## XSOAR-Engineer Practical Information | Valid XSOAR-Engineer Exam Papers

We have left some space for you to make notes on the PDF version of the XSOAR-Engineer study materials. In a word, you need not to spend time on adjusting the PDF version of the XSOAR-Engineer exam questions. You can directly print it on papers. It is easy to carry. Whenever and wherever you go, you can take out and memorize some questions. There will be detailed explanation for the difficult questions of the XSOAR-Engineer Preparation quiz. So you do not need to worry about that you cannot understand them.

### Palo Alto Networks XSOAR Engineer Sample Questions (Q145-Q150):

#### NEW QUESTION # 145

During the regular maintenance of XSOAR a customer noticed that there was an update available for the Active Directory content pack (current version 1.4.6) and updated the content pack to the latest version (version 1.4.11). However, after the update the customer noticed that the Active Directory Query integration is not working properly and asked you to resolve the issue. Which of the following set of steps can help to resolve the issue?

- A. Navigate to MarketplaceView the installed content pack and select Active Directory content packClick on uninstall content packNavigate to Marketplace browser and reinstall the Active Directory content pack
- **B. Navigate to SettingsView the configured integrations and select Active Directory QueryDelete all integration instances and add all integration instances again**
- C. Navigate to SettingsView the configured integrations and select Active Directory AuthenticationDelete all integration instances and add all integration instances again
- D. Navigate to MarketplaceView the installed content pack and select Active Directory content packSelect version 1.4.6 and click on "Revert to this version"

**Answer: B**

Explanation:

#### NEW QUESTION # 146

In order to automatically run a playbook on the indicators fetched by an integration, what would an XSOAR Administrator setup?

- **A. Feed triggered job**
- B. Cron job
- C. REST API job
- D. Time triggered job

**Answer: A**

Explanation:

#### NEW QUESTION # 147

Within the playbook editor, which function allows a user to associate a task output to an incident field?.

- A. Mapping.
- B. Inputs.
- **C. Extend context.**
- D. Classification.

**Answer: C**

Explanation:

The XSOAR Playbook Editor allows engineers to manipulate and transform context data dynamically.

According to the XSOAR Admin and Playbook Development Guides, "Extend Context" is the dedicated mechanism that enables a task to save output values into new or existing context keys, including keys that correspond to incident fields. By defining a key under the "Extend Context" section, the playbook task can map specific outputs—such as JSON fields, strings, arrays, or nested objects—to a structured location within the incident context. These keys can then be used to populate incident fields through further playbook tasks, field mappings, or automated incident field updates.

Classification (option A) applies only during ingestion and cannot assign task outputs to incident fields. Inputs (option B) define what data a task receives, not how it is stored afterward. Mapping (option D) belongs to the ingestion pipeline and determines how event fields become incident fields during creation, not during playbook execution.

Therefore, Extend Context is the correct feature that allows a task to associate its output with incident fields, making option C the correct answer based on documentation.

#### NEW QUESTION # 148

Select the correct incident life cycle on XSOAR.

- A. Planning > Incident Ingestion > Pre-processing > Incident Creation > Mapping and Classification > Playbook runs > Post-processing
- B. Planning > Incident Ingestion > Incident Creation > Mapping and Classification > Pre-processing > Playbook runs > Post-processing
- **C. Planning > Incident Ingestion > Mapping and Classification > Pre-processing > Incident Creation > Playbook runs > Post-processing**
- D. Planning > Incident Ingestion > Pre-processing > Mapping and Classification > Incident Creation > Playbook runs > Post-processing

**Answer: C**

#### NEW QUESTION # 149

Which of the following is a basic setting that can be configured in an automation?

- A. Run On
- **B. Schedule**
- C. Summary
- D. Compiler

**Answer: B**

#### NEW QUESTION # 150

.....

The content and design of our XSOAR-Engineer learning quiz are all perfect and scientific, and you will know it when you use this. Of course, we don't need you to spend a lot of time on our XSOAR-Engineer exam questions. As long as you make full use of your own piecemeal time after 20 to 30 hours of study, you can go to the exam. The users of our XSOAR-Engineer Study Materials have been satisfied with their results. I believe you are the next person to pass the exam!
