Tried Exams ot ActualTestsQuiz, you know this is something you do everything possible to want, and it is really perfect for the exam preparation.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q36-Q41):

NEW QUESTION # 36

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI- powered solutions should they implement? Note: There are 3 correct answers to this question.

- A. SAP Predictive Analytics
- B. SAP Cloud ERP
- C. SAP AI Business Services
- D. SAP Digital Manufacturing Cloud
- E. SAP BusinessObjects Planning

Answer: A,C,D

Explanation:

For a logistics company aiming to reduce delivery delays and optimize inventory management, SAP offers AI- powered solutions that enhance supply chain efficiency and forecasting. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Digital Manufacturing Cloud, as these solutions directly address logistics challenges with AI-driven capabilities.

SAP documentation highlights: "Create a risk-resilient and sustainable supply chain with built-in AI that is connected and contextualized. Enabling you to predict customer demand and adjust to change." SAP AI Business Services provide reusable AI capabilities, such as machine learning for demand forecasting and anomaly detection, which help "optimize supply chain operations by analyzing real-time data and market trends." SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, supports "predicting customer demand and adjusting inventory levels" to minimize delays and overstocking. SAP Digital Manufacturing Cloud leverages AI to "optimize production scheduling and inventory management," ensuring efficient logistics operations by integrating real-time data from manufacturing and supply chain processes.

The incorrect options-SAP BusinessObjects Planning and SAP Cloud ERP-are not primarily AI-driven for logistics. SAP BusinessObjects Planning focuses on financial planning and analytics, not logistics-specific AI applications. SAP Cloud ERP, while encompassing AI capabilities, is too broad and not specifically tailored to logistics compared to the selected solutions. SAP's case study on Henkel illustrates how AI in SAP Business Technology Platform enhances supply chain resilience, supporting the relevance of the chosen solutions.

NEW QUESTION # 37

Match the outcomes in the dropdown lists to the capabilities of Joule

Answer:

Explanation:

NEW QUESTION # 38

How does SAP AI improve financial forecasting and reporting?
There are 3 correct answers to this question.
Response:

- A. Automated financial risk assessment
- B. SAP Blockchain for invoice validation
- C. AI-powered predictive analytics for financial trends
- D. AI-based anomaly detection in financial transactions
- E. Conversational AI for customer service automation

Answer: A,C,D

NEW QUESTION # 39

Which key advantage does SAP Business AI provide to organizations? Please choose the correct answer.

- A. Predictive insights for decision-making
- B. Manual business process execution
- C. Automated financial accounting processes
- D. Isolated data storage without AI integration

Answer: A

Explanation:
SAP Business AI delivers a transformative advantage by embedding AI into business processes to enhance decision-making. The correct answer is "Predictive insights for decision-making," as this is a core advantage highlighted across SAP's AI offerings. SAP documentation emphasizes: "SAP Business AI offers capabilities such as predictive analytics, natural language processing, and machine learning to enhance decision-making, provide personalized insights, ensure intelligent automation of tasks, and improve business processes within the SAP ecosystem." Predictive insights enable organizations to "forecast trends, optimize operations, and make data-driven decisions" across functions like finance, supply chain, and marketing. For example, SAP S/4HANA uses predictive analytics to

"forecast expected incoming payments," while SAP Customer Experience leverages AI to predict customer behavior for targeted campaigns. Henkel's use of SAP Business Technology Platform with AI illustrates how predictive insights drive supply chain resilience and operational efficiency.

The incorrect options do not reflect SAP Business AI's core advantages. Automated financial accounting processes are a specific use case, not the primary advantage. Manual business process execution contradicts SAP's automation focus. Isolated data storage without AI integration is contrary to SAP's integrated, AI- driven architecture. Predictive insights stand out as the overarching advantage, as they enable proactive and informed decision-making across the enterprise.

NEW QUESTION # 40

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Ecosystem of Innovation
- B. Embedded AI
- C. Predictive Analytics
- D. Large Foundation Models
- E. AI Foundation

Answer: A,B,E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.
Exact extracts supporting this:
Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com
AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem.
Other options are incorrect because:
Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.
Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business

grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C_BCBAI_2502 materials.
