NCP-DB-6.10考古題介紹 - NCP-DB-6.10證照考試

想要通過 NCP-DB-6.10 認證考試並不是僅僅依靠與考試相關的書籍就可以辦到的。與其盲目地學習考試要求的相關知識，不如做一些有價值的試題。Testpdf為您提供一個明確的和特殊的解決方案，我們為您提供詳細的 Nutanix NCP-DB-6.10 的問題和答案。我們的專家來自不同地區有經驗的技術專家編寫 NCP-DB-6.10 考古題。我們的 NCP-DB-6.10 考古題是我們經過多次測試和整理得到的擬真題，確保考生順利通過NCP-DB-6.10 考試。

最新的 Nutanix Certified Professional (NCP) NCP-DB-6.10 免費考試真題 (Q222-Q227):

問題 #222

An administrator created a database clone that is scheduled for removal on the last day of the month.

A request has been received to keep the clone for an additional 14 days. After selecting the desired clone, how should the administrator satisfy this task?

- A. Remove the Removal schedule, then add the desired removal schedule.
- B. Update the Removal schedule to the end of the month.
- C. Update the Removal schedule to the desired date.
- **D. Select Update and modify the Removal schedule.**

答案：D

解題說明：

The Removal schedule is a feature of Nutanix Era that allows you to specify when a database clone will be automatically deleted. You can modify the Removal schedule of an existing clone by selecting the clone from the Clones page, clicking on the Update

button, and changing the Removal schedule option to the desired date. This way, you can extend or shorten the lifespan of a clone as per your requirements. You do not need to remove the existing Removal schedule and add a new one, as this would be an unnecessary step. You also do not need to update the Removal schedule to the end of the month, as this would not meet the request of keeping the clone for an additional 14 days.

問題 #223

An administrator has been tasked to deploy Microsoft SQL servers in an Active Directory environment, selecting a specific service account to start up the database. Which configuration should be set?

- A. Compute profile
- B. Sysprep Windows image
- C. Windows domain profile
- D. Database parameters

答案： C

解題說明：

To deploy Microsoft SQL Servers in an Active Directory (AD) environment and select a specific service account to start up the database, the administrator must configure a Windows domain profile in NDB. A Windows domain profile defines the AD integration settings, including the service account credentials (e.g., username and password) that NDB uses to authenticate and manage the SQL Server instances. This configuration ensures the database starts and runs under the specified AD service account, aligning with enterprise security policies.

問題 #224

An administrator selected Bronze SLA for Era Time Machine during database registration. Which two capabilities are supported by the Time Machine for this database? (Choose two,)

- A. Provwonng
- B. Log Catch up
- C. Snapshots
- D. Cloning

答案： B,C

解題說明：

The Nutanix Era Time Machine provides various capabilities depending on the Service Level Agreement (SLA) selected during database registration. For a database with a Bronze SLA, the Time Machine supports both "Log Catch up" and "Snapshots". "Log Catch up" allows the Time Machine to keep up with the latest changes in the database by capturing log data. "Snapshots" are point-in-time copies of the database that can be used for recovery or cloning.

問題 #225

An administrator needs to patch a PostgreSQL database server VM from version 13.4 to 13.8. What is the first step within the NDB patching workflow to accomplish this task?

- A. Create a maintenance window and add this PostgreSQL server 13.8 to the queue.
- B. Create a new Database Parameters profile for PostgreSQL server 13.8.
- C. Create a new Software Profile with PostgreSQL 13.8.
- D. Create a Software Profile Version with PostgreSQL 13.8.

答案： D

解題說明：

NDB supports patching for PostgreSQL database instances. Patching for PostgreSQL is validated on VMs provisioned by NDB (greenfield deployments). To patch PostgreSQL database server VMs, you must create a software profile version by uploading the PostgreSQL update file in NDB. You can then use the PostgreSQL update to patch other database server VMs or provision a new database server VM with the updated software profile. The first step in the NDB patching workflow is to create a software profile version with the desired PostgreSQL version.

問題 #226

Which two options can NDB leverage to refresh a database clone? (Choose two.)

- A. Templates
- B. Transaction logs
- C. Snapshots
- D. Cerebro logs

答案: B,C

解題說明:

NDB can leverage snapshots and transaction logs to refresh a database clone to the latest state of the source database. Snapshots are point-in-time copies of the database that are stored on the Nutanix cluster. Transaction logs are records of the changes made to the database after the snapshot was taken. NDB can use either snapshots or transaction logs, or a combination of both, to refresh a database clone. Cerebro logs and templates are not used for refreshing database clones. Cerebro logs are used for log catch-up operations, which are different from refresh operations. Templates are used for provisioning new databases, not for refreshing existing ones.

問題 #227

.....

你正在為了怎樣通過Nutanix的NCP-DB-6.10考試絞盡腦汁嗎? Nutanix的NCP-DB-6.10考試的認證資格是當代眾多IT認證考試中最有價值的資格之一。在近幾十年裏, IT已獲得了世界各地人們的關注, 它已經成為了現代生活中不可或缺的一部分。其中, Nutanix的認證資格已經獲得了國際社會的廣泛認可。所以很多IT人士通過Nutanix的考試認證來提高自己的知識和技能。NCP-DB-6.10認證考試就是最重要的考試之一。這個認證資格能為大家帶來很大的好處。

NCP-DB-6.10考古題介紹: <https://www.testpdf.net/NCP-DB-6.10.html>

如果你選擇我們為你提供的 Nutanix NCP-DB-6.10 培訓資料, 這將是非常划算的, 因為小小的投資可以換來很大的收穫, Nutanix NCP-DB-6.10真題 每個人心中都有一個烏托邦的夢, 夢境的虛有讓人覺得心灰意冷, 在現實中, 其實這並不是虛有的, 只要你採取一定的方是方法, 一切皆有可能, 可是Nutanix NCP-DB-6.10 認證考試不是很容易通過的, 所以Testpdf是一個可以幫助你增長收入的網站. Testpdf是個可以滿足很多客戶的需求的網站, Nutanix NCP-DB-6.10真題 在IT領域工作的你, 肯定想通過IT 認證考試來證明自己的能力吧, 當你選擇NCP-DB-6.10考試時有沒有選擇相關的考試課程?

獨孤九耀不驚反喜, 眼中的笑意越發的濃郁了, 薛沖正在練著槍法, 如果你選擇我們為你提供的 Nutanix NCP-DB-6.10 培訓資料, 這將是非常划算的, 因為小小的投資可以換來很大的收穫, 每個人心中都有一個烏托邦的夢, 夢境的虛有讓人覺得心灰意冷, 在現實中, 其實這並不是虛有的, 只要你採取一定的方是方法, 一切皆有可能。

專業的NCP-DB-6.10真題和資格考試領先提供商和可信賴的NCP-DB-6.10考古題介紹

可是Nutanix NCP-DB-6.10 認證考試不是很容易通過的, 所以Testpdf是一個可以幫助你增長收入的網站. Testpdf是個可以滿足很多客戶的需求的網站, 在IT領域工作的你, 肯定想通過IT 認證考試來證明自己的能力吧?
