Reliable Nutanix NCP-DB-6.10 Test Sims | Free NCP-DB-6.10 Vce Dumps

Compared with those uninformed exam candidates who do not have effective preparing guide like our NCP-DB-6.10 study braindumps, you have already won than them. Among wide array of choices, our products are absolutely perfect. Besides, from economic perspective, our NCP-DB-6.10 Real Questions are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our NCP-DB-6.10 prep guide will make you satisfied.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator is initially setting up Time Machine for a newly-provisioned database. What is the maximum number of snapshots per day that can be configured in the GUI?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

When setting up a Time Machine for a newly-provisioned database in NDB, the GUI allows the administrator to configure the frequency of snapshots for data protection. The maximum number of snapshots per day that can be configured in the NDB GUI is 6. This limit ensures a balance between data granularity (for point-in-time recovery) and storage overhead, preventing excessive

resource consumption. The administrator can schedule these snapshots at regular intervals (e.g., every 4 hours) within the Time Machine configuration wizard.

NEW QUESTION # 18

What is the most efficient way to get information on REST APIs for a task in Era?

- A. Navigate to Swagger REST in Era GI-II.
- B. Navigate to and look for the desired
- C. Log into Ere VM end run to list ell the REST APIs.
- **D. use API equivalent button in a workflow.**

Answer: D

Explanation:

This is because it allows the database to be refreshed at the exact time specified (9:30 PM) with the most recent data. The other options either perform the snapshot before the desired time or do not specify when the snapshot would occur. Please note that the exact answer might depend on the specific database system and its capabilities. Always refer to the database's documentation for the most accurate information.

NEW QUESTION # 19

An administrator has applied an Oracle security patch to a database server VM registered in Era. How do you make this change available to other existing database instances?

- A. Merge the changes into an existing software profile.
- B. Create a n.. software profile version from the patched VM.
- **C. Create a new software profile in Era from the patched VM.**
- D. Register the VM as a have' database server VM and then create a software profile using this newly registered VIVI.

Answer: C

Explanation:

Nutanix Database Service (NDB) uses software profiles for database patching to keep your databases secure and optimized. When a new database is provisioned, it will be on your current environment's database version to maintain consistency and stop version sprawl. Therefore, after an administrator has applied an Oracle security patch to a database server VM registered in Era, the change can be made available to other existing database instances by creating a new software profile in Era from the patched VM.

NEW QUESTION # 20

An administrator is asked to refresh a database everyday at 9:30PM with data from as close to the refresh time as possible. What is the best way achieve this requirement?

- A. Schedule an SLA policy to perform snapshot everyday at 9PM.
- B. Schedule an SLA policy that performs a snapshot at 99M and log catchup for every 15 min.
- C. Schedule e log catchup everyday at 9:30PM.
- **D. Schedule an SLA policy to perform snapshot everyday at 9.30PM.**

Answer: D

Explanation:

This is because it allows the database to be refreshed at the exact time specified (9:30 PM) with the most recent data. The other options either perform the snapshot before the desired time or do not specify when the snapshot would occur. Please note that the exact answer might depend on the specific database system and its capabilities. Always refer to the database's documentation for the most accurate information.

NEW QUESTION # 21

What step should be taken to make the profile available to all users:

- A. Update the profile and set available state to All.
- B. Create an Access Control role with the Create Profile right and assign to all users.
- C. Create an Access Control group with the desired users and grant it the Database Admin role.
- D. Update the profile and set the status to Published.

Answer: A

Explanation:

The correct answer is D because it allows the administrator to make the profile available to all users without requiring any additional permissions or roles. A profile is a collection of settings that define how NDB manages a database server or a database. By default, a profile is only available to the user who created it and the Database Admin role. To make a profile available to all users, the administrator can update the profile and set the available state to All. This will enable all users to view and use the profile for their database operations. The other options are not correct because they either require additional steps or do not achieve the desired outcome. Option A is not correct because creating an Access Control role with the Create Profile right and assigning it to all users will only allow them to create their own profiles, not use the existing one. Option B is not correct because creating an Access Control group with the desired users and granting it the Database Admin role will only make the profile available to those users, not all users. Option C is not correct because updating the profile and setting the status to Published will not change the availability of the profile, only the state of the profile. A published profile is a profile that has been tested and verified by the administrator and is ready for use. A draft profile is a profile that is still under development or testing and is not ready for use.

NEW QUESTION # 22

.....

Opportunities are very important in this society. With the opportunity you can go further. However, it is difficult to seize the opportunity. Is your strength worthy of the opportunity before you? In any case, you really need to make yourself better by using our NCP-DB-6.10 training engine. With our NCP-DB-6.10 Exam Questions, you can equip yourself with the most specialized knowledge of the subject. What is more, our NCP-DB-6.10 study materials can help you get the certification. Imagine you're coming good future maybe you will make a better choice!

Reliable NCP-DB-6.10 Test Sims: <https://www.braindumps.com/Nutanix/NCP-DB-6.10-practice-exam-dumps.html>

Increase your NCP-DB-6.10 exam preparation by using our test engine, Recent years the pass rate for NCP-DB-6.10 is low, When you decide to buy our Reliable NCP-DB-6.10 Test Sims - Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 real practice torrent, you will find our price is very reasonable and affordable, It's a great idea to choose our NCP-DB-6.10 latest exam torrent as your partner on your learning path, Through our NCP-DB-6.10 : Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 test vce practice, we expect to design such an efficient study plan to help you build a scientific learning attitude for your further development.

Excessively high ceilings might make it extremely difficult to provide NCP-DB-6.10 the correct amount of light throughout the room and might cause severe shadowing and dark areas, which must be avoided.

Free PDF NCP-DB-6.10 New Exam Materials - Pass NCP-DB-6.10 in One Time - High-quality Reliable NCP-DB-6.10 Test Sims

There are three main questions related to the knowledge axis, power axis, and ethics axis, Increase your NCP-DB-6.10 Exam Preparation by using our test engine, Recent years the pass rate for NCP-DB-6.10 is low.
