Pass Guaranteed Quiz Salesforce - PDII –Reliable Valid Study Plan

As a hot test of Salesforce certification, PDII practice exam become a difficult task for most candidates. So choosing right study materials is a guarantee success. Our website will be first time to provide you the latest PDII Exam Braindumps and test answers to let you be fully prepared to pass PDII actual test with 100% guaranteed.

Salesforce Platform Developer II Sample Questions (Q60-Q65):

NEW QUESTION # 60

What is the transaction limit for the number of records for SOQL queries?

- A. There is no limit
- B. 5,000
- C. 50,000
- D. 10,000
- E. 20,000

Answer: C

NEW QUESTION # 61

An Apex trigger creates a Contract record every time an Opportunity record is marked as Closed and Won. This trigger is working great, except (due to a recent acquisition) historical Opportunity records need to be loaded into the Salesforce instance.

When a test batch of records are loaded, the Apex trigger creates Contract records.

A developer is tasked with preventing Contract records from being created when mass loading the Opportunities, but the daily users still need to have the Contract records created.

'What is the most extendable way to update the Apex trigger to accomplish this?

- A. Use a list custom setting to disable the trigger for the user who loads the data.
- B. Use a hierarchy custom setting to skip executing the logic inside the trigger for the user who loads the data.
- C. Add the Profile ID of the user who loads the data to the trigger, so the trigger will not fire for this user.
- D. Add a validation rule to the Contract to prevent Contract creation by the user who loads the data.

Answer: B

Explanation:

A hierarchy custom setting can be used to create a configuration that the trigger checks before executing its logic. This allows admins to set the configuration to bypass the trigger logic when loading data, without changing the trigger itself or impacting other users.

NEW QUESTION # 62

UC Loans is a small company with a part time Salesforce administrator. UC Loans wants to create a Loan__c record whenever an

Opportunity is won. What is the optimal solution for UC Loans to accomplish this?

- A. Quick Action
- **B. Process Builder**
- C. Apex Trigger
- D. Workflow Rule

Answer: B

NEW QUESTION # 63

Consider the Apex controller below, that is called from an Aura component.

```
Line 1 public class AttributeTypes
Line 2 {
Line 3     private final String[] arrayItems;
Line 4
Line 5     @AuraEnabled
Line 6     public List<String> getStringArray() {
Line 7         String[] arrayItems = new String[] { 'red', 'green',
Line 8         'blue' };
Line 9         return arrayItems;
Line 10 }
```

What is wrong with this code?

- A. Line 8: method must first serialize the list to JSON before returning
- **B. Line 6: method must be static**
- C. Line 1: class must be global
- D. Lines 1 and 6: class and method must be global

Answer: B

Explanation:

The code is wrong because the method `getArrayItems()` is not declared as static. This means that the method cannot be invoked from an Aura component, which requires the Apex controller methods to be static and annotated with `@AuraEnabled`. To fix this, the method should be modified as follows:

```
@AuraEnabled public static String[] getArrayItems() { String[] arrayItems = new String[] { 'red', 'green', 'blue' }; return arrayItems; }
```

NEW QUESTION # 64

A developer created a Lightning web component that allows users to input a text value that is used to search for Accounts by calling an Apex method. The Apex method returns a list of `AccountWrappers` and is called imperatively from a JavaScript event handler.

```

01:
02: public class AccountSearcher {
03:
04:     public static List<AccountWrapper> search(String term) {
05:         List<AccountWrapper> wrappers = getMatchingAccountWrappers(term);
06:         return wrappers;
07:     }
08:
09:
10:     public class AccountWrapper {
11:         public Account { get; set; }
12:         public Decimal matchProbability { get; set; }
13:     }
14:     // ...other methods, including getMatchingAccountWrappers implementation...
15: }

```

Which two changes should the developer make so the Apex method functions correctly?
Choose 2 answers

- A. Add @AuraEnabled to line 01.
- B. Add @AuraEnabled to lines 11 and 12.
- C. Add @AuraEnabled to line 09.
- D. Add @AuraEnabled to line 03.

Answer: B,D

NEW QUESTION # 65

.....

The three versions of our PDII practice braindumps have their own unique characteristics. The PDF version of PDII training materials is convenient for you to print, the software version of training guide can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our PDII free demo first to get a firsthand experience before you make any decision.
