Our Microsoft AZ-400 Exam Simulations will assist you clear exams and apply for international companies or better jobs with better benefits in the near future.

## Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q300-Q305):

### NEW QUESTION # 300

You need to configure a virtual machine named VM1 to securely access stored secrets in an Azure Key Vault named az400-11566895-kv.

To complete this task, sign in to the Microsoft Azure portal.

**Answer:**

Explanation:

See solution below.

Explanation

You can use a system-assigned managed identity for a Windows virtual machine (VM) to access Azure Key Vault.

- \* Sign in to Azure portal
- \* Locate virtual machine VM1.
- \* Select Identity
- \* Enable the system-assigned identity for VM1 by setting the Status to On.

Note: Enabling a system-assigned managed identity is a one-click experience. You can either enable it during the creation of a VM or in the properties of an existing VM.

**NEW QUESTION # 301**

Which branching strategy should you recommend for the investment planning applications suite?

- A. main only
- B. development isolation
- **C. feature isolation**
- D. release isolation

**Answer: C**

Explanation:

Scenario: A branching strategy that supports developing new functionality in isolation must be used.

Feature isolation is a special derivation of the development isolation, allowing you to branch one or more feature branches from main, as shown, or from your dev branches.

When you need to work on a particular feature, it might be a good idea to create a feature branch.

**NEW QUESTION # 302**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unit solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use an Azure Pipelines pipeline to build and release web apps.

You need to configure the pipeline to meet the following requirements:

- \* Only run when there is a change in the /webapp folder.
- \* Only run when a pr is created.

Solution: You configure the pipeline definition by using the following elements.

Does this meet the goal?

- **A. Yes**
- B. No

**Answer: A****NEW QUESTION # 303**

You have a private GitHub repository.

You need to display the commit status of the repository on Azure Boards.

What should you do first?

- A. Add the Azure Boards app to the repository.

- B. Add the Azure Pipelines app to the GitHub repository.
- C. Create a GitHub action in GitHub.
- D. Configure multi-factor authentication (MFA) for your GitHub account.

**Answer: B**

## NEW QUESTION # 304

You have an Azure Repos repository that contains large PSD files. You need to configure Get LFS to manage all the files. How should you complete the script? To answer, drag the appropriate access levels to the correct groups. Each access level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### Answer:

### Explanation:
