file) are not typically used with Junos PyEZ for this purpose.

Reference:

Junos PyEZ Documentation: Discusses the use of YAML files and Jinja2 templates for generating configurations.

Jinja2 Templating Documentation: Provides details on how to create and use templates in Python scripts.

### NEW QUESTION # 68

You are asked to write an on-box script that will be triggered when a specific interface on a Junos device goes down. Which type of on-box script should you use to accomplish this task?

- A. operation
- B. SNMP
- C. event
- D. commit

**Answer: C**

Explanation:

An event script is used to automate responses to system events in Junos, such as an interface going down. These scripts are triggered automatically when a specified event occurs, making them suitable for tasks like monitoring interface status and executing actions when the status changes.

Option B (event) is correct because event scripts are designed for reacting to system events like an interface going down.

Option A (commit) is used for configuration changes, Option C (operation) is used for operational tasks, and Option D (SNMP) is not applicable in this context.

Supporting Reference:

Juniper Networks Event Scripts Documentation: Details how event scripts are used to automate responses to specific system events in Junos

### NEW QUESTION # 69

.....

Through years of marketing, our JN0-224 latest certification guide has won the support of many customers. The most obvious data is that our products are gradually increasing each year, and it is a great effort to achieve such a huge success thanks to our product development. First of all, we have done a very good job in studying the updating of materials. In addition, the quality of our JN0-224 real study braindumps is strictly controlled by teachers. So, believe that we are the right choice, if you have any questions about our study materials, you can consult us.
