### NEW QUESTION # 26

Which of the following statements is false about the WAC + Fit AP networking solution?

- A. A Fit AP encrypts and decrypts 802.11 packets, provides 802.11 physical layer functions, and collects air interface statistics.

- D. The WAC controls and manages Fit APs.

**Answer: B**

Explanation:

In a WAC (Wireless Access Controller) + Fit AP architecture:

A, B, and C are accurate descriptions.

D is false: The AC (WAC) and Fit APs do not use SNMP for communication. Instead, they communicate using CAPWAP (Control And Provisioning of Wireless Access Points) protocol, which supports control, management, and data encapsulation between ACs and APs.

SNMP is used for network management and monitoring but is not the protocol for AC-to-AP communication in WLAN scenarios.
